That the Board consider taking positions on Key School Legislation.

Attachment I – Key School Legislation Attachment II – House Bill 1409

Attachment III – House Bill 1060 (Senate Bill 747)

Attachment IV – House Bill 1230 (Senate Bill 787)

Attachment V – Fiscal Note for House Bill 1230 (Senate Bill 787)

BALTIMORE COUNTY PUBLIC SCHOOLS KEY SCHOOL LEGISLATION MARCH 9, 2004

SB 1 Education – Teachers – State and Local Aid Program for Certification

Under current law, there is a program of State and local aid to teachers who pursue certification by the National Board for Professional Teaching Standards known as the State and Local Aid Program for Certification by the National Board for Professional Teaching Standards. Each school year, the State Board is required to select, consistent with the amount provided in the State budget, a maximum of 500 teachers to participate in the Program. The law provided for the act to remain effective for a period of 7 years, and to sunset May 31, 2004. As proposed, this bill would strike the sunset provision.

* This Bill has passed the Senate and is presently before the House.

Board supports SB 1.

SB 8 (HB 306) Teachers' Retirement and Pension Systems – Reemployment of Retired Teachers – Sunset

Current law is scheduled to sunset June 30, 2004. This measure would extend the termination date until June 30, 2008, for provisions of law that allow retirees of the Teachers' Retirement and Pension Systems to be reemployed without an earnings limitation imposed on their retirement benefit.

Board supports SB 8 (HB 306).

SB 115 Task Force to Study the Maryland Teachers' Pension System and the Teachers' Retirement System

This legislation would establish a 27-member task force to review and evaluate the adequacy of the two systems and, if deemed necessary, make recommendations for changes.

Changes to the benefits structure of the Maryland Teachers' Pension and Retirement Systems have left our State with one of the least attractive systems in our nation.

Board supports SB 115.

SB 174 (HB 741) Education – Maryland School for the Blind – Notice to Parents or Guardians of Availability of Programs

This legislation, sponsored by Senators Klausmeier, Harris, Hollinger, and Stone, requires that local education agencies notify the parents or guardians of each blind or visually impaired child, including children with multiple disabilities, of the availability of the educational programs offered by the Maryland School for the Blind. This legislation would require a process that is already in place relative to the Maryland School for the Deaf and in fact is already employed in serving the needs of visually impaired children by the Baltimore County Public Schools.

* This Bill has passed the Senate and is presently before the House.

Board supports SB 174 (HB 741).

SB 526 (HB 851) Education – Distressed Schools – Performance Incentive Grants

This legislation, sponsored by Senator Delores Kelley, would create an incentive grant program for schools defined by the Maryland State Department of Education as in need of improvement, corrective action, or restructuring. Should these schools demonstrate "statistically significant progress" toward achieving AYP for three years, the school would be eligible to receive a \$15,000 grant.

Board supports SB 526 (HB 851)

HB 162 Teacher Incentives

This legislation, requested by the State Department of Education, specifies that a classroom teacher who holds a professional certificate or a resident teacher's certificate and teaches in a public school identified in accordance with State Board regulations as a school in need of improvement, a school under corrective

action, or a restructured school that achieves adequate, yearly progress for two consecutive years shall receive a one-time stipend from the State in the amount of \$4,000, provided that the teacher taught in the school for the two years in which the school achieved adequate, yearly progress.

Board supports HB 162.

HB 199 Public School Construction – Modular Construction

This legislation would require that the Board of Public Works shall include modular construction as an approved public school construction or capital costs. It would also require that the Board of Public Works adopt regulations defining modular construction and minimum specifications for their approval as a public school construction cost.

Board supports HB 199

HB 208 Education – County Boards of Education – Competitive Bidding

This legislation would increase the threshold dollar amount of a contract for which a county board of education must use competitive bidding. This increase in the statutory limit from \$15,000 to \$25,000 would place local boards of education on par with the same \$25,000 limit used by the State of Maryland, counties, and other municipalities.

Board supports HB 208.

HB 345 (SB 245) Bridge to Excellence in Public Schools Act – Trigger Provision – Repeal

This legislation would repeal the provision in the Bridge to Excellence in Public Schools Act that makes a specified level of State funding contingent upon the adoption of a joint resolution by the General Assembly before the 50th day of the Session; and repeals the provision of the Act establishing an alternative funding level of State aid for education if the joint resolution is not adopted. The genesis of this resolution is the Attorney General's opinion that this provision of the law raises serious legal questions. The House version of the Bill was quickly heard and passed and is currently before the Senate.

* This legislation has passed and is presently before the Governor.

Board supports HB 345 (SB 245).

HB 1409 Baltimore County – Comprehensive Master Plan – Class Size Reduction

This legislation, if passed, would amend the Master Plan requirements for the Baltimore County Public Schools under the Bridge to Excellence in Public Schools Act (Thornton). The Master Plan for Baltimore County would also need to include a description of the county Board's goals relating to the reduction of class size in kindergarten through third grade; and progress made towards achieving these goals.

Local school systems are presently only one-half year into their management under required Master Plans. The process of developing Baltimore County's plan was deliberate and comprehensive as to content as well as the involvement of stakeholders. Our budget, based upon the *Blueprint for Progress/Master Plan*, is presently before the County Executive and will shortly move to the County Council.

Amendments to the statewide Master Plan requirements for an individual county, before the State Board of Education has the opportunity to review one year's data across Maryland, should be resisted. A process currently exists in the requirements for master plans, which allow the State Superintendent of Schools to require additional information—Section 5-401,(c)(8), which can be seen on page 2, line 27 of the Bill.

Opposition is recommended to HB 1409.

*HB 1060 (SB 747) Teachers' and Local Employees' Retirement Enhancement Act of 2004

This legislation, sponsored by Delegate Adrienne Jones and 48 members of the House, is the long-anticipated effort to improve Maryland's teachers' pension program. Once deemed the best program in the nation, reform legislation over a decade ago has rendered Maryland's system for its educators near last in states' rankings. This legislative proposal includes the recommendation of the Task Force on Pensions, which would be:

- 3 Increase cap on COLA from 3% 5%
- 3 Mandatory for new hires, optional for current members
- 3 Across the board increase for current retirees:
 - a) \$1,200 for retirees who have been retired not more than 5 years;
 - b) \$1,500 for retirees who have been retired more than 5 but less than 10 years;
 - c) \$1,800 for retirees who have been retired more than 10 but less than 15 years; and
 - d) \$2,100 for retirees who have been retired more than 15 years.
- ③ Benefits based on entire compensation (stipends, coaches, national teacher certification)
- 3 Ability to purchase service credit similar to retirement system
- 3 Reduce penalties for early retirement by 1%
- 3 Reduce retirement age from 62 to 60 without 30 years (similar to retirement system)
- 3 Employees' contribution from 2% to 5%

The Fiscal Note on this legislation has not been completed but is expected to be about \$200 million. As such, the expectations of passage are low, but the placement of the issue on the legislative agenda is crucial to future reform.

Support for HB 1060 (SB 747) is recommended.

*HB 1230 (SB 787) Public School Facilities Act of 2004

This legislation articulates the recommendations of the Task Force to Study Public School Facilities. This task force was prescribed by language in the *Bridge to Excellence Act* and was charged to conduct a similar analysis of "adequacy" as it pertains to facilities. Sponsored by the Chairs of the House Ways and Means and Appropriations Committees and the Chairman of the

House Minority, it represents a bipartisan effort to recognize facilities' needs and begin the process for their systematic address.

This comprehensive and complex legislation is based upon the Task Force's analysis of facilities adequacy needs exceeding \$3.8 billion across our State with a finding of a \$408 million need in Baltimore County (page 15 of the attached Fiscal Note).

Among several recommendations, this legislation calls for a new cost-sharing formula for each county beginning in 2006, a reduction in state rated capacity for elementary classes in grades one to five, a change in the aging schools allocation which would reduce our share, and the introduction of alternative funding methods.

Faced with an affordability challenge similar to that of the Thornton Commission, the Task Force on Facilities recommends, and the legislation reflects, a multi-year phase-in until 2013 to achieve the targeted dollars in State support, requiring about \$250 million in annual State Capital support. This is approximately \$150 million more than the State's commitment for each of the next four fiscal years.

Considering the present fiscal condition of the State's economy, careful monitoring of the possible piecemeal passage of these recommendations will be necessary so as to insure that administrative/legal changes are not made in absence of the necessary resources—unfunded mandates.

If the legislation were passed in its entirety, Baltimore County facility needs would be better met through increased State support.

Support is recommended for HB 1230 (SB 787).

- 11 (2) The cost of acquiring land may not be considered a construction or 12 capital improvement cost and may not be paid by the State.
- 13 [(b)] (C) The State shall pay the costs in excess of available federal funds of 14 [all] THE STATE SHARE OF public school construction projects and public school 15 capital improvements in each county if:
- 16 (1) The projects or improvements have been approved by the Board of 17 Public Works; and
- 18 (2) Contracts have been executed on or after July 1, 1971 for the projects 19 or improvements.
- 20 [(c) (1) In this subsection, "local debt for school construction" includes any 21 debt incurred as the result of money made available to a county under a bond issue 22 that obligates the credit of the State.
- 23 (2) Except for general public school construction loan debt outstanding 24 or obligated as of June 30, 1967 for which repayment by a county is no longer 25 required, the State shall reimburse each county for the full costs of principal and 26 interest payments on any local debt for school construction outstanding or obligated 27 as of June 30, 1967.
- 28 (d) The State shall pay all of the annual cost of debt service on school 29 construction debt incurred by each county that was outstanding or obligated on or
- 30 after June 30, 1967 for contracts let before June 30, 1967.]
- 31 [(e)] (D) (1) The Board of Public Works may adopt [rules, regulations, and 32 procedures] REGULATIONS for the administration of the programs provided for [by 33 subsections (b) and (d) of] IN this section.
- 34 (2) The [rules, regulations, and procedures] REGULATIONS adopted by 35 the Board of Public Works may contain requirements for:
- 36 (i) The development and submission of long range plans;

- 18 (1) reduce the State rated classroom capacity for elementary grades 1 to 5 to
- 19 23 students per classroom;
- 20 (2) establish a planning priority process to evaluate requests for State
- 21 planning approval in the annual Capital Improvement Programs of local education
- 22 agencies;
- 23 (3) develop design guidelines and provide financial incentives, such as
- 24 supplemental design funds or additional construction funding, for school construction
- 25 projects that use innovative building techniques or include energy conservation,
- 26 sustainable building, or green architecture design features; and
- 27 (4) establish a new State and local cost-share formula for each county for use
- 28 beginning in fiscal year 2006, consistent with the recommendations contained in the
- 29 Report of the Task Force to Study Public School Facilities, issued in February 2004.
- 30 SECTION 8. AND BE IT FURTHER ENACTED, That the State Department

- 33 similar to the Facility Assessment Survey that the State Department conducted, at
- 34 the direction of the Task Force to Study Public School Facilities, in 2003. The State
- 35 shall provide funds necessary to conduct the survey.

- 36 SECTION 9. AND BE IT FURTHER ENACTED, That it is the intent of the
- 37 General Assembly that the Board of Public Works and the Interagency Committee on
- 38 School Construction establish an emergency repair fund to finance renovations and
- 39 improvements to public schools that resolve deficiencies that present an immediate
- 40 hazard to the health or safety of the students or staff of the schools, as certified by

- 1 local education agencies and approved by the Interagency Committee on School
- 2 Construction. By July 1, 2004, the Board of Public Works and the Interagency
- 3 Committee on School Construction shall develop procedures for use of the emergency
- 4 repair fund to resolve deficiencies that present an immediate health or safety hazard
- 5 and to resolve deficiencies that, if not corrected, may present an immediate health or
- 6 safety hazard. It is the intent of the General Assembly that at least \$2 million be
- 7 provided for the emergency repair fund in fiscal year 2005.

8 SECTION 10. AND BE IT FURTHER ENACTED, That it is the intent of the

- 9 Governor and the General Assembly that the State should pursue a goal of fully
- 10 funding by fiscal 2013 a minimum of \$3.85 billion in school facility needs, as
- 11 identified by the 2003 School Facility Assessment Survey of minimum standards
- 12 conducted at the request of the Task Force to Study Public School Facilities.
- 13 Achieving this goal in light of the fiscal outlook will be challenging and will require a
- 14 significant commitment by the State to provide approximately \$2 billion and by local
- 15 governments to provide approximately \$1.85 billion over the next 8 years for school
- 16 construction projects. It is recognized that this amount does not include many projects
- 17 that local education agencies believe are necessary, but it does include basic,
- 18 minimum facility standards for all public schools in Maryland.

19 SECTION 11. AND BE IT FURTHER ENACTED, That the Public School

- 20 Construction Program shall provide assistance to Baltimore City, counties, and local
- 21 education agencies in using alternative financing mechanisms to fund school
- 22 construction, when appropriate. The Public School Construction Program shall
- 23 prepare a guide for Baltimore City, counties, and local education agencies to use when
- 24 evaluating alternative financing proposals. The guide should include model contracts,
- 25 model solicitations, and references to other documents which provide information on
- 26 alternative financing. The Public School Construction Program should help Baltimore
- 27 City, counties, and local education agencies identify when an alternative financing
- 28 mechanism may be appropriate for a particular project and to develop the
- 29 procurement, contractual, and technical instruments that will meet State and local
- 30 procurement requirements and bring the project to a successful conclusion. The
- 31 Public School Construction Program shall report to the Board of Public Works,
- 32 Baltimore City, the county governments, local education agencies, and the General
- 33 Assembly on or before September 1 of each year, in accordance with § 2-1246 of the
- 34 State Government Article, on the use of alternative financing mechanisms to finance
- 35 public school construction in Maryland in the prior fiscal year.
- 36 SECTION 12. AND BE IT FURTHER ENACTED, That Section 3 of this Act
- 37 shall take effect July 1, 2008.
- 38 SECTION 13. AND BE IT FURTHER ENACTED, That Sections 2 and 4 of
- 39 this Act shall take effect July 1, 2005. Section 2 of this Act shall remain effective for
- 40 a period of 3 years and, at the end of June 30, 2008, with no further action required by
- 41 the General Assembly, Section 2 of this Act shall be abrogated and of no further force
- 42 and effect.
- 43 SECTION 14. AND BE IT FURTHER ENACTED, That, except as provided in
- 44 Sections 12 and 13 of this Act, this Act shall take effect July 1, 2004.

Department of Legislative Services

Maryland General Assembly 2004 Session

FISCAL AND POLICY NOTE

House Bill 1230

(Delegate Hixson, et al.)

(Task Force to Study Public School Facilities)

Appropriations and Ways and Means

Public School Facilities Act of 2004

This bill implements many of the recommendations of the Task Force to Study Public School Facilities to include additional State and local funding for public school construction and alternative methods to finance school construction projects.

Except for certain provisions, the bill takes effect July 1, 2004. The provision relating to relocatable classrooms takes effect July 1, 2005 and terminates on June 30, 2008. The provision relating to the Aging Schools Program takes effect July 1, 2005.

Fiscal Summary

State Effect: General fund expenditures would increase by \$2.3 million in FY 2005. Annuity bond fund expenditures for debt service costs would increase by \$2.4 million in FY 2007 and by \$131.5 million in FY 2020.

(\$ in millions)	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
Revenues	\$0	\$0	\$0	\$0	\$0
GF Expenditure	2.3	3.3	3.5	3.5	2.3
Bond Exp.	0	0	2.4	7.1	15.9
Net Effect	(\$2.3)	(\$3.3)	(\$5.9)	(\$10.6)	(\$18.2)

Note:() = decrease; GF = general funds; FF = federal funds; SF = special funds; - = indeterminate effect

Local Effect: Local funding for school construction would be significantly affected by the bill's provisions. Twelve local school systems would realize an increase in the State share of eligible school construction costs, while five systems would realize a decrease. Funding under the Aging Schools Program is modified with seven systems realizing an increase in funding and nine systems realizing a decrease.

Small Business Effect: Meaningful.

Analysis

Bill Summary: This bill implements many of the recommendations of the Task Force to Study Public School Facilities. Major provisions are discussed below.

State and Local Funding for Public School Construction

The bill states that it is the intent of the Governor and the General Assembly that a minimum of \$3.85 billion be provided to fund school facility needs by fiscal 2013. Of this amount, the State will provide \$2 billion and local governments will provide \$1.85 billion over the next eight years.

Allocation of State School Construction Funds

The Interagency Committee on School Construction (IAC) must provide recommendations to the Board of Public Works (BPW) by December 31 of each year for public school construction projects that comprise at least 75% of the anticipated school construction allocation for the following fiscal year. The remaining allocation may be allocated by BPW as provided in regulation.

State and Local Cost Share Formula

BPW must establish a new State and local cost-share formula for each county for use beginning in fiscal 2006, consistent with the recommendations contained in the task force report. Special school construction funding provisions relating to Baltimore City and Prince George's County may be altered depending upon the new cost-share formula adopted by the board.

Class Size/State Rated Capacity

The State rated capacity (SRC) for elementary classes in grades one to five is lowered from 25 students per class to 23 students.

Emergency Repair Fund

It is the bill's intent that BPW and IAC establish an emergency repair fund to finance renovations and improvements to public schools, thereby resolving deficiencies that present an immediate hazard to the health or safety of the students or staff of the schools. BPW and IAC must develop procedures for the use of the funds by July 1, 2004. The fund must receive at least \$2 million in fiscal 2005.

Aging Schools Program

The bill alters the allocation of the Aging Schools Program beginning in fiscal 2006 by basing funding on the current percentage of pre-1970 square footage and by retaining the \$65,000 and \$85,000 minimum allocations.

Authorization to Issue Bonds to Fund Public School Construction

A county is authorized to issue bonds to finance the costs of construction or improvement of public school facilities. The bonds must be authorized by a resolution of the local governing body. The resolution must: (1) describe the public school construction or improvements to be financed through the sale of the bonds; (2) state the maximum principal amount of the bonds; (3) describe the sources of repayment of the bonds; (4) state the maximum term of the bonds, which may not exceed 30 years; and (5) describe any terms or conditions under which the bonds may be redeemed before maturity.

Bonds issued constitute an irrevocable pledge of the full faith and credit and unlimited taxing power of the county to the payment of the principal and interest on the bonds when the bonds become payable and are exempt from State, county, and municipal taxation. A county may enter into agreements with agents, banks, fiduciaries, insurers, or others to enhance the marketability of and security for the bonds; or secure any tender option granted to the holders of the bonds.

Additional Local Taxing Authority (Transfer, Sales, and Property Taxes)

The local governing body may impose a transfer tax to cover the debt service on the local bonds issued for public school construction. The transfer tax does not apply to the property exempt from the State transfer tax or in counties that have already imposed a transfer tax on June 30, 2004. In addition, a county may impose a retail sales tax to cover the debt service on the local bonds. The tax cannot be imposed on tax exempt items. Finally, the county must impose an ad valorem tax on all assessable property within the county for the purpose of covering the debt service on the outstanding bonds.

Alternative Financing Methods

Except when prohibited by local law, a county may engage in the following to finance public school construction: alternative financing methods; competitive negotiation instead of competitive bidding; accepting unsolicited proposals for the development of public schools; and using quality-based selection in which selection is based on a combination of qualifications and cost factors. Alternative financing methods include sale-leaseback arrangements, lease-leaseback arrangements, public-private partnership agreements, and performance-based contracting. At the request of IAC, BPW may adopt regulations to implement these provisions, including: guidelines for the acceptance and evaluation of unsolicited proposals; requirements for the execution of a comprehensive agreement; and the applicability of State procurement laws to procurement or financing of public school construction. The Public School Construction Program (PSCP) must provide assistance to Baltimore City, counties, and local boards of education in using alternative financing mechanisms, when appropriate. PSCP must report to BPW, Baltimore City, county governments, local school systems, and the General Assembly by September 1 of each year on the use of alternative financing mechanisms to finance public school construction in Maryland in the prior fiscal year.

Eligible Costs for Relocatable Classrooms

The bill makes the purchase of relocatable classrooms an eligible cost under PSCP for the three-year period fiscal 2006 through 2008. BPW must adopt regulations that define relocatable

classrooms and establish the minimum specifications for relocatable classrooms which may be purchased using State funds. The Governor must provide \$1 million in fiscal 2006 through 2008 for public school construction in excess of the estimates of funding for public school construction contained in the fiscal 2005 through 2009 capital improvement plan for the purpose of funding the State share of the cost of purchasing relocatable classrooms.

Survey of Public School Facilities

IAC must survey the condition of school buildings identified by the Maryland State Department of Education (MSDE) each year. The Department of General Services (DGS) must conduct the inspections of individual school buildings. IAC must report to the Governor and the General Assembly by October 1 of each year on the results of the survey for the prior year. In addition, MSDE must adopt regulations that provide for periodic surveys of the condition of public school facilities in Maryland at least every four years. The surveys must be similar to the Facility Assessment Survey that MSDE conducted at the direction of the task force. The State must provide the funds necessary to conduct the survey.

Termination of Authorization

Any funds approved for a project that has not been contracted for within two years shall revert to the statewide contingency fund. IAC, with the approval of BPW may extend the time period if IAC determines that unusual circumstances exist. Any unexpended allocation of funds for previously approved projects must be transferred to the fund. IAC must report to the General Assembly by June 1 and December 1 of each year on the balance in the fund as the result of transfers or reversions.

Ownership of Public School Facilities

The bill enables a private entity to hold the title to property used for a particular public school or local school system if the private entity is contractually obligated to transfer the title to the appropriate local board of education on a specified date.

Reuse of Plans and Specifications for School Construction Projects

Local boards of education are encouraged to reuse recently used school designs, when educationally appropriate and cost effective over the useful life of the project, within each county and across local school systems.

Purchasing Contracts

DGS must provide a report to MSDE and each local school system by July 1 of each year that describes existing State purchasing contracts that the local school systems may use to purchase school furniture, equipment, commodities, and services.

IAC and BPW

The bill expands the types of regulations that BPW can implement and codifies IAC membership to include the State Superintendent of Schools, the Secretary of Planning, and the Secretary of General Services. BPW is authorized to adopt regulations that establish priority public school construction programs and provide for the development of cooperative arrangements that permit the sharing of facilities among two or more local school systems.

Current Law: PSCP, through oversight by IAC, provides State funding to local school systems for school construction and improvement projects. Each September, the Governor provides IAC with the proposed amount of funding for public school construction for the upcoming fiscal year. IAC then transmits this information to the local jurisdictions and requests their annual and five-year capital improvement programs (CIPs) by October 15.

In October and November, IAC staff reviews the CIPs and recommends to IAC which projects should be funded based on certain criteria. In December, IAC develops a list of eligible projects and decides which of those projects should be recommended to BPW for its approval. IAC typically recommends an initial allocation of 75% of the proposed school construction budget. In January, BPW listens to appeals from the local jurisdictions and votes on IAC recommendations. The list of projects approved by BPW and any supplemental requests made by the Governor become part of the State's proposed capital budget. The proposed budget is

then submitted to the General Assembly for approval. In May, BPW allocates any remaining school construction funds to school construction projects recommended by IAC and the Governor.

BPW defines by regulation what constitutes an approved public school construction or capital improvement cost. Although it is not written into regulations or any other published policy manuals or guidelines, the purchase of relocatable classrooms has never been eligible for State funding. Under current law, all public school property must be held in trust by the appropriate local board of education.

Background: In 2002, the Bridge to Excellence in Public Schools Act (Chapter 288) established a Task Force to Study Public School Facilities. Chapter 288 directed the task force to look at whether the State's public school facilities are adequate to sustain programs provided for under the Act and supported by proposed funding levels. The Act further directed the task force to examine the equity of the State's school construction program, particularly the equity of the State and local cost shares for school construction projects; whether to continue the Aging Schools Program as a permanent program; and any other issues the task force determines are relevant to evaluate the adequacy and equity of the State's school construction program.

In completing its charge, the task force undertook an assessment of the current conditions of the State's existing public schools. A survey was conducted by MSDE based on 31 minimum facility standards developed by a workgroup chaired by the State Superintendent of Schools and approved by the task force in March 2003. The standards were based on local, State, and federal standards for facilities and included the ability of the facility to support educational programs. The National Clearinghouse for Educational Standards reported that Maryland's survey is the first of its kind in the nation. The survey results were released on November 6, 2003.

The survey indicated that \$3.9 billion is needed to bring existing public schools up to standards of which \$1.5 billion is needed for additional student capacity for the 2007-2008 school year. **Appendix 1** shows the amount of needed funds in each county. Furthermore, more than one-third of public schools across the State did not meet the standard in at least one of eight facility areas. Among the facility areas in need of attention are student capacity, accessibility for students with disabilities, existing pre-kindergarten and kindergarten classrooms, and spaces for secondary science, fine arts, and health services. It should be noted that many of the standards are based on relatively new standards developed in the last 10 to 15 years. Only 26% of Maryland's school space has been constructed or undergone major renovation since 1990. All schools are required to meet the current standards when they are constructed or renovated.

State Fiscal Effect: General fund expenditures could increase by \$2.3 million in fiscal 2005. **Exhibit 1** shows the potential cost by agency in fiscal 2005 through 2009. It is assumed that State PAYGO funds would be used for the emergency repair fund and relocatable classrooms. MSDE is responsible for conducting the facilities assessment survey.

Exhibit 1 General Fund Expenditures at MSDE and PSCP

Agency/Expenditure	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009

Administrative Costs – MSDE

The proposed fiscal 2005 budget for MSDE's School Facilities Branch includes four registered architect positions and one administrative assistant. Existing staffing is adequate to manage an annual school construction program of up to \$187 million. Beyond this level, additional staff support would be required. Due to the bill's funding intent, the level of State funding for public school construction will average \$250 million per year over the next eight years. This will require one additional registered architect position to review local funding requests. Accordingly, general fund expenditures within MSDE would increase by \$56,500 in fiscal 2005. Future year expenditures increase to \$70,100 in fiscal 2006 and \$82,300 in fiscal 2009, which reflects annualization and inflation.

Administrative Costs – PSCP

This bill increases the responsibilities and activities of PSCP, resulting in the need for two additional staff positions, consultants, and various support services. PSCP would need one program manager and one administrative assistant to manage the development of regulations, develop PSCP procedures, provide technical assistance to local school systems, engage and monitor the work of consultants, and periodically propose revisions to regulations and procedures.

These two positions would increase general fund expenditures by \$117,300 in fiscal 2005 and by \$173,700 in fiscal 2009. In addition, the provisions relating to alternative financing and innovative building techniques will require the hiring of contractual consultants. Combined costs for these provisions total \$107,800 in fiscal 2005, \$73,600 in fiscal 2006, \$16,400 in fiscal 2007, and \$6,800 in fiscal 2008 and 2009. Exhibit 2 shows the estimated costs for PSCP.

Total

The Emergency Repair Fund must receive at least \$2 million in fiscal 2005. It is assumed that this minimum level of funding would be continued each year.

\$225,100

Eligible Costs for Relocatable Classrooms

The Governor must include \$1 million in fiscal 2006 through 2008 for public school construction in excess of the estimates of funding for public school construction contained in the fiscal 2005 through 2009 capital improvement plan for the purpose of funding the State share of the cost of purchasing relocatable classrooms.

Facilities Assessment Survey

MSDE is required to conduct periodic surveys of the condition of public school facilities in Maryland at least every four years. The surveys must be similar to the Facility Assessment Survey that MSDE conducted at the direction of the task force. The State must provide the funds necessary to conduct the survey. MSDE advises that approximately \$8 million would be needed to conduct the survey. The Department of Legislative Services advises that MSDE conducted the original survey for the task force in 2003 within existing resources. Accordingly, the cost to periodically update the survey should not reach the amount requested by MSDE and may be in the range of \$500,000 over two years.

State Funding for Public School Construction

The bill specifies that \$2 billion in State funding be provided for public school construction projects by fiscal 2013. This amount is significantly higher than the current State commitment for public school construction. The fiscal 2005-2009 capital improvement program includes \$501.6 million for the public school construction program. To meet the bill's funding level by fiscal 2013, approximately \$250.0 million in State funds would be needed annually. This is approximately \$150.0 million more than the State's commitment for each of the next four fiscal years.

To meet the funding commitment specified in the legislation, the State will have to issue \$1.2 billion in additional bonds in fiscal 2006 through fiscal 2017. Annual debt service will total \$2.4 million in fiscal 2007, increasing to \$131.5 million in fiscal 2020, and declining to \$1.5 million in fiscal 2032. Interest payments on the \$1.2 billion bond issuance would total \$641.9 million. This estimate assumes a 5.25% to 5.5% annual interest rate over a 13-year period and a phasedin issuance stream. Without a corresponding reduction in the overall State capital budget, the increased issuance of general obligation bonds for public school construction would require either a State property tax increase or a general fund appropriation to the Annuity Bond Fund. Based on the current Annuity Bond Fund forecast which assumes a stable property tax rate, the State will be required to make a \$15 million general fund appropriation in fiscal 2007 to pay existing general obligation bond debt service. The required general fund appropriation increases to \$42 million in fiscal 2008 and \$58 million in fiscal 2009. Pursuant to this legislation, the required general fund appropriation to the Annuity Bond Fund would total \$17.4 million in fiscal 2007, \$49.1 million in fiscal 2008, and \$73.9 million in fiscal 2009. Exhibit 3 shows the projected State debt service costs for the additional bond issuance in fiscal 2006 through 2010. **Appendix 2** shows the amortization table for the additional bond issuance.

Local Fiscal Effect: The bill states that it is the intent of the Governor and the General Assembly that localities provide \$1.85 billion to fund school facility needs by fiscal 2013. Local funding needs would be affected by several provisions of the bill.

State and Local Shared Cost Formula

The State and local shared cost formula is used to distribute the costs for school construction projects between the State and locality. Since the formula is wealth-equalized, the State pays a greater share of the costs for less wealthy counties. This bill requires BPW to establish a new State and local cost-share formula for each county for use beginning in fiscal 2006, consistent with the recommendations contained in the task force report. The task force recommended that the formula be based on the actual State share of the foundation program and include adjustments for the Guaranteed Tax Base program, the percentage of students in the district qualifying for free and reduced-price meals, distressed county factors, five-year enrollment growth above the State average, and a measure of prior local effort toward school construction.

The current and proposed State and local shared cost formula is shown in **Appendix 3.** Twelve local school systems would realize an increase in the State share of eligible school construction costs, while five systems would realize a decrease. Altering the shared cost formula would not affect total State funding for public school construction but would affect the amount of local funds required to match State funding.

Class Size/State Rated Capacity

PSCP uses an assumed school building capacity in evaluating requests for additional space and new schools. At the elementary school level the current SRC is 25 students per classroom for grades one to five. However, the average class size is 23 students for grades one to five. This bill lowers SRC to reflect the average class sizes in Maryland public schools. By lowering SRC from 25 to 23 students per classroom for grades one to five, local school systems would need additional classrooms at the elementary school level. For example a 20-classroom school would have an SRC of 500 students under current regulations and an SRC of 460 students under the new rating. This results in the need for two additional classrooms. The average construction cost for a new classroom is approximately \$200,000. Altering SRC would not affect total State funding for public school construction in any given year.

Aging Schools Program

The Aging Schools Program was established by Chapter 105 of 1997 to provide additional funds to jurisdictions to address the needs at their aging school facilities. The funds may be used for capital improvements, repairs, and deferred maintenance. Projects selected will protect the school building from deterioration, improve the safety of students and staff, or enhance the delivery of educational programs.

The initial funding, \$4.35 million, was established in the same legislation as the Baltimore City-State Partnership. The annual funding was increased in 1998 to \$10.37 million as part of the School Accountability and Funding for Excellence (SAFE) legislation. Funds for each jurisdiction are specified in statute. Allocations are based on each jurisdiction's proportion of square footage in the State built before 1960 (as of 1995). Each jurisdiction receives a minimum allocation. Originally set to expire in 2002, the Aging Schools Program has been extended several times by legislation.

This bill alters the allocation of the Aging Schools Program beginning in fiscal 2006 by basing funding on the current percentage of pre-1970 square footage and by retaining the \$65,000 and \$85,000 minimum allocations. Local school systems with 0.49% or less of the statewide pre-1970 square footage receive \$65,000 and local school systems with 0.50% but less than 1.0% of the statewide pre-1970 square footage receive \$85,000. **Appendix 4** compares the allocation under current law with the proposed allocation under the bill. Seven local school systems would receive more funding while nine local school systems would receive less funding.

Authorization to Issue Bonds to Fund Public School Construction

A county is authorized to issue bonds to finance the costs of construction or improvement to public school facilities and to implement transfer taxes, excise taxes, and property taxes in order to fund the local share of school construction, without obtaining General Assembly approval.

Transfer Tax Provision

Currently, 16 counties and Baltimore City impose a local transfer tax. Local transfer tax rates range from 0.2% in Allegany County to 1.5% in Baltimore City and Baltimore County. This bill extends the authority to impose a local transfer tax in the other seven counties for the purpose of paying debt service on school construction bonds. These counties are Calvert, Carroll, Cecil, Charles, Frederick, Somerset, and Wicomico.

Sales Tax Provision

Increasing the sales tax by one percentage point statewide would generate \$547.7 million in additional revenues in fiscal 2005 and \$568.1 million in fiscal 2006. This estimate reflects currently projected sales tax growth and a 1% decline in taxable sales due to the higher sales tax. Since the bill does not require each locality to impose a local sales tax, consumers could divert their sales to retailers in jurisdictions without a local sales tax.

Property Tax Provision

Local property tax rates could increase to the extent that localities issue additional bonds to finance school construction or improvement projects. Any increased property taxes would be in an amount equal to cover the required debt service amount.

Reuse of Plans and Specifications for School Construction Projects

The ownership of plans and specifications for school construction projects are governed by the terms of the contract between the local board of education and the contractor that developed the work product. Current law does not address this issue. The development of construction documents, such as architectural and engineering plans, accounts for approximately 6% of the total construction cost for a public school project. Since architectural and engineering plans are ineligible costs under the State PSCP, local school systems are required to pay the full cost to develop the plans. Local school systems frequently reuse an architectural and engineering plan for multiple school construction projects within their county.

The reuse of plans will not eliminate the planning costs for a school construction project because local school systems may need to modify the original plans to reflect site-specific characteristics, building code changes, school capacity and educational program differences, and changes to mechanical and structural systems. Due to these factors, local school systems will still need to hire an architectural and engineering firm. According to IAC, reusing a plan could reduce the total construction cost for a typical capital project by 1.5%. This represents approximately 25% of the architectural and engineering fees incurred by local school systems for a capital project.

Relocatable Classrooms

There are currently 212 classrooms in State-owned relocatable buildings, 1,833 classrooms in locally-owned relocatable buildings, and 647 classrooms in relocatable buildings that are leased by local school systems. According to PSCP, the policy that the State has followed since the inception of the program has been to fund projects that provide student capacity solutions that are more permanent than relocatable classrooms.

Relocatable classrooms range in price from approximately \$36,000 for a single classroom unit to \$63,000 for a double classroom with rest rooms. These amounts do not include the costs of installing fire alarm and protection services, electrical systems, water lines, sewer supply and connections, steps, decks, platforms, and walkways. Three-year leasing costs range from approximately \$20,000 for a single classroom unit to approximately \$30,000 for a double classroom unit. Leasing costs include some of the installation costs mentioned above. Pursuant to this bill, local school systems that use relocatable classrooms in order to provide a quicker and less expensive solution to school capacity problems could receive additional funds from the State.

Alternative Financing Methods

In alternative financing, a government entity does not issue its own debt; instead, a private party serves as an intermediary and secures financing. Typically, the government entity repays the cost of financing through its operating budget. The principal types of alternative financing are lease-leaseback, sale-leaseback, performance-based contracting, and public-private partnerships.

The task force found that traditional municipal bond financing is the least expensive and most efficient financing method available for public school construction. Alternative methods may be desirable when the financial benefits of completing a project quickly outweigh the additional cost over time or when a limited project scope warrants a performance-based contracting approach.

Small Business Effect: Assuming the State complies with the intent of this legislation, State funding for public school construction would increase by \$150 million annually. This will have a positive impact on architectural, engineering, construction, and service firms throughout Maryland. As of calendar 2002, there were 17,000 construction firms in Maryland employing 165,725 individuals. Construction workers earned a total of \$6.8 billion in wages which average to approximately \$800 per week. The construction industry accounts for approximately 7% of total employment in Maryland. In addition, there are 5,750 licensed architects and 13,500 professional engineers in Maryland. However, the potential benefit for architectural and engineering firms could be mitigated from the loss in revenue due to the reuse of plans and specifications for multiple projects.
