Hello, I appreciate the opportunity to comment on this process. There are several things that struck me regarding this plan.

1) The travel distance to Hampton ES from some of the proposed areas is considerable.
2) The preservation and protection of Cromwell is perplexing. I understand it is a magnet, and you want to preserve seats for the walkers, but if your goal is equity for the entire county, and all children, this protected status seems artificial to me.
3) Stoneleigh elementary is over capacity, I know. But its’ teacher student ratio is appropriate. Could it accommodate some mobiles, and make this a more rational and beneficial distribution for current Pleasant Plains kids?

I am not so foolish to think that mobiles are desirable, but neither is a long bus trip.

From a sky high view, it appears as if some communities have more influence with the BCPS system than others.

I would like to echo the concerns expressed as to the accuracy of the data that the committee is using for the study. We know that the enrollment at PPES is far greater than the 646 students that have been identified in the dataset. In fact, there are 70 more students enrolled at Pleasant Plains as of last week. Additionally, after reviewing the different maps being used for the study, there are clear and obvious errors. The Subdivision map does not identify as “multi-family” the Loch Raven Apartments on the east side of Loch Raven Boulevard between Glen Keith Boulevard and Putty Hill Avenue. There is little to no identification of other major multi family properties within the study area. The Zoning/Landmarks map identifies an area adjacent to the northeast corner of the Country Club of Maryland property as “commercial” which is in fact zoned residential. It also identifies the mixed use commercial development known as Loch Raven Commons as “industrial”. It actually is home to a WaWa convenience store, apartments, restaurants, shops, etc. The map also show an agricultural area on Cowpens Lane that is now a housing development.

I would like to strongly encourage the Committee to insure that the data that they are using is correct and current. A quick perusal of the website would indicate otherwise.

Thanks
