

High School Programs

Academy of Business & Information Technology

This academy allows students to develop their interests and talents in Business Management, Marketing, and Computer Science.

Business Management: Students will manage and supervise activities related to the organization of a business. They will develop a strategic business plan, implement a plan of work, and learn to provide effective and efficient management of business operations.

Marketing: Students will strategize business activities related to selling, customer support services, and public relations. They will analyze customer markets, determine product mix, pricing, promotion, distribution, and learn public relation strategies.

Information Technology – Programming: Students will design, develop, and test software solutions and develop expertise in project management and programming languages, as well as introductory computer science.
