

NON-INSTRUCTIONAL SERVICES:                      NON-  
INSTRUCTIONAL SERVICES

Products and Services for Purchase with Student Funds

I. Policy Statement

- A. The Board of Education of Baltimore County (Board) understands that merchandise purchased for ultimate sale to students preserves and enhances school spirit and morale in the Baltimore County Public Schools.
- B. The Board authorizes the Superintendent to designate those school officials who may enter into a relationship with a private business for the purpose of making select products or services available for purchase with student funds, as long as the highest standards of ethical behavior are incorporated. The competitive nature of public purchasing and the efficient use of public funding requires that ethical standards be incorporated into all purchasing functions. Accordingly, all employees, consultants, and volunteers seeking relationships with private businesses, are subject to the Board of Education's ethics code policies.

II. Implementation

- A. The Board directs the Superintendent to develop guidelines for the implementation of this policy.
