

## High School Programs

### **Academy of Health and Human Services**

This program offers students an opportunity to develop their interests and talents in Education and Training, Food Service and Training, Legal and Protective Services, and Therapeutic and Diagnostic Services.

**Education and Training:** Child Care Services-This instructional program prepares students to work in fields related to the education and care of young children from birth to age eight in early childhood settings, such as day care centers, preschool programs, and kindergarten. Developmental stages of children, learning theories, and methods and materials of teaching young children are included in this program. Application of skills continues through working in a child development lab situation. The 90-hour child care certificate issued by the State of Maryland may be earned through successful completion of this program. Students who complete the program may earn articulated college credits. This program will prepare students to gain entry into highly competitive education degree programs at post-secondary institutions.

**Food Service and Training** – This program allows students to explore information and courses related to nutrition, food preparation and management. Students may obtain a job-related internship while completing the program.

**Legal and Protective Services:** The program introduces students to topics in law and public policies, while helping students develop strong communication skills. Coursework emphasizes technology and student research. Students may participate in field experiences, job shadowing, and internship opportunities in forensic science, law, and government professions. Upon completion of the program, students are prepared to enter the fields of law enforcement, security and loss prevention, and corrections. Students will also be prepared to enter college and pursue law-related careers in law enforcement, parole, and probation.

**Therapeutic and Diagnostic Services:** The program introduces students to the various occupations in the health care field, as well as, to a basic understanding of the therapeutic rehabilitation and diagnostic process. Students apply knowledge of the human body, medical terminology, basic patient care procedures, and communication skills necessary to assist clients in a variety of health care facilities. Successful completion of the entire program enables individuals to continue their post-secondary education in rehabilitative therapy, occupational therapy, physical therapy, sports medicine, and other physical fitness/therapeutic careers.
