L. Miller

I'm very curious if a final option will be put forth for public input BEFORE updated enrollment numbers are available. It seems like the three principals in attendance at these meetings are all saying the enrollment numbers are inaccurate (and they also seem to know up to the day the more accurate number) so why is the committee still working with old data? I'd hate for a decision on such an important thing to be made which makes the problems WORSE for everyone involved.
