IMPORTANT FOLLOW-UP NOTICE: MEASURES TAKEN
Pot Spring Elementary School

ELEVATED LEAD WATER SAMPLE RESULT(S)
All Maryland public and nonpublic schools are required to sample all drinking water sources for the presence of lead pursuant to the Code of Maryland Regulations. On October 13, 2018, 48 water samples were collected from Pot Spring Elementary School. Of these water samples, seven (7) had levels of lead exceeding the action level of 20 parts per billion (ppb) for lead in drinking water in school buildings. The elevated lead results from the sample(s) collected at Pot Spring Elementary School were as follows:

- 21.4 parts per billion (ppb) Tap Room 4, Handsink
- 23.1 parts per billion (ppb) Bubbler Room 12
- 23.1 parts per billion (ppb) Bubbler Room 14
- 29.6 parts per billion (ppb) Bubbler Room 17
- 23.8 parts per billion (ppb) Bubbler Room 22
- 32.4 parts per billion (ppb) Bubbler Library Workroom
- 22.5 parts per billion (ppb) Tap Library Workroom, Handsink

ACTION LEVEL (AL)
The AL is 20 ppb for lead in drinking water in school buildings. The AL is the concentration of lead which, if exceeded, triggers required remediation.

FOLLOW-UP RESULTS
On November 11, 2019, samples were re-tested from the locations listed above. Samples are now below the AL for all except the following fixtures:

- Bubbler Room 17
- Bubbler Library Workroom

ACTIONS TAKEN WITH DATES
These fixtures were replaced prior to resampling. The fixtures that are below the action level were returned to normal service on February 25, 2020 after sampling results were received. The fixtures that are above the action level are being removed from service.
