

Inclement Weather

Eco-Trekkers will be held in rain, snow, or heat. Appropriate measures will be taken to keep all students safe in inclement weather but the field study will still take place. If there is a need to cancel the trip due to severe inclement weather, the Outdoor Science staff will contact the teacher or school to make a final decision. **Please remind all students and adults to dress appropriately for the possible weather conditions of the day.**

Marshy Point Nature Center and Miami Beach follow BCPS school closings and delays. If schools are closed, the Eco-Trekkers Program will be cancelled and every effort will be made to reschedule the field study. If schools are delayed one hour, the program will be delayed one hour. If schools are delayed two hours, the program will be delayed two hours. The Outdoor Science staff will be in communication with the Department of Science in reference to any early school closures and will dismiss accordingly.
