Message from the Superintendent

I am pleased to present the latest edition of the **Baltimore County Public Schools Achievement Report.** ***Each year, through this report, we hold ourselves accountable and measure our progress against standards we established 10 years ago in our*** **Blueprint for Progress.**

These standards are even more stringent and comprehensive than those mandated by the federal government. They reflect our belief that all children can learn and excel and our commitment to ensuring that every child receives a rigorous and relevant quality education.

This year's report reveals that we continue to achieve what all school systems strive for – sustained progress in advancing student achievement – for the student population as a whole and for student groups based on race/ethnicity, gender, language, socio-economic status, and learning challenges. The report covers topics related to student progress, ranging from enrollment to rigorous course participation to results on statewide and national tests. Beyond the numbers, the document provides context to assist the reader in reviewing and interpreting results.

At Baltimore County Public Schools, we understand that our goal is to ensure that students learn, and assessments help us confirm that learning has taken place. Data informs our work, facilitating the ability of teachers and principals to make effective instructional decisions.

This report represents our progress and allows our students, families, and the community to monitor and support the high-quality education we provide.

Dr. Joe A. Hairston

Executive Summary

Enrollment – The number of students in Baltimore County Public Schools decreased 4.0% over the last five years from 2005 through 2009, with a one-year decline from 2008 to 2009 of 1.1%. In 2009, 48.7% of BCPS students were White, 40.3% were African American, 5.8% were Asian, 4.7% were Hispanic, and 0.5% were American Indian. Over five years, the proportion of minority students increased from 46.0% to 51.3%, and in 2009, 78.6% of minority students were African American.

From 2005 through 2009, the number of English Language Learners (ELL) increased 51.9%, and ELL students as a proportion of the student population increased from 2.0% to 3.2%. The number of special education students decreased 18.3%, and special education students as a proportion of the student population decreased from 13.6% to 11.6%. The number of students eligible for Free and Reduced Price Meals (FARMS) increased 20.9% from 2005 to 2009. In 2009, 63.1% of Hispanic students, 57.9% of American Indian students, 58.0% of African American students, 31.4% of Asian students, and 23.8% of White students were FARMS-eligible.

Attendance – The 2009 attendance rate for BCPS students was 94.3%, which is stable from the previous year's attendance rate. The attendance rate for Asian students was 96.4%, the rate for White students was 94.5%, the rate for Hispanic students was 93.5%, the rate for African American students was 93.8% (a 0.1 percentage point increase from 2008), and the rate for American Indian students was 92.7%. Attendance rates were higher for females than males for African American, White, Asian, and Hispanic students. The rates were the same for females and males among American Indian students.
The 2009 attendance rate for elementary school students was 95.8%. The 2009 attendance rate for middle school students was 95.0%. The 2009 attendance rate for high school students was 92.2%, down 0.9 percentage points from the 2005 rate of 93.1%. The 2009 high school attendance rate for Asian students was 95.6%. For White high school students, the attendance rate was 93.1%. The rate for Hispanic students was 89.7%. The rate for American Indian students was 88.4%, and the rate for African American students was 90.8%.

Maryland School Assessment (MSA) – The BCPS 2009 MSA results for both reading and mathematics showed the highest percent of reading proficient students in Grade 5 with a reading proficiency level of 90.3% and the highest math proficiency in Grade 4 with a level of 90.1%. Math proficiency levels declined gradually in each grade level from Grades 4 through 8. Students in Grade 8 performed lower than students at subsequent grade levels on the Mathematics MSA. At all grades, the percent of students proficient in reading and mathematics were greater for Asian and White students than for African American, Hispanic, and Indian students.

In 2009, the overall proficiency level of Grade 4 students in reading was 86.9%, while the level for ELL students in Grade 4 was 65.7%, the level for special education students was 67.3%, and the level for FARMS-eligible students was 79.4%.

The overall level of Grade 8 students proficient in reading was 82.1% proficient, while the level for ELL students was 38.7% proficient, the level for special education students was 46.1% proficient, and the level for FARMS-eligible students was 73.7% proficient. The overall level of Grade 8 students proficient in mathematics was 65.8%, the level for ELL students was 47.3%, the level for special education students was 33.2%, and the level for FARMS-eligible students was 50.1%. All subgroups made gains in proficiency as compared with the 2008 results.

High School Assessment (HSA) – For the 2009 school year, of the number of HSA tests taken by BCPS students, the passing rate was 47.7% for English, 47.7% for Government, 50.0% for Biology, and 44.0% for Algebra/Data Analysis.
For the Class of 2009, 98.5% of the diploma-bound students have met the HSA graduation requirement, with 72.1% passing all four HSAs and an additional 19.5% meeting the combined score option, 6.4% completing a Bridge Plan, and 0.5% having a waiver. Among diploma-bound members of the Class of 2009, 99.1% of White students, 99.4% of Asian students, 98.4% of Hispanic students, 97.6% of African American students, and 96.7% of American Indian students have met the HSA requirements for graduation. Within the Class of 2009, 83.3% of diploma-bound ELL students, 91.4% of diploma-bound special education students, and 97.2% of diploma-bound FARMS-eligible students have met the HSA graduation requirements. Among those, 11.1% of ELL students, 41.6% of special education students, and 26.7% of FARMS-eligible students met the requirement through the combined score option.

PSAT – The 2009 PSAT participation rate of 84.5% is a decline of 2.3 percentage points from the rate of 86.8% in 2005, although this rate is higher than the previous year's participation rate of 83.8%. There was a decline in BCPS students' PSAT composite scores over the five-year period from 2005 through 2009 for 10th grade students, but a stable trend for 11th grade students. The mean Grade 10 composite score was 122 in 2005 and 117 in 2009. The mean composite score for Grade 11 was 134 in 2005 and in 2009.

For Grade 11 students in 2009, the mean composite score was 139 for American Indian students, 142 for Asian students, 117 for African American students, 142 for White students, and 121 for Hispanic students. The Grade 11 composite score for FARMS-eligible students was 116 in 2005 and 115 in 2009, while the Grade 11 composite score for non-FARMS-eligible students was 137 in 2005 and 139 in 2009.
Starting in 2006, BCPS paid for all Grade 9 students to take the PSAT, and the participation rate for Grade 9 students was 84.7%, 45.7 percentage points above the 2005 participation rate of 39.0%. Not unexpectedly, scores decreased with the expanded pool of students between 2005 when the composite was 129 and 2007 when the composite was 108. In subsequent years, however, the composite was maintained at 108.

SAT – In the years between 2004 and 2008, SAT participation had increased. However, in 2009, participation declined from 55.7% in 2008, to the current rate of 49.1%. In 2009, the mean SAT critical reading score was 497, a decrease of 19 points from the 2005 score of 516. The 2009 mean mathematics score was 502, a decrease of 14 points from the 2005 score of 516.

The 2009 participation rate was 36.1% for American Indian students, 75.1% for Asian students, 47.6% for African American students, 48.6% for White students, and 37.4% for Hispanic students. The participation gap between African American and White students narrowed from 9.6 percentage points in 2005 to 2.0 percentage points in 2009. Asian students continued to lead in participation rate, while White students continued to have the largest number of test takers.
The mean critical reading scores were 458 for American Indian students, 519 for Asian students, 426 for African American students, 541 for White students, and 493 for Hispanic students. Mathematics scores were 424 for American Indian students, 568 for Asian students, 414 for African American students, 554 for White students, and 482 for Hispanic students.

During the five year period from 2005 to 2008, the SAT participation rate for FARMS-eligible students dropped by 5.7 percentage points, from 36.5% to 30.8%. During the five years the number of non-FARMS-eligible students enrolled in Grade 12 declined by about 13%, and their 2009 SAT participation rate was 2.0 percentage points lower than in 2005. From 2005 to 2009, SAT critical reading scores declined for FARMS-eligible and non-FARMS-eligible students; the former by two points (429 to 427) and the latter by six points (517 to 511). Similarly, mathematics scores dropped for FARMS-eligible students by 5 points (433 to 428) and by seven points (525 to 518) for non-FARMS-eligible students. In 2009, non-FARMS-eligible students outscored FARMS-eligible students by 84 points in critical reading and by 90 points in mathematics.

In 2009, the SAT participation rate of special education students was 11.2%, a decrease of 1.1 percentage points compared with 2005, and a 3.3 percentage point decrease since 2008, when special education students' participation rate was highest since 2004. The 2009 critical reading score was 377, down 53 points from the 2005 score of 430. Likewise, the mathematics score declined by 35 points from 410 in 2005 to 375 in 2009. Compared to 2008, critical reading score increased by two points and mathematics score increased by two points.

Advanced Placement Tests – BCPS student participation in the Advanced Placement Testing program has increased considerably over the five years from 2005 to 2009. The number of students taking one or more Advanced Placement tests increased 33.6%, from 3,269 to 4,367. During that time period, on average, two AP tests were taken per student, virtually unchanged from 2005 through 2009.

From 2005 to 2009, Asian, African American, and Hispanic student participation rates increased, White student AP test participation rate decreased, and American Indian AP test participation rate remained the same. In 2009, the respective pass rates were 75.9% for American Indian students (up 23.0 percentage points from 2004), 71.8% for Asian students (down 1.5 percentage points), 41.1% for African American students (up 2.4 percentage points), 74.1% for White students (down 1.2 percentage points), and 62.1% for Hispanic students (down less than one percentage point). African American students were 33 percentage points behind their White peers. This represents a 6.3 percentage point reduction in the achievement gap between African American and White students.

From 2005 to 2009, the number of FARMS-eligible students taking an AP test almost tripled, from 345 to 929. The number of tests taken per student was close to 1.7 over the five years. The passing rate, however, for FARMS-eligible students declined from 45.2% in 2005 to 41.3% in

2009. Non-FARMS-eligible students had a passing rate of 71.6% in 2009. In 2009, 19 special education students took 28 AP tests, with a passing rate of 50%. This was a little lower than in 2005 where 22 special education students took 33 Advanced Placement tests, with a passing rate of 66.7%. In 2009, one ELL student took and did not pass four Advanced Placement tests. Over the five years, at most four ELL students took AP tests during any one year.

Highly Rigorous Course Participation – In 2009, 23.4% of BCPS elementary school students were enrolled in GT courses, compared with 21.2% in 2005, an increase of 2.2 percentage points. Over the five years, the actual number of GT elementary school students increased by 6.1%, from 4,983 in 2005 to 5,288 in 2009. The elementary enrollment, however, decreased by 4.2% for the same time period. The percentage of students enrolled in GT courses increased for all racial groups between 2005 and 2009.

In 2009, 48.5% of BCPS middle and high school students were enrolled in highly rigorous courses, compared with 42.1% in 2005. The number of secondary students enrolled in highly rigorous courses increased by 7.2% over the five years, from 24,646 in 2005 to 26,426 in 2009, while the secondary enrollment decreased during the same time period by 6.9%, from 58,599 to 54,533. In secondary schools in 2009, 61.7% of Asian students, 57.3% of White students, 37.3% of African American students, 34.6% of Hispanic students, and 36.1% of American Indian students were enrolled in highly rigorous courses. Overall in 2009, 43.7% of secondary school males and 53.3% of secondary school females were enrolled in highly rigorous courses.

Over the five year period from 2005 to 2009, enrollment in highly rigorous courses increased for FARMS-eligible secondary students and special education students, but declined for ELL students. In 2005, 21.9% of FARM-eligible secondary students, 8.1% of special education secondary students, and 8.8% of ELL secondary students were enrolled in highly rigorous courses. While in 2009, 30.4% of FARMS-eligible secondary students, 10.4% of special education students, and 4.8% of ELL students were in highly rigorous courses. The 30.4% enrollment of secondary FARMS-eligible students in highly rigorous courses is more than twenty percentage points lower compared with the 58.1% enrollment of non-FARMS eligible students.

Dropout Rates – After decreasing from 4.4% in 2005 to 3.4% in 2007, the BCPS high school dropout rate increased to 4.3% in 2008, but decreased in 2009 to 3.7%. The 2009 dropout rate differed by racial group. The rate was 1.6% for Asian students, 3.3% for Hispanic students, 4.0% for African American students, 3.7% for White students, and 9.0% for American Indian students.

Graduation Rates – In 2009, the graduation rate was 83.7%, 1.8 percentage points higher than the rate of 81.9% for the Class of 2008. Graduation rates increased for all groups from 2008 to 2009. The graduation rate for Asian students was 92.8%, the rate for White students was 84.6%, the rate for Hispanic students was 82.8%, the rate for African American students was 81.6%, and the rate for American Indian students was 75.0%. Graduation rates for male and female students

differed. In 2009, the female graduation rate was 87.3%, while the male graduation rate was 80.2%, a difference of 7.1 percentage points.

Suspensions and Expulsions – In 2009, the percentage of BCPS students suspended (including expulsions) was 11.63%, an increase of less than one percentage point from 2008. Despite decreased enrollment, the total number of incidents increased by 7.8% from 21,163 in 2008 to 22,810 in 2009.

Suspension rates differed among races. In 2009, the suspension rate was 3.18% for Asian Students, 7.57% for White students, 7.83% for Hispanic students, 12.83% for American Indian students, and 18.15% for African American students. For American Indian, White, and Hispanic students, the suspension rate was lower in 2009 than it was in 2008, and for Asian and African American students, the suspension rate was higher in 2009 than it was in 2008. The suspension rate increased for both genders from 2008 to 2009, with the suspension rate for males nearly twice as high as that for females, a longtime trend. In 2009, the suspension rate was 15.12% for males (up from 14.64% in 2008) and 7.97% for females (up from 7.33% in 2008).

Overall, the suspension rate for FARMS-eligible students was about twice that of the rate for non-FARM-eligible students. In 2009, the rate for FARMS-eligible students was 16.93% while the rate for non-FARMS-eligible students was 8.38%. In 2009, the suspension rate for special education students was 18.66%. The 2009 suspension rate for ELL students was 3.96%. For the two largest groups of ELL students, Asian ELL students had a suspension rate of 2.82%, and Hispanic ELL students had a suspension rate of 3.40%. The rate for White ELL students was 4.87% and African American ELL students had a suspension rate of 8.52%.

While the 2009 suspensions-including-expulsions rate was 11.63% of enrollment, the expulsions rate was 0.46% of enrollment, significantly lower than that of 2008, which was 0.58%. During the five-year period from 2005 to 2009, the expulsions rate decreased from 1.04% to 0.46%. The expulsion rate for each subgroup also decreased from 2005 to 2009. For African American students the rate from 2005 to 2009 went from 1.65% to 0.81%, from 0.68% to 0.22% for White students, from 0.64% to 0.24% for Hispanic students, from 0.24% to 0.15% for Asian students, and from 1.70% to 0.00% for American Indian students.

The rate of expulsions for both genders went down 2005 to 2009. In 2009, the rate of expulsions for males was 0.66%, slightly higher than that of females which was 0.25%.
The expulsions rate for special education students in 2009 was 0.80%, down from 1.13% in 2008. The expulsion rate for ELL students in 2009 was 0.00%. The expulsions rate for FARMS-eligible students in 2009 was 0.72%, compared with 0.29% for non-FARMS-eligible students.

Enrollment

Enrollment

The number of students enrolled in the Baltimore County Public Schools as of September 30 is the basis for data in the Enrollment section of the 2009 Achievement Report. In some sections, the basis for data is End-of-Year (EOY) enrollment (enrollment on the last day of school) or Aggregate enrollment (the number of students enrolled for one or more days in a school year).

Enrollment Changes Over Five Years – Baltimore County Public Schools (BCPS) enrollment went from 108,001 students in 2004-2005 (hereafter, 2005) to 103,643 students in 2008-2009 (hereafter, 2009) for a decrease in enrollment over five years of 4.0%. The year-to-year enrollment change was -0.6% from 2005 to 2006, -1.1% from 2006 to 2007, -1.4% from 2007 to 2008, and -1.1% from 2008 to 2009.

Over five years, the changes in enrollment have varied across areas within the district. Decreases occurred in all areas as follows: Southwest (4.4%), Northwest (6.0%), Central (0.4%), Northeast (2.8%), and Southeast (6.2%).

Enrollment Distribution Across Grades – Enrollment was unevenly distributed across the grades. In 2009, the average number of BCPS students enrolled in each grade for Grades 1 through 12 was 7,706. Preschool enrollment was about half the size of the average enrollment at 3,830 students. Kindergarten enrollment was very similar to the number of students enrolled in Grade 1, with 218 fewer students enrolled in Kindergarten than in Grade 1. For Grades 1 through 7, each grade's enrollment was lower than the school system average; while in each grade 8 through 12, there were more students enrolled than the system average. In previous years, the enrollment was lower than the average for all Elementary and higher than the average for all Secondary schools. In 2009, Grade 7 shifted below the county average.

The average enrollment in BCPS high schools for the 2009 school year was 8,112 students. The variability of enrollment between all grades in secondary schools in BCPS was smaller than the previous year. The differences in enrollment for all secondary grades were minimal with variations from the mean of 8,112 for all classes less than 537 students.

Racial Groups – In 2009, 48.7% of BCPS students were White, 40.3% were African American, 5.8% were Asian, 4.7% were Hispanic, and 0.5% were American Indian. From 2005 through 2009, the number of Hispanic students increased by 58.3%, the number of Asian students increased by 23.2% percent, and the number of African American students increased by 1.6%. The number of American Indian students decreased by 7.6%, and the number of White students decreased by 13.5%. Over the five-year period, White students as a proportion of the student population decreased from 54.0% to 48.7%, while non-White students as a proportion of the student population increased from 46.0% to 51.3%. In 2009, 78.6% of non-White students were African American.

In 2009, there was great variation across grade levels in the proportion of students among racial groups. While the proportion of American Indian students in the population remains stable at

around 0.5% throughout the grade levels, the proportions change for other students. For African American students in preschool, their proportion within the population of preschoolers is 39.3%. This percentage increases to 41.2% in Grade 7 and to 43.4% in Grade 9. By Grade 12, the proportion of African American students decreases to 37.3%, indicating departure from the student population at some point between Grade 9 and Grade 12. Similar patterns are found among Hispanic and Asian students. Over five years, the proportion of non-White students increased in all areas, as follows: Southwest (+3.3%), Northwest (+5.2%), Central (+3.7%), Northeast (+9.7%) and Southeast (+5.4%). The proportions of White students increased from preschool through Grade 12 in 2009.

Gender Balance – In 2009, the proportion of males among BCPS students was slightly more than females. The proportion of males in the total population was 51.2%. Among grades 1 through 6, males were 51.6% and among grades 7 through 12, males were 50.6%. Except for American Indian students, there were more males than females in each racial group. In 2009, males made up 48.6% of the American Indian student population. For African American students, the percentage of male students was 50.9%, for Asian students 51.2%, for White students 51.5%, and for Hispanic students 52.0%.

ELL Students – The number of BCPS students who were English Language Learners (ELL) increased 51.9% over the five-year period from 2005 through 2009, and ELL students as a proportion of the student population increased from 2.0% to 3.2%. In 2009, the percentage of ELL students that were Hispanic was 40.5%, while 36.7% were Asian, 0.5% were American Indian, 12.0% were African American, and 10.2% were White. Overall, 54.0% of ELL students were male.

In 2009, 14.6% of all ELL students were in preschool and 28.5% of ELL students were in either Kindergarten or Grade 1. This shows that the preponderance of ELL students were in the early elementary grades. In the two largest ELL populations (Hispanic and Asian) the percentage as a proportion of the ELL population remains disproportionate even as they progress through the grade levels. The percentage of ELL students in Grade 1 who were Hispanic was 39.9%. It was 31.9% in Grade 6, and 39.7% in Grade 11 and 39.5% in Grade 12. The percentage of ELL students who were Asian was 36.4% in Grade 1, 41.5% in Grade 6, 32.3% in Grade 11 and 31.5% in Grade 12.

Special Education Students – The number of BCPS special education students decreased 18.3% over the five-year period from 2005 through 2009, and special education students as a proportion of the student population decreased from 13.6% to 11.6%. In 2009, 11.9% of White students and 12.5% of African American students were special education students, as was 10.5% of American Indian students, 8.2% of Hispanic students, and 5.5% of Asian students. Overall, 68.2% of special education students were male, and the proportion of males was similar across racial groups.

FARMS-Eligible Students – The proportion of BCPS students eligible for Free and Reduced Price Meal Services (FARMS) increased 8.2 percentage points from 31.8% of enrollment in 2005 to 40.0% in 2009. This is the outcome of a 20.9% growth in the number of FARMS-eligible students (from 34,327 in 2005 to 41,498 in 2009) in the face of declining enrollment in the BCPS system over the same five year period. In 2009, 63.1% of Hispanic students, 57.9% of American Indian students, 58.0% of African American students, 31..4% of Asian students, and 23.8% of White students were FARMS-eligible.

From 2005 through 2009, the number of FARMS-eligible Hispanic students doubled, from 1,541 in 2005 to 3,069 in 2009. The number of FARMS-eligible Asian students increased by 50% over the five year period; the number of FARMS-eligible African American students increased by 18.9%; the number of FARMS-eligible American Indian students increased by 16.7% and the number of FARMS-eligible White students increased by 10.3%. Nationally, the percentage of FARMS-eligible elementary school students is considerably greater than the percentage of FARMS-eligible secondary school students, largely attributed to a lesser rate of documentation return among older students, and also affected by a higher dropout rate among students from low-income families. In 2009, among White students, 26.8% in Grades 1through 6, 24.4% in Grade 9, and 14.9% in Grades 11 and 12 were FARMS-eligible. Among African American students, 63.4% in Grades 1 through 6, 55.5% in Grade 9, and 47.6% in Grades 11 and 12 were FARMS-eligible.

In 2009, the proportion of FARMS-eligible students was 57.8% in the Southeast area, 49.9% in the Southwest area, 39.7% in the Northwest area, 38.5% in the Northeast area, and 18.7% in the Central area. Over five years, the proportion of FARMS-eligible students increased in all areas, as follows: Southwest (+9.6%), Northwest (+9.6%), Central (+3.1%), Northeast (+9.7%) and Southeast (+9.2%).

Attendance

Attendance

Starting with the 2004-2005 school year, the BCPS average daily attendance rate has been based on the number of enrolled students who are in school each day through March 15. In prior years, attendance data covered the school year through June.

Attendance – In 2009, the attendance rate for BCPS students was 94.3%. This percentage remains stable from the previous year's attendance rate of 94.3%. The attendance rate for Asian students was 96.4%, the rate for White students was 94.5%, the rate for Hispanic students was 93.5%, the rate for American Indian students was 92.7%, and the rate for African American students was 93.8% (a .1 percentage point increase from 2008). Attendance rates were higher for females than males for African American (.1%), Asian (.3%), Hispanic (.1%) and White (.1%) students. The rates were the same for females and males among American Indian students.

The 2009 attendance rate for elementary school students was 95.8%, an increase of one tenth of a percentage point from the 2008 rate of 95.7%. The 2009 elementary school attendance rate for Asian students was 96.8%, the rate for White students was 95.7%, the rate for African American students was 95.7%, the rate for Hispanic students was 95.3%, and the rate for American Indian students was 95.6%, an increase over 2008 of less than one percentage point. Elementary school attendance rates were less than one percentage point higher for females than for males for both American Indian and Asian students. Attendance rates were .1 percentage point higher for males than for females among Hispanic students. Attendance rates stayed the same for African American and White students.

The 2009 attendance rate for middle school students was 95.0%. The 2009 middle school attendance rate for Asian students was 97.1%, the rate for African American students was 94.9, for White students was 94.8%, for Hispanic students was 94.6%, and the rate for American Indian students was 93.6%. Middle school attendance rates were higher for females than males among African American, Asian, and White students, while the attendance rates were higher for males than females among Hispanic students. Attendance rates were the same for both males and females among American Indian Students.

The 2009 attendance rate for high school students was 92.2%, down 0.9 percentage points from the 2005 rate of 93.1%. The 2009 high school attendance rate for African American students was 90.8%, the attendance rate for Asian students was 95.6%, and the attendance rate for White students was 93.1%. The rate for Hispanic students was 89.7%, down 1.0 percentage point from 2008. The rate for American Indian students was 88.4%, also down 1.0 percentage point from 2008. High school attendance rates were higher for females than males for African American (.2%) and Asian (.4%) students, while the attendance rate was higher for males than females for American Indian (.1%) and Hispanic (.1%) students. The attendance rate was the same among males and females for White students.

ELL and Special Education Students – In 2009, Hispanic and Asian students accounted for the majority (77.3%) of the 3,285 ELL students in BCPS. In 2009, ELL elementary, middle and high school attendance rates for Asian and Hispanic ELL students were similar to attendance rates for the total population of Asian and Hispanic students.

In 2009, special education student attendance rates in elementary school were slightly lower than the BCPS elementary rate for all subgroups. Special education student attendance rates in middle school were 93.1%, 1.9 percentage points lower than the BCPS middle school rate of 95.0%. The rates for American Indian special education students were 3.3 percentage points lower than the total population of American Indian students. The rates were 2.0 percentage points lower for African American students, 1.7 percentage points lower for White students, 1.8 percentage points lower for Asian students, and 1.8 percentage points lower for Hispanic students.

Special education student attendance rates in high school were 2.2 percentage points lower than the overall population of high school students. The attendance rates for Hispanic special education students was 88.2%, 1.5 percentage points lower than the overall population of Hispanic high school students. The rates were 1.4 points lower for African American special education students, 3.5 points lower for White special education students, and 4.1 percentage points lower for Asian special education students. The attendance rates for American Indian special education students in high school was 1.9 percentage points higher than the attendance rates for American Indian high school students.

FARMS-Eligible Students – In 2009, FARMS-eligible student attendance rates in elementary school were slightly lower in all racial categories than for non-FARMS-eligible students in the same categories. For Asian students who were FARMS-eligible, the attendance rate was less than one percentage point lower than that of non-FARMS-eligible students; for African American students the difference was 1.3 percentage points; for American Indian students the difference was less than one percentage point; for White students the difference was 1.8 percentage points; and for Hispanic students the difference was less than one percentage point.

Attendance rates in middle school were 1.8 percentage points lower for FARMS-eligible African American students than for non-FARMS-eligible African American students. The rates for Asian students were lower by .8 percentage points, for Hispanic students by 1.0 percentage point, for White students by 3.2 percentage points, and for American Indian students by 4.3 percentage points.

FARMS-eligible student attendance rates in high school were lower than the rate for non-FARMS-eligible students for all race subgroups. For African American students who were FARMS-eligible, the attendance rate was 1.6 percentage points lower than African American students who were non-FARMS-eligible. For Asian students, the difference was 2.3 percentage points, for White students the difference was 5.0 percentage points, for Hispanic students the difference was 1.8 percentage points, and for American Indian students the difference was 4.2 percentage points.

Maryland School Assessment (MSA) Performance

Maryland School Assessment Performance

The Maryland School Assessment (MSA) is a test of reading and math achievement that meets the testing requirements of the federal No Child Left Behind Act. The MSA is given each year in early March in reading and math at grades three through eight. Each student's performance is graded as Basic, Proficient, or Advanced. Basic is the lowest level of performance and below the standards set for all students. Proficient is the middle level, and Advanced is the highest level. The goal is to have all students perform at the Proficient or Advanced level. MSA results for each grade are reported as a percentage of students scoring Basic or Proficient. The Proficient level combines those students that scored either Proficient or Advanced on the MSA. The MSA scores show how well students learned the reading and mathematics skills in the Maryland State Curriculum.

Overview of MSA Results – The 2009 Maryland School Assessment results for both reading and mathematics showed the highest percent of reading proficient students in Grade 5 with a reading proficiency level of 90.3% and the highest math proficiency in Grade 4 with a level of 90.1%. Reading proficiency levels by grade were 87.5% in Grade 3, 86.9% in Grade 4, 90.3% in Grade 5, 81.8% in Grade 6, 80.8% in Grade 7, and 82.1% in Grade 8. Mathematics proficiency levels by grade were 85.8% in Grade 3, 90.1% in Grade 4, 80.8% in Grade 5, 72.2% in Grade 6, 73.1% in Grade 7, and 65.8% in Grade 8. Students in Grade 7 showed the lowest achievement on the MSA reading, but students in Grade 8 had the lowest percentages in math. In 2009, students in Grades 3, 4, and 5 demonstrated a closer range of achievement in reading with variability of less than 4.0 percentage points. Math scores over the same period and in the same grades revealed a range of less than 10.0 percentage points.

Five-year Changes in Percent of Proficient Students – This analysis considers changes in MSA scores over the five-year period from 2005 through 2009. This format facilitates the analysis of performance over time, so that every grade can be compared for the same period. Over the five year period in grades three through eight, the average increase in percent proficient in reading was 8.6 percentage points. In mathematics, the average increase in proficiency levels for students in grades three through eight was 12.6 percentage points. The five-year reading gains ranged from 0.0 percentage points in Grade 4 to 12.8 percentage points in Grade 8. In math, the five-year gains ranged from 7.6 percentage points in Grade 3 to 15.2 percentage points in Grade 7. All grades except Grade 3 made double-digit percentage point growth in math.

Grade 4 Proficiency Levels by Subgroup – In 2009, Grade 4 results for reading showed Asians at 95.1% proficient, Whites at 92.6% proficient, African Americans at 80.5% proficient, American Indians at 90.6% proficient, and Hispanics at 79.9% proficient. Grade 4 results for mathematics showed Asians at 97.3% proficient, Whites at 95.1% proficient, African Americans at 84.0% proficient, American Indians at 90.6% proficient, and Hispanics at 88.6% proficient. There was an increase in reading from 2005 to 2009 of 1.4 percentage points for African American students the same amount as for White students. There was an increase in mathematics of 18.6 percentage points for African American students compared with a 9.6 percentage point increase for White students.

In 2009, the percent of Grade 4 students scoring proficient in reading was 5.6 percentage points higher for females than males. In mathematics, the gender differences were less pronounced with the discrepancy in scores between males and females only 1.8 percentage points in favor of females.

In 2009, the overall proficiency level of Grade 4 students in reading was 86.9%, while the level for ELL students was 65.7%, the level for special education students was 67.3%, and the level for FARMS eligible students was 79.4%.

Grade 8 Proficiency Levels by Subgroup – In 2009, Grade 8 results for reading showed proficiency levels of Asians at 88.6%, Whites at 86.8%, American Indians at 80.6%, Hispanic students at 79.9% and African Americans at 76.4%. Results for mathematics showed a higher percent of proficient students among Asians at 88.1% and Whites at 76.7%, than American Indians at 50.0%, Hispanics at 58.0%, and African Americans at 51.0%. The change over five years in Grade 8 MSA results for reading showed an increase of 21.7 percentage points for African Americans and a reading increase of 7.4 percentage points for White students. The pattern for mathematics over the five year period showed that African American students increased mathematics scores on the MSA by 17.6 percentage points. White students increased MSA mathematics scores over the same period of time by 11.6 percentage points.

In 2009, the percent of proficient Grade 8 students was 8.8 percentage points higher in reading and 3.3 percentage points higher in mathematics for females than males. Females outperformed males for African American and White students.

The overall level of Grade 8 students proficient in reading was 82.1% proficient, while the level for ELL students was 38.7% proficient, the level for special education students was 46.1% proficient, and the level for FARMS-eligible students was 73.7% proficient. The overall level of Grade 8 students proficient in mathematics was 65.8%, the level for ELL students was 47.3%, the level for special education students was 33.2%, and the level for FARMS-eligible students was 50.1%. All subgroups made gains in proficiency as compared with the 2008 results.

High School Assessment (HSA) Performance

High School Assessment (HSA) Performance

The Maryland High School Assessments are four end-of-course exams that all students who entered 9th Grade in or after 2005 must take and pass in order to graduate with a high school diploma. The four exams include one each in Algebra/Data Analysis, Biology, Government, and English. All students, including middle school students taking high school level courses, must take the High School Assessment after they complete the appropriate course. All students receive a score for each test they take. Students may meet the HSA requirements by passing each exam separately or a combined score option across all exams.

Baltimore County 2009 HSA Results – High School Assessments are Maryland-mandated tests in English, Government, Biology, and Algebra/Data Analysis. The passing rate for the HSA is based on the number of tests taken and passed by all students taking each test. For the 2009 High School Assessment (HSA), the passing rate was 47.7% for English; 47.7% for Government; 50.0% for Biology; and 44.0% for Algebra/Data Analysis.

English – For the English HSA, White students at 60.5% and Asian students at 63.1% had higher passing rates than African American students at 36.1%, American Indian students at 49.2%, and Hispanic students at 37.2%. The passing rate for female students was 9.2 percentage points higher than for males. The gender gap revealed that White females outscored their male counterparts by 8.3 percentage points in English. African American females outscored their male counterparts 11.1 percentage points on the HSA English exam.

The English HSA overall passing rate was 47.7%, while the rate for ELL students was 11.1% ; the rate for special education students was 14.8%, and the rate for FARMS-eligible students was 34.3%. The passing rate for FARMS-eligible students was 22.2 percentage points lower than non-FARMS-eligible students.

Government – A summary of the Government HSA performance shows that Asians at 72.1% and Whites at 61.1% had higher passing rates among all subgroups. African American students at 35.7%; American Indian students at 42.9% and Hispanic students at 45.7% had lower passing rates than Whites and Asians. The passing rate for females was 1.2 percentage points higher than for males. The gender trend was maintained for White females who earned 0.4 percentage points more on the Government HSA than their male counterparts. African American females outperformed their male cohorts by 2.6 percentage points on the Government portion of the HSA exams.

The Government HSA overall passing rate was 47.7%, while the rate for ELL students was 35.8%. The passing rate for special education students was lower at 19.4%. The HSA passing rate for FARMS-eligible students was 34.5%. The passing rate for FARMS-eligible students was 22.9 percentage points lower than non-FARMS-eligible students.

Biology – For the Biology HSA, White students at 66.2% and Asian students at 70.9% had higher scores than African American students at 36.0%, American Indian students at 38.1% and

Hispanic students at 47.0%. The passing rate for females was 2.6 percentage points *lower* than for males. White males exceeded their female counterparts by 2.5 percentage points while African American males outperformed their female cohorts by 2.1 percentage points.

The Biology HSA overall passing rate was 50.0%, while the rate for ELL students was 24.6%. The Biology pass rate for special education students was 21.1% while the rate for FARMS-eligible students was 45.2%. The passing rate for FARMS-eligible students was 20.2 percentage points lower than non-FARMS-eligible students.

Algebra/Data Analysis – An examination of the Algebra/Data Analysis HSA scores shows that Asian students at 71.9% and White students at 59.4% had a higher passing rate than African American students at 32.0%, American Indian students at 42.7%, and Hispanic students at 39.0%. The overall passing rate for females was 2.4 percentage points higher than for males. The passing rate for White females was a slight 1.4 percentage points higher than their male counterparts. African American females outscored their male counterparts by 3.8 percentage points on the Algebra/Data Analysis portion of the HSA.

The Algebra/Data Analysis HSA overall passing rate was 44.0%, while the rate for ELL students was 25.8%. The pass rate for special education students was 13.9%, and the success rate for FARMS-eligible students was 32.8%. The passing rate for FARMS-eligible students was 29.8 percentage points lower than non-FARMS-eligible students.

Class of 2009 – The Class of 2009 represents the first student group that must pass all four HSA exams or some alternative measure to meet Maryland graduation requirement for a high school diploma. During the 2009 school year, a student could meet the HSA requirements for a Maryland high school diploma by earning a passing score on all four exams or combined scores of 1,602 from the four exams. The school year ending in 2009 was this group's senior year, when students have completed the course that precedes each High School Assessment. Among diploma-bound members of the Class of 2009, 92.7% passed the Government HSA, 87.8% passed the Algebra/Data Analysis HSA, 85.0% passed the Biology HSA, and 85.6% passed the English HSA.

For the Class of 2009, 98.5% of the diploma-bound students have met the HSA graduation requirement, with 72.1% percent passing all four HSAs and an additional 19.5% meeting the combined score option, 6.4% completing a Bridge Plan, and 0.5% having a waiver. Among diploma-bound members of the Class of 2009, 99.1% of White students, 99.4% of Asian students, 98.4% of Hispanic students, 97.6% of African American students, and 96.7% of American Indian students have met the HSA requirements for graduation. Among those who met the HSA requirement for graduation, 14.0% of White students and 28.4% of African American students met the requirement through the combined score option.

Within the Class of 2009, 83.3% of diploma-bound ELL students, 91.4% of diploma-bound special education students, and 97.2% of diploma-bound FARMS-eligible students have met the HSA graduation requirements. Among those, 11.1% of ELL students, 41.6% of special education students, and 26.7% of FARMS-eligible students met the requirement through the combined score option.

PSAT Participation and Performance

PSAT Participation and Performance

The preliminary SAT is a multiple choice standardized test administered by the College Board and the National Merit Scholarship Corporation. The PSAT has three sections, Critical Reading, Mathematics, and Writing, each scored on a scale of 20 to 80 points for a possible maximum composite score of 240 points. Students take the PSAT for experience with SAT-type tests and to receive feedback on strengths and weaknesses on skills necessary for college study. In addition, a test taker's high score is entered in competition for scholarships from the National Merit Scholarship Corporation. Test takers scoring in the state's 99th percentile are designated as National Merit Scholarship Semifinalists, and test takers scoring at or above the national 96th percentile are recognized as Commended Students. Each grade's PSAT participation rate was based on the September 30th enrollment for that grade.

PSAT Grade 10 and 11 Results – Traditionally, the PSAT has been taken by students in Grades 10 and 11. During the five-year period from 2005 through 2009, the PSAT participation rate for Grade 10 students remained decreased. The 2009 rate of 84.5% is a decline of 2.3 percentage points from the rate of 86.8% in 2005, although this rate is higher than the previous year's participation rate of 83.8%. This rate may approach the maximum available when all students are strongly encouraged to take the test. Fewer BCPS Grade 11 students take the PSAT than 5 years ago. Over the last 5 years, the participation rate for Grade 11 students has decreased from 81.8% in 2005 to 68.0% in 2009. The general trend after 2005, however, indicates a relatively stable percentage of Grade 11 PSAT test takers, from 65.6% in 2006 to 65.2% in 2007, and 69.7% in 2008.

There was a decline in BCPS Grade 10 students' PSAT composite scores over the five-year period from 2005 through 2009. The average Grade 10 composite score was 122 in 2005 and 117 in 2009. The average Grade 11 composite score remained the same at 134 in both 2005 and 2009. The gain in PSAT composite score between Grade 10 and Grade 11 in adjacent years varied across the five-year period. The cohort gain, for example, was 14 composite points between 2007 Grade 10 and 2008 Grade 11, but was 17 points between 2007 Grade 10 and 2008 Grade 11. Note that there were gains in all three subject areas' scores in both cohorts.

PSAT Grade 9 Results – Starting in 2006, BCPS paid for all Grade 9 students to take the PSAT, and the participation rate for Grade 9 students of 84.7% was 45.7 percentage points above the 2005 participation rate of 39.0%. Not unexpectedly, scores decreased with the expanded pool of students between 2005 when the composite was 129 and 2007 when the composite was 108. In the subsequent 2008 and 2009 years, however, the composite was maintained at 108. Between 2005 and 2009, the critical reading, mathematics, and writing PSAT scores declined for Grade 9 students. The mathematics score increased by one percentage point between 2008 and 2009, offsetting a drop of one point in critical reading. The writing score stayed the same from 2008 to 2009.

The experience of taking the PSAT in Grade 9 should be reflected a year later in improved Grade 10 scores. In 2007, Grade 10 was the first group to have had most students taking the PSAT in Grade 9; however, the 2007 composite score for Grade 10 students, most of whom had taken the

PSAT as Grade 9 students, was four points less than the 2006 composite score for Grade 10 students, half of whom were first-time test takers. The lower 2007 composite score for Grade 10 students reflected a writing score decline, but the expectation of PSAT score improvement through an earlier experience of taking the test was not realized. In 2008, the PSAT composite score declined another point to 117, and was maintained at 117 in 2009. The mathematics score increased by one percentage point between 2008 and 2009, offsetting a drop of one point in critical reading, while the writing score stayed the same.

Racial Group PSAT Results – In 2009, Grade 10 participation rates were 86.5% for American Indians, 95.4% for Asian students, 83.0% for African American students, 85.2% for White students, and 75.6% for Hispanic students. The Grade 11 PSAT participation rates were 52.9% for American Indians, 85.8% for Asian students, 57.5% for African American students, 74.8% for White students, and 68.0% for Hispanic students.

For Grade 11 students in 2009, the mean composite score was 139 for American Indian students, 142 for Asian students, 117 for African American students, 142 for White students, and 121 for Hispanic students.

The 2009 participation rate for Grade 9 African American students of 86.4% was more than three times the 2005 participation rate of 27.8%, one year before BCPS began paying for the PSAT in Grade 9. Composite scores, however, declined for African American Grade 9 students since 2005 with the expanded pool of test takers. The 2009 composite score for Grade 9 African American students was 99, one point higher than in 2008, but much lower than the 2005 composite score of 112. In 2009, however, Grade 10 African American students had a six-point gain in the composite score over their 2008 Grade 9 composite score of 98.

FARMS-eligible Students PSAT Results – In 2009, 77.8% of FARMS-eligible students and 88.6% of non-FARMS-eligible students were Grade 10 participants in the PSAT test program. While the participation rate increased 11.1 percentage points for FARMS-eligible students compared with 2008, the rate for non-FARMS-eligible students was lower in 2009 than 2008 by 3.1 percentage points, but relatively similar to the participation rate of 88.7% in 2005. Both groups participated to a lesser extent in Grade 11. In 2009, 52.7% of FARMS-eligible students and 74.8% of non-FARMS-eligible students were participants in the PSAT test program. The 2009 FARMS-eligible participation rate was lower than in 2005 by 19.3 percentage points, but higher than the rate in 2007 by less than one percentage point. For non-FARMS-eligible students, the 2009 participation rate was 9.4 percentage points lower than in 2005 and 1.8 percentage points lower than in 2008.

The Grade 10 composite score for FARMS-eligible-students was 105 in 2005 and 102 in 2009, while the Grade 10 composite score for non-FARMS-eligible students was 126 in 2005 and 124 in 2009. The Grade 11 composite score for FARMS-eligible students was 116 in 2005 and 115 in 2009, while the Grade 11 composite score for non-FARMS-eligible students was 137 in 2005 and increased by 2 points to 139 in 2009.

The 2009 participation rate for Grade 9 FARMS-eligible students of 82.2% was less than the 91.0% participation rate for non-FARMS-eligible students. However, the 2009 rate was more

than 3.5 times the 2005 participation rate of 23.0%. In 2009, the cohort of Grade 10 FARMS-eligible students who had taken the PSAT a year earlier in Grade 9 had a composite score of 102, a 6-point gain over their 2008 Grade 9 score of 96. The corresponding cohort of Grade 10 non-FARMS-eligible students had a composite score of 124 in 2009, a 7-point gain over their 2008 Grade 9 score of 113. There was a difference of 22 points in the composite scores of the two groups of Grade 10 students, a 3-point wider gap than in 2008.

SAT Participation and Performance

SAT Participation and Performance

The SAT, once called the Scholastic Aptitude Test but renamed the SAT Reasoning Test in 2005, is administered by the College Board. According to the College Board, the SAT assesses how well the test takers analyze and solve problems. Grade 11 and Grade 12 students typically take the SAT, but results are reported only for Grade 12 students and only the highest score is reported for students who have taken the SAT more than once. The SAT participation rate is based on Grade 12 September 30th enrollment. Through 2004, the SAT was a two-part test with a Critical Reading section and a Mathematics section, with a maximum possible score of 1600. A Writing section was added in 2005, so that the maximum possible score is now 2400. The Writing section results, however, for BCPS students in 2005 through 2009 were not included in the *Achievement Report*.

SAT Results – In the years between 2004 and 2008, SAT participation had increased. However, in 2009, participation declined from 55.7% in 2008, to the current rate of 49.1%. This reflects a decrease of 703 students from 2008 to 2009. In 2009, the mean SAT critical reading score was 497, a decrease of 12 points from the 2005 score of 509. The 2009 mean mathematics score was 502, a decrease of 7 points from the 2005 score of 516, despite the smaller pool of test takers. Both the mean critical reading score and the mean mathematics score increased by six points.

Racial Group SAT Results – SAT participation varied by racial group. The 2009 participation rate was 36.1% for American Indian students, 75.1% for Asian students, 47.6% for African American students, 48.6% for White students, and 37.4% for Hispanic students. The participation gap between African American and White students narrowed from 9.6 percentage points in 2005 to 2.0 percentage points in 2009. Asian students continued to lead in participation rate, while White students continued to have the largest number of test takers.

In 2009, the critical reading scores were 458 for American Indian students, 519 for Asian students, 426 for African American students, 541 for White students, and 493 for Hispanic students. Mathematics scores were 424 for American Indian students, 568 for Asian students, 414 for African American students, 554 for White students, and 482 for Hispanic students. White students continued to lead the critical reading score, Asian students continued to have the highest mathematics score, and African American students still lagged behind the other race groups. Other than American Indians, a very small group, all racial groups experienced SAT critical reading score gains between 2008 and 2009.

The differences between critical reading and mathematics scores varied by gender as well as by racial group. In 2009, mathematics scores were higher than critical reading for males, but the opposite was true for females. Also, male and female critical reading scores were nearly identical (497 versus 496), but males scored 33 points higher than females in mathematics (520 compared with 487). The gender pattern was the same in 2005, although the actual scores were higher than in 2009. Females' participation rate was 8.0 percentage points above the rate for males in 2009 (53.1% versus 45.1%), continuing the pattern observed in 2005. Asian males outscored females in mathematics by 20 points in 2009, but females' critical reading scores were 14 points higher. For both genders, mathematics scores were the highest. For African American students, the

pattern was not totally the same. Males scored higher than females in mathematics, while females scored higher in critical reading. But for males, both SAT scores were similar (423 in mathematics and 420 in critical reading), while females' scores in the two subjects differed by 24 points (406 in mathematics, 430 in critical reading). White students had another pattern, similar to the total BCPS population. Males scored much higher than females in mathematics (32 points) and slightly below females in critical reading (1 point). Mathematics was the higher of the two SAT scores for White males, but the lower score for White females. For White females, both SAT scores were similar (539 in mathematics and 541 in critical reading), while males' scores in the two subjects differed by 31 points (571 in mathematics and 540 in critical reading).

FARMS-eligible Student SAT Results – Over the five years 2005 through 2009, the number of FARMS-eligible Grade 12 students taking the SAT increased 1.6 times from 394 students in 2005 to 649 students in 2009. During that time period, however, the number of Grade 12 students who were FARMS-eligible also increased about twofold. Thus, the SAT participation rate for FARMS-eligible students dropped by 5.7 percentage points over the five years, from 36.5% to 30.8%. During the five years the number of non-FARMS-eligible students enrolled in Grade 12 declined by about 13%, and their 2009 SAT participation rate was 2.0 percentage points lower than in 2005.

From 2005 to 2009, SAT critical reading scores declined for FARMS-eligible and non-FARMS-eligible students; the former by two points (429 to 427) and the latter by six points (517 to 511). Similarly, mathematics scores dropped for FARMS-eligible students by 5 points (433 to 428) and by seven points (525 to 518) for non-FARMS-eligible students. In 2009, non-FARMS-eligible students outscored FARMS-eligible students by 84 points in critical reading and by 90 points in mathematics.

Special Education and ELL SAT Results – In 2009, the SAT participation rate of special education students was 11.2%, a decrease of 1.1 percentage point compared with 2005, and a 3.3 percentage point decrease since 2008, when special education students participation rate was highest since 2004. The 2009 critical reading score was 377, down 53 points from the 2005 score of 430. Likewise, the mathematics score declined by 35 points from 410 in 2005 to 375 in 2009. Compared to 2008, critical reading score increased by two points and mathematics score increased by two points.

In 2005, 72.7% of special education SAT test takers were White students and 20.8% of special education test takers were African American students. By 2009, however, 34.7% of special education test takers were White students, and 61.3% of special education test takers were African American students. Over the five years, the special education Grade 12 population of African American students increased by 66 (221 to 287), while the number of White special education Grade 12 students declined by 19 (375 to 356). In 2009, the critical reading score for White special education students was 466 and the mathematics score was 490. The critical reading score for African American special education students was 327 and the mathematics score was 312.

In 2009, there were 12 ELL SAT test takers out of 38 ELL students enrolled in Grade 12. This compared with one test taker out of 16 enrolled in 2005. The participation in 2009 was 31.6% for

ELL students, an increase of 25.3 percentage points since 2005, but a decrease of 18.4 percentage points since 2008.

AP Participation and Performance

Advanced Placement Participation and Performance

Advanced Placement courses are college level courses given in high schools that prepare students to take an Advanced Placement Test given by the College Board. Tests are scored on a five-point scale; a score of three or higher is considered passing, and many colleges give credit for students with an AP test score of three or higher. AP test participation rates were based on high school September 30th enrollment.

Advanced Placement Test Participation and Results – BCPS student participation in the Advanced Placement Testing program has increased considerably over the five years from 2005 to 2009. The number of students taking one or more Advanced Placement tests increased 33.6%, from 3,269 to 4,367.

Over the five years, the number of Advanced Placement tests taken increased 30.5%, from 6,888 to 8,991. During that time, on average, two AP tests were taken per student, virtually unchanged from 2005 through 2009. With the expanding pool of Advanced Placement test takers, the 2009 pass rate of 68.5% was a slight decrease from 2005 when the pass rate was 70.8%. Over five years, the proportion of male and female test takers has remained relatively stable. In 2009, males comprised 42% of the AP test takers, slightly lower than the 2005 rate of 43.6%, although the number of male test takers increased by 31%, from 1,409 to 1,845. The passing rate for males was consistently higher than the passing rate for females, although both decreased slightly. The pass rate for males decreased from 74.7% in 2005 to 73.5% in 2009, and the female pass rate decreased over the same period from 67.7% to 64.5%.

Racial Group and Gender AP Results – In 2005, 0.3% of AP test takers were American Indian students, 11.6% were Asian students, 11.1% were African American students, 75.9% were White students, and 1.0% Hispanic students. In 2009, 0.3% of AP test takers were American Indian students, 12.6% were Asian students, 15.3% were African American students, 69.7% were White students, and 2.0% were Hispanic students. Over the five years, Asian, African American, and Hispanic student participation rates increased, White student AP test participation rate decreased, and American Indian AP test participation rate remained the same.

From 2005 to 2009, the pass rates for American Indian and African American students increased slightly, while the pass rate for White, Hispanic, and Asian students decreased slightly. In 2009, the respective pass rates were 75.9% for American Indian students (up 23.0 percentage points from 2004), 71.8% for Asian students (down 1.5 percentage points), 41.1% for African American students (up 2.4 percentage points), 74.1% for White students (down 1.2 percentage points), and 62.1% for Hispanic students (down 0.9 percentage points). African American students were 33 percentage points behind their White peers. This represents a 6.3 percentage point reduction in the achievement gap between African American and White students. The passing rate for males was higher than the passing rate for females in all racial subgroups. For both genders, African American students had the lowest pass rates, while American Indian male and White female students had the highest pass rates. American Indian and Hispanic males were the only two subgroups to show gains in pass rates over the five years between 2005 and 2009.

FARMS, Special Education, and ELL AP Results – From 2005 to 2009, the number of FARMS-eligible students taking an AP test almost tripled, from 345 to 929. The number of tests taken per student was close to 1.7 over the five years. The passing rate, however, for FARMS-eligible students declined from 45.2% in 2005 to 41.3% in 2009. Non- FARMS-eligible students had a passing rate of 71.6% in 2009.

In 2009, 19 special education students took 28 AP tests, with a passing rate of 50%. This was a little lower than in 2005 where 22 special education students took 33 Advanced Placement tests, with a passing rate of 66.7%. In 2009, one ELL student took and did not pass four Advanced Placement tests. Over the five years, at most four ELL students took AP tests during any one year.

Highly Rigorous Course Participation

Highly Rigorous Course Participation

BCPS highly rigorous courses include gifted and talented (GT) courses for elementary school students in grades 1 through 5, GT and honors courses for middle school students, and GT, honors, and Advanced Placement (AP) courses for high school students, with International Baccalaureate (IB) courses offered at two high schools. Highly rigorous course participation rates were based on end-of-year enrollment.

Elementary GT Course Participation – In 2009, 23.4% of BCPS elementary school students were enrolled in GT courses, compared with 21.2% in 2005, an increase of 2.2 percentage points. Over the five years, the actual number of GT elementary school students increased by 6.1%, from 4,983 in 2005 to 5,288 in 2009. The elementary enrollment, however, decreased by 4.2% for the same time period. The percentage of students enrolled in GT courses increased for all racial groups between 2005 and 2009. In 2009, 18.1% of American Indian students, 31.3% of Asian students, 14.9% of African American students, 31.3% of White students, and 13.7% of Hispanic students were enrolled in elementary school GT courses. Overall in 2009, 22.1% of elementary school males and 24.8% of elementary school females were enrolled in GT courses. Similarly for each racial group, there were a higher percentage of females enrolled in GT courses than males.

Secondary Highly Rigorous Course Participation – In 2009, 48.5% of BCPS middle and high school students were enrolled in highly rigorous courses, compared with 42.1% in 2005. The number of secondary students enrolled in highly rigorous courses increased by 7.2% over the five years, from 24,646 in 2005 to 26,426 in 2009, while the secondary enrollment decreased during the same time period by 6.9%, from 58,599 to 54,533. In secondary schools in 2009, 61.7% of Asian students, 57.3% of White students, 37.3% of African American students, 34.6% of Hispanic students, and 36.1% of American Indian students were enrolled in highly rigorous courses.

Overall in 2009, 43.7% of secondary school males and 53.3% of secondary school females were enrolled in highly rigorous courses. The difference between gender participation rates in secondary highly rigorous courses varied among racial groups, ranging from 4.7 percentage points for American Indian students to 11.8 percentage points for African American students, with females having higher participation rates for all subgroups. For each racial group, the percentage of students in highly rigorous courses increased during the period from 2005 to 2009. The number of students enrolled in highly rigorous courses also increased for all racial groups except for American Indian and White students over the same time period.

FARMS-eligible, Special Education, and ELL Highly Rigorous Course Participation – During the five period between 2005 and 2009, the number of FARMS-eligible and ELL secondary students enrolled in BCPS increased, while the overall number of special education secondary students decreased. During that same period, enrollment in highly rigorous courses increased for FARMS-eligible secondary students and special education students, but declined for ELL students. In 2005, 21.9% of FARM-eligible secondary students, 8.1% of special education secondary students, and 8.8% of ELL secondary students were enrolled in highly

rigorous courses. While in 2009, 30.4% of FARMS-eligible secondary students, 10.4% of special education students, and 4.8% of ELL students were in highly rigorous courses. The 30.4% enrollment of secondary FARMS-eligible students in highly rigorous courses is more than twenty percentage points lower compared with the 58.1% enrollment of non-FARMS-eligible students.

Graduation Rates

Graduation Rates

A high school graduate is a student receiving a high school diploma or certificate of high school completion. The graduation rate is the percentage of graduates during the reported school year. The rate is computed by dividing the number of graduates by the total number of cohort students, which includes graduates as well as those who dropped out in Grade 9, Grade 10, Grade 11, and Grade 12.

Graduation Rates – In 2009, the graduation rate was 83.7%, 1.8 percentage points higher than the rate of 81.9% for the Class of 2008. Graduation rates increased for all groups from 2008 to 2009. The graduation rate for Asian students was 92.8%, the rate for White students was 84.6%, the rate for Hispanic students was 82.8%, the rate for African American students was 81.6%, and the rate for American Indian students was 75.0%.

Graduation rates for male and female students differed. In 2009, the female graduation rate was 87.3%, while the male graduation rate was 80.2%, a difference of 7.1 percentage points. Asian females had the highest graduation rate at 94.8% and Hispanic males had the lowest graduation rate at 68.4%. For African American students, the graduation rate for females was 86.5% and the rate for males was 76.4%, a difference of 10.1 percentage points. For White students, the graduation rate for females was 87.5% and the rate for males was 81.7%, a difference of 5.8 percentage points.

Number of Graduates – From 2005 to 2009, the number of graduates increased 2.4%, with the number of female graduates increasing 2.7% and the number of male graduates increasing 2.1%. Also during this time period, total enrollment decreased by 4.0%. The number of African American graduates increased 15.3%, with an increase of 13.3% for males and 17.0% for females. The number of Hispanic graduates increased 56.1%, an increase of 56.7% for males and 55.6% for females. The number of White graduates decreased 5.9%.

Suspensions and Expulsions

Suspensions and Expulsions

In 2009, the percentage of BCPS students suspended (including expulsions) was 11.63%, an increase of 0.55 percentage points from 2008. Despite decreased enrollment, the total number of incidents increased by 7.8% from 21,163 in 2008 to 22,810 in 2009.

Suspension rates differed among races. In 2009, the suspension rate was 3.18% for Asian Students, 7.57% for White students, 7.83% for Hispanic students, 12.83% for American Indian students, and 18.15% for African American students. For American Indian, White, and Hispanic students, the suspension rate was lower in 2009 than it was in 2008, and for Asian and African American students, the suspension rate was higher in 2009 than it was in 2008.

The suspension rate increased for both genders from 2008 to 2009, with the suspension rate for males nearly twice as high as that for females, a longtime trend. In 2009, the suspension rate was 15.12% for males (up from 14.64% in 2008) and 7.97% for females (up from 7.33% in 2008). The gender divide is even greater within some race subgroups. For African American students, 1.8 males were suspended for each female; for White students the divide was 2.1, for American Indian students 1.7 males were suspended for each female; for Hispanic students, 2.5 males were suspended for each female; and for Asian students, 3.2 males were suspended for each female.

Disrespect/Insubordination accounted for 42.35% of all suspensions including expulsions in 2009. Attack/Threats/Fighting accounted for 22.70% of incidents, and Other accounted for 20.29% of incidents.

Overall, the suspension rate for FARMS-eligible students was about twice that of the rate for non-FARM-eligible students. In 2009, the rate for FARMS-eligible students was 16.93% while the rate for non-FARMS-eligible students was 8.38%. The suspension rates for FARMS-eligible students differed among races. The rate was 20.70% for African American FARMS-eligible students, compared with 15.06% for non-FARMS-eligible students, and the rate for White FARMS-eligible students was 13.32% compared with 5.91% for non-FARMS-eligible students. The suspension rate for Asian students who were FARMS-eligible was 5.26%, compared with 2.28% for non-FARMS-eligible students. For Hispanic FARMS-eligible students, the rate was 8.91%, compared with 6.14% for non-FARMS-eligible students, and for American Indian FARMS-eligible students the rate was 16.41%, compared with 8.86% for non-FARMS-eligible students.

In 2009, the suspension rate for special education students was 18.66%. The suspension rate was 5.73% for Asian special education students, 11.06% for Hispanic special education students, 13.41% for White special education students, 20.83% for American Indian special education students, and 25.76% for African American special education students. The 2009 suspension rate for ELL students was 3.96%. For the two largest groups of ELL students, Asian ELL students had a suspension rate of 2.82%, and Hispanic ELL students had a suspension rate of 3.40%. The rate for White ELL students was 4.87% and African American ELL students had a suspension rate of 8.52%.

While the 2009 suspensions-including-expulsions rate was 11.63% of enrollment, the expulsions rate was 0.46% of enrollment, significantly lower than that of 2008, which was 0.58%. During

the five-year period from 2005 to 2009, the expulsions rate decreased from 1.04% to 0.46%. The expulsion rate for each subgroup also decreased from 2005 to 2009. For African American students the rate from 2005 to 2009 went from 1.65% to 0.81%, from 0.68% to 0.22% for White students, from 0.64% to 0.24% for Hispanic students, from 0.24% to 0.15% for Asian students, and from 1.70% to 0.00% for American Indian students.

The rate of expulsions for both genders went down 2005 to 2009. In 2009, the rate of expulsions for males was 0.66%, slightly higher than that of females which was 0.25%.

The expulsions rate for special education students in 2009 was 0.80%, down from 1.13% in 2008. The expulsion rate for ELL students in 2009 was 0.00%. The expulsions rate for FARMS-eligible students in 2009 was 0.72%, compared with 0.29% for non-FARM-eligible students.

Glossary of Terms

Advanced Placement (AP) – Advanced Placement represents a cooperative effort between secondary schools and colleges and universities. It is a program of introductory college-level courses for students who are willing and able to apply themselves to college-level studies during their high school years. Students who successfully complete AP courses and exams may be exempted from introductory courses by many colleges and universities.
The test is aligned with grades 9-12 End-of-Year Enrollment.

Attendance – The average daily attendance for a given year is based on the aggregate number of enrolled students (grades 1-12) who are present in school each day of the September to June school year. The percent average daily attendance is calculated by dividing the aggregate number of students in attendance by the aggregate number of students in membership for the September to June school year.

Classroom Teacher – Classroom teacher is defined as a teacher providing large group instruction to students in a class setting.

Dropout – A student who leaves school for any reason, except death, before graduation or completion of a Maryland approved educational program and who are not known to enroll in another school or state-approved program during the current school year.

Dropout Rate – The Dropout Rate is determined by the number of dropouts divided by the total number of students in grades 9-12 served by the school.

End-of-Year (EOY) Enrollment – EOY Enrollment equals the count of students attending the last day of the school year.

English Language Learners (ELL) – ELL are those students whose primary or home languages are other than English and have been assessed as having limited or no ability to understand, speak, read, or write English. These students are eligible for the English for Speakers of Other Languages (ESOL) program. ELL is aligned with the End-of-Year Enrollment. In the past, ELL students have been referred to as ESOL (see ESOL definition below).

English for Speakers of Other Languages (ESOL) – ESOL is a program designed to support the achievement of English Language Learners as they acquire English as another language.
ESOL is aligned with the End-of-Year Enrollment.

Enrollment – Enrollment is the number of students enrolled in school as of September 30th.

Free And Reduced Meals (FARMS) – This is a program for which a student may qualify based upon his or her family's confidential economic status. FARMS is aligned with the End-of-Year Enrollment.

Gifted and Talented (GT) – The term gifted and talented refers to those students who give evidence of high achievement capability in areas such as intellectual, creative, artistic, or leadership capacity, or specific academic fields, who need specific services or activities in order to fully develop those capabilities. A gifted and talented elementary or secondary student is identified by professionally qualified individuals as having outstanding talent and performing or showing the potential for performing at remarkably high levels of accomplishment when compared with other students of a similar age, experience, or environment.

The GT participation in elementary school participation is any student in grades Pre-K through grade 5. Secondary participation is based on students enrolled in GT, AP or IB courses. The GT section is aligned with the End-of-Year Enrollment.

Graduation Rate – Graduation Rate is the percentage of students who received a Maryland high school diploma during the reported school year. This is an estimated cohort rate. It is calculated by dividing the number of high school graduates by the sum of the dropouts for grades 9 through 12, respectively, in consecutive years, plus the number of high school graduates.

High School Assessment (HSA) – HSAs are Maryland state mandated tests in Algebra I, biology, English 9, and government administered to measure student achievement in each of these subjects. The State will establish a passing standard in the near future, which will become a graduation requirement for all students receiving a Maryland high school diploma.

Maryland School Assessment (MSA) – MSAs comprise a federally mandated assessment program in grades 3 through 8, and including two high school level assessments, to assess student achievement as basic, proficient, or advanced in the areas of reading and mathematics. The test results are used to determine whether schools and school systems are meeting federal/state standards for student achievement.

Preliminary Scholastic Aptitude Test (PSAT) – PSAT is a standardized test that provides firsthand practice for the SAT Reasoning Test™. The PSAT section is aligned with the September 30th Enrollment.

Highly Rigorous Courses – This section details students who are enrolled in one or more highly rigorous courses such as honors, GT, AP, or IB. This section is aligned with the End-of-Year Enrollment.

Scholastic Aptitude Test (SAT) – SAT is a set of standardized college entrance examinations. The SAT scores and participation rates are based on grade 12. The section is aligned with the September 30th Enrollment.

September 30th Enrollment – This enrollment is the count of students enrolled in school as of September 30th.

Special Education (SP ED) – Special Education refers to a program requiring special techniques, exercises, and subject matter designed for students whose learning needs cannot be met by a standard school curriculum. The Special Education section is aligned with the End-of-Year Enrollment.

Suspension and Expulsion – Suspension and expulsion refers to students who have been removed from school routine for a specified period of time. The section is aligned with the End-of-Year (EOY) Enrollment therefore, there may be a noticeable discrepancy between incidents, EOY enrollment and percentages, when a student who had been suspended or expelled is not included the EOY enrollment at the school level.
