Student Responses to the 2017 BCPS Stakeholder Survey

(Response Rate: 68.0%)

Superintendent's Note

Dear school community,

Thank you for being part of the 2017 Stakeholder Survey. We are so proud that participation from students, parents, staff, and community members in the past year increased 11 percent to 81,019 responses. Schools are using these results to guide improvement and staff training.

This is the first year that we are providing every school with its own report on student responses. Page two focuses on academic aspirations, belonging, and student support because we know that students who agree with these questions have better achievement, growth, and behavior. We also know that we can help students improve these perceptions, which improves their outcomes.

Take a look at how students at your school felt in spring 2017. What challenges and opportunities do you see? I look forward to partnering with you to prepare every student for a successful future as all schools strengthen literacy across the content areas and promote positive school climates.

Interim Superintendent

Reporting Student Responses

This report contains student responses to questions on the 2017 Stakeholder Survey for your school. Most survey questions are organized under the following three areas:

- **Academic Aspirations** measures students' perceptions of teacher expectations, their interest and engagement in class, and belief that their BCPS education will allow them to succeed in the future.
- **Belonging** measures the extent to which students feel physically and emotionally safe at school. Items in this domain address the overall school environment and peer-to-peer relationships.
- **Student Support** measures the communication and social support that students receive in school and includes the relationships students have with their teachers and other adults in the school.

Additional questions not grouped within the areas above are also reported. These include questions regarding bullying, challenging schoolwork, school pride, and school effectiveness.
