

Mary Mitchell - Logbook

1/5/05

To do list:

1. Pick what type of project to do
2. Identify the variables to work on

Type of project:

Experimental (because I will be changing the type of rods)

Variables:

The independent variable is the type of rod I will use.

The dependent variable is whether or not gas is present.

The control variables are the battery, wires, the beaker, the amount of water.
