

# Safari Montage Resource Portal & the Starlab

The Safari Montage Resource Portal is found on BCPS Office of Library Information Services. There are several videos that are on astronomy and are grade level appropriate. These videos could be viewed before or after Starlab's visit to your school and can be used to introduce new material or review information. The video clips are organized by chapter and the teacher may decide to show specific chapters depending on the students' prior knowledge and the abilities of their students.
