

## Captain Tim's Book!

# “StarQuest – A Beginner’s Guide to Digital Astrophotography”

By  
Timothy Kent  
(StarLab 2 Commander)

Because he was inspired by students, teachers, and parents, Captain Tim has just written a book that is now in publication entitled, “*StarQuest – A Beginner’s Guide to Digital Astrophotography.*” In these pages, he shares his passion for astronomy and taking pictures of the night sky with a telescope and a digital camera. In addition to his numerous images of the moon, stars, and planets that Captain Tim includes in the book, this “how-to” guide describes in a non-technical, easy-to-read format how anyone can take beautiful celestial photos with a simple point-and-shoot digital camera (with or without a telescope). A chapter describing the success and popularity of the BCPS StarLab program is also included in the book. For more information concerning “StarQuest”, contact Tim Kent in the Office of Science, PreK-12 by emailing him at [tkent@bcps.org](mailto:tkent@bcps.org).

“*StarQuest – A Beginner’s Guide to Digital Astrophotography*”  
ISBN 978-1-929148-73-8, Softcover, 102 pages.
