

Inclement Weather

The Reptile and Amphibian Program will be held in rain, snow, or heat. Appropriate measures will be taken to keep all students safe in inclement weather but the program will still take place. If there is a need to cancel the trip due to severe inclement weather, the Outdoor Science staff will contact the teacher or school to make a final decision. **Please remind all students and adults to dress appropriately for the possible weather conditions of the day.**

Oregon Ridge Nature Center follows BCPS school closings and delays. If schools are closed, the Insect Classification Program will be cancelled and every effort will be made to reschedule the field trip. If schools are delayed one hour, try to arrive as close to the original 10 A.M. start time as possible. *Schools must arrive before 10:30am for the program to take place.* If schools are delayed two hours, the program will be canceled and we will attempt to reschedule the field trip. The Outdoor Science staff will be in communication with the Department of Science in reference to any early school closures and will dismiss accordingly.
