

High School Programs

Cosmetology

The cosmetology careers program prepares individuals to care for and beautify hair, nails, and skin. Hair techniques taught include giving shampoos, rinses, scalp treatments, styling, setting, cutting, hair coloring and lightening, permanent waving and relaxing. Skin techniques include facials and make up applications, while nail techniques include manicures, pedicures, artificial nail techniques, and hand and arm massages. Emphasis is placed on hygiene and sanitation, decontamination, and infection control. Related areas of instruction include bones, muscles, nerves, chemistry, electricity, computer imaging, product knowledge, customer relations, and salon management. Students may further their education and acquire more practical experience by working in a private salon, or enrolling in a business management program at the community college level. Fifteen hundred hours of instruction qualifies the student for an operator's licensing examination in Maryland in the senior year of high school. Students are expected to officially apply for and sit for the State of Maryland Board of Cosmetologists license examination prior to graduation.

NOTE: Students who qualify for Career & Technology Education magnet programs offered in schools in their geographic area are given priority in placement over students who reside in other areas of the county that offer similar programs.

Students who qualify for Career & Technology Education magnet programs not offered in schools in their geographic area are given the same consideration as other applicants.

-available at G. W. Carver Center for Arts & Technology(CCAT), Milford Mill Academy(MMA), Sollers Point Technical High School(SPTHs), and Western School of Technology and Environmental Science(WSTES)
