

Elementary School Programs

Environmental Science

Students are provided with a hands-on/minds-on approach to instruction that integrates science, math, and technology across the curriculum. Eastwood's facility includes a computer lab, portable TV studio, science lab, and school-yard garden to enhance student learning. Instructional practices, which support achievement for all students, include cooperative learning, differentiated instruction and assessment, team teaching, and flexible grouping. Students participate in special programs and activities such as science investigations utilizing the school-yard habitat garden, extracurricular science club, and the environmental fair. Students complete all requirements of the BCPS curricula. (Eastwood Center is recognized as a Maryland Green School.)
