POLICY 6000

Curriculum and Instruction

The Board of Education of Baltimore County (Board) recognizes that the foundation of the school system's educational program is a systemic curriculum designed and structured so that Baltimore County Public School (BCPS) students will have the knowledge, skills, and attitudes to reach their potential as responsible, productive citizens in a global economy and a multicultural society.

The Board recognizes that the curriculum must delineate a prescribed course of study "to provide a quality education that develops the content knowledge, skills, and attitudes that will enable all students to reach their maximum potential as responsible, life-long learners and productive citizens."

The Superintendent shall establish, implement, and monitor a process for the development, alignment, and review of the written, taught, and assessed curriculum that reflects global, national, state, and local standards and requirements and provides academic rigor for all students.
