Page 14 Page 16 the proper forum to address specific student or around safety, schedules, timelines, PPE, the employee matters, or to comment on matters that medical fragility of students, staff who are at 3 do not relate to education in Baltimore County. high risk and a plethora of other things. We encourage everyone to utilize existing dispute We all know that at some point our resolution processes as appropriate, and I remind students will need to go back to a physical everyone that inappropriate personal remarks or building and our staff will need to return too. 7 other behavior that disrupts or interferes with We support a safe sustained reopening. We ask as 8 we have done and will continue to do for clear the conduct of this meeting are out of order. 9 I ask speakers to observe the consistent communication around us with our 10 three-minute limit and conclude remarks when time 10 voices at the table when plans are being has expired. The call will be ended and could be developed. As all reopening facets affect the 12 turned off if the speaker addresses specific working conditions of each of our associations, 13 student or employee matters or is commenting on 13 we need to continue to be part of the planning. 14 matters not related to public education. 14 All that being said, we are part of the design 15 15 If not selected, the public may always team and the COVID task force and as such we are 16 submit their comments to the board members via now at the table as these plans are made. 16 17 17 email at boebcps.org. More information is Additionally, Dr. Scriven, Dr. Adams and 18 18 provided on the Board's website at Mr. Burke are available for us to reach out when 19 19 there's a concern that needs immediate attention. www.bcps.org/board/participation. 20 20 I will now call on our stakeholder group We also meet regularly with them and that is 21 invaluable to take immediate action when it is leaders to speak. Once stakeholder group Page 15 Page 17 needed or obtain clarification or just talk 1 speakers are done, then we will call on the 2 individuals registered to address us. through whatever is popping up. Thank you, 3 Dr. Scriven, Dr. Adams and Mr. Burke. MS. GOVER: Ms. Causey, if I may? 4 CHAIRMAN CAUSEY: Yes. Information can and does change rapidly and you MS. GOVER: Could I ask those who are on are there with us as we all face the challenges the call if they're watching Livestream, to turn and opportunities. Please continue to provide their Livestream down, because we're getting that the clear and consistent communications that we 8 feedback. need for our members and that the public needs as 9 9 well. CHAIRMAN CAUSEY: Thank you, Ms. Gover. 10 10 Our first stakeholder for the evening is Everyone is trying to do all they can to Ms. Cindy Sexton, president of the Teachers 11 11 remain safe and healthy above all, but also to 12 12 Association of Baltimore County. Good evening. manage our jobs, our families and our own 13 MS. SEXTON: Good evening, Chairwoman 13 personal health and emotional wellbeing. There's Causey, Vice Chair Henn, Dr. Williams and members so much to juggle and our members are working 15 of the Board. I speak tonight on behalf of the 15 extremely hard to do what is best for students 16 five bargaining units in BCPS. Like you, we have 16 because we are all here for students and the more 17 fielded countless emails from our members and the 17 we can continue to collaborate and communicate 18 18 community. There is great concern being raised the better it will be for all of us. Thank you. 19 19 over going back into the buildings and great CHAIRMAN CAUSEY: Thank you. Our next 20 concern being raised over not going back into the 20 speaker for the evening is Megan Stewart-Sicking 21 buildings. There have been hundreds of questions from the Special Education Citizens Advisory

Page 18 Page 20 1 Committee. Good evening. weeks into the school year we can't have 2 MS. STEWART-SICKING: Chairwoman Causey, Schoology accounts for aides to access curriculum 3 Vice Chair Henn, Dr. Williams and members of the materials? Are you telling me that if a child Board, good evening to all of you, it's wonderful can't manipulate an online worksheet that printed 5 to be back here with you. Throughout this fall materials and workbooks can't be available at SECAC has been working with parents to learn more this point? Are you telling me given the number about experiences with virtual learning and we of students who need a scribe, no one thought on know that experiences are varied. One group of a large scale about who will write for them? Are students is engaging virtual learning and a few you telling me that students who can't learn in a 10 even prefer online classes; another group large group shouldn't be placed in small group or consists of those who cannot engage at all. We individual instruction because no one has a 12 know these students need a return to classrooms staffing plan for this? Because that's what the to regain lost skills and move forward, or 13 13 schools and parents are telling me about problems 14 perhaps they need a one-to-one physically present 14 that should have been solved weeks ago. Supports with them in the home. There's also a third 15 added now may cost something but they won't cost 16 category of students and they are being largely 16 nearly as much as the compensatory services 17 ignored; this is the group that could learn 17 needed if we allow these needs to go unaddressed. 18 18 virtually if they had the proper supports; these These are students who don't need to fall as far students don't have to experience intense 19 behind as you are letting them fall. 20 20 frustrations and growing learning gaps; they I have been the chair of the SECAC for 21 could make progress but the barriers in distant five years. I've spent countless hours Page 19 Page 21 1 learning are too many and the solutions and advocating for more teachers, more resources, 2 supports provided are too few. reduced caseloads, working to make the lives of 3 We've heard so many comments from special needs students and teachers better. I special needs parents that I can't possibly list know my rights and I know about resources. Yet my own child hasn't been able to make it through them now. They will be forwarded to you this week. We have heard about parents who are at a single class and has received almost no their breaking point watching their child regress education since school began because he can't or become frustrated or demoralized. We've heard access it. We can ignore the issue but it won't about kids begging for this to stop or slow down. go away. Virtual learning is going to be with us 10 The fact is, many teachers are putting on a brave 10 and many special needs students for some time to 11 11 face and many parents are doing their best, but come. We need to get honest about the problems 12 12 virtual learning is not working for many with virtual and the possible solutions. Thank 13 13 children. you. 14 Additional supports and interventions 14 CHAIRMAN CAUSEY: Thank you. Our next 15 could improve the situation but these issues are 15 speaker for the evening is Ms. Julie not being problem solved fast enough at a system 16 Miller-Breetz, chair of the Citizens Advisory 17 17 level. Every teacher and administrator is Committee for Gifted and Talented Education. 18 reinventing the wheel every day in the name of Good evening. 19 19 making sure plans are individualized. You can MS. MILLER-BREETZ: Good evening, 20 provide a framework and still have things be 20 Chairwoman Causey, board members, Dr. Williams and the BCPS community. Before anything else I 21 individualized. Are you really telling me four

Page 22 Page 24 would like to welcome new board members Dr. Erin unreliable and biased against certain groups of Hager and student member of the Board Josh students. Any identification system that Muhumuza. We really look forward to working with includes teacher input should be based on a you and hopefully meeting you in person one day. strong professional learning program and such I would also like to acknowledge all the work training will be even more critical given the that BCPS has put into trying to provide the best current crisis and its likely effects on student learning this fall. We hope that BCPS is possible educational experience for the students this year, it cannot have been easy. I also want focusing on the potential for advanced learning to let you know that as of this year I am the rather than advanced performance during its cochair of the GTCAC and I'm sharing that role selection processes. with Dr. Zamira Simkins. I know you will all Excellence gaps are most certainly welcome her as she becomes active with her new 12 growing during the pandemic and a tight focus on 13 role. We are excited to have her on board. advanced performance will exclude students who 14 As we all know, the normal school 14 don't have access to the technology and support 15 15 calendar has been interrupted by the current that would allow them to thrive in an online 16 16 pandemic, forcing changes to routine procedures environment. Many of these students may also be 17 and timelines in all aspects of K-12 education. living in communities being ravaged by the 18 18 These changes have been significant within gifted pandemic, adding a level of potentially long-term education programs across the country, ranging trauma that needs to be factored in to 20 20 from suspension of programming to identification decisions. 21 21 reconceptualizing advanced placement tests to We will be talking with Ray Kerns, Page 23 Page 25 outright cancelling college entrance exams. We coordinator of advanced academics, at our first know many students faced severe learning GTCAC meeting on Wednesday, October 7th at seven limitations starting in mid March due to lack of p.m. This will be a virtual meeting and the link devices, limited Internet services and reduced to access it can be found on both our Facebook page and on our website at learning times. We also know that other students had few limitations and may have learned as much bcpsgtcac.wordpress.com. Thank you for finding if not more than if they had been in school in the mechanism to allow stakeholder groups and the general public to address the Board using this person. Out of school learning experiences 9 likely also varied greatly. call in process and thank you for your time. 10 10 We also know that due to the CHAIRMAN CAUSEY: Thank you, cancellation of state tests and missed 11 11 Ms. Miller-Breetz. The next stakeholder speaking 12 12 opportunities for additional data that would have this evening is Mr. Kenneth Guttman, representing been gathered during the spring months there may 13 the Career and Technical Education Advisory be significant data limitations that could impact 14 Council. Good evening. 15 the ability to appropriately identify students 15 MR. GUTTMAN: Good evening, Chairwoman for specific purposes. We know that gathering 16 Causey, Vice Chair Henn, Dr. Williams and members 17 data primarily from teachers during the 17 of the Board. I'm Ken Guttman, chair of the 18 Career and Technical Education Advisory 18 identification process is not without significant 19 19 limitations. Committee. As background on me, I'm a product of 20 Research provides ample evidence that 20 BCPS, having attended Loch Raven Elementary

currently have three children enrolled in BCPS.

I'm here to highlight CTE programs in BCPS. CTE provides 21st century career relevant education to students, making them ready for productive careers or for college. There are currently more than 30 CTE programs of study over ten career clusters. These programs provide students employability skills including job-related skills, project-based learning and internship opportunities, industry apprenticeship programs and importantly, the opportunity to earn industry certifications while in high school.

CTE continues to deliver instruction in 14 a virtual setting. Since March the CTE office has identified teachers that are recognized as 16 subject matter experts to revise the pacing guides, provide sample lessons and facilitate professional learning conversation for 278 courses. Additionally the CTE office is preparing a plan for programs to return to the school building in small cohorts.

Two good news items to share. Number one, a virtual opportunity is being planned for 8,400 eighth grade students to interact with more

than 60 businesses that will showcase CTE

pathways to future careers. This is being done through our partnership with school counseling,

social studies and Parent University. Number

two, a CTE food vending trailer will be delivered

in early October. This opportunity will provide

internship hours for students in our culinary 11 arts and baking and pastry programs. It will

allow students to research and plan menus, apply

their classroom experiences and provide outreach

14 to the community.

15

17

21

Recently the CTE advisor committee agreed to form a committee, a subcommittee to review the barriers to equal access to CTE

programs. We will be delivering more information

19 on this in the future. The CTE advisory

20 committee is committed to bringing relevant

information to the Board throughout the school

7

17

18

year. We look forward to providing updates to you in the future. Thank you.

3 CHAIRMAN CAUSEY: Thank you,

Mr. Guttman, and now our public comment. Our

5 first speaker is Ms. Allison Carter. Good 6 evening.

MS. CARTER: Good evening. My name is Allison Carter and I'm a teacher at Dundalk Middle School. I stand in solidarity with the educators and families of the four targeted schools who are voicing overwhelming outrage over the hasty and ill informed reopening.

I'm a seventh year teacher who always knew that education was my passion. I've had the experience of being a high risk student and now education, and can attest to the overwhelming fear and anxiety of existing in the COVID era, knowing that my body will not protect me from this virus. I'm terrified of being forced back into schools at this point as is happening with the four targeted schools as I would have to make

Page 27

Page 29 a choice between my safety and my employment, because if I got this virus I would not survive. 3 I'm 28 years old with my entire life ahead of me. I am not expendable. Being high risk does not mean that I'm unwilling to teach.

My obstacles have ingrained in me empathy and patience that make me an incredible educator for my students. I give everything for this job but

I should not have to give my life.

Now let's look at the numbers. A recent study from the Center of Mathematical Modeling in Infectious Diseases concluded that 22 percent of the global population has at least one underlying condition that puts them at high risk of severe COVID if infected. Some quick calculating will tell you that that puts approximately 2,425 of our teachers and ESPs at high risk and 25,396 of our students at high risk. That's at least 27,821 lives being treated as a casualty in these forced reopenings. The trauma of losing a child,

a classmate, teacher, bus driver, family member

17 18 19

10

11

12

13

11

Page 30

to COVID does not have to happen. This is preventable. We have a responsibility to protect our students and educators and we have the infrastructure already in action to do so.

An educator from one of the targeted schools stated, quote, in my ten years working at this school I've attended the funerals of three students due to their medically fragile condition. I don't care if parents sign waivers. I do not want to attend another student's funeral. End quote.

12 BCPS is sending their most high risk and 13 medically fragile students back into schools from 14 these targeted schools. A threat to our most vulnerable populations is a threat to our 16 communities as a whole. These decisions must 17 prioritize protecting our communities and 18 stopping preventable death and trauma. Families who are high risk are offered accommodations, including opting to continue virtual learning 21 instead. In reopening plans educators are not

Page 31

14

15

16

17

18

19

20

21

provided the same courtesy. Why? Are we expendable? Reentering schools is a calculated risk, but BCPS is doing the math and not letting us see the formula. Loss of life is not a risk worth taking.

But I do have some good news. This is

completely preventable. We do have the

infrastructure for virtual learning and are

getting into a rhythm with rigorous and engaging

learning opportunities. We can build upon this

foundation and make our virtual pathway an

incredible experience. There is no good solution

that will please everyone but there is a safe

solution that working together we can make good

if not amazing. I urge you to choose the safe

path. Thank you.

CHAIRMAN CALISEY: Thank you. Our ne

CHAIRMAN CAUSEY: Thank you. Our next speaker for the evening is Ms. Anna Weisberg. Good evening.

MS. WEISBERG: Good evening. My name is Anna Weisberg. I'm a teacher at Deep Creek

Middle School. I stand in solidarity with the educators and families of the four targeted schools in voicing overwhelming outrage over the hasty and ill informed reopening. I'm going to

read excerpts from a letter from Marjorie
Culotta, nurse at Ridge Ruxton School.
To whom it may concern: Lam wri

To whom it may concern: I am writing to state that I am not in agreement with the latest reentry plan proposed that will require only the four special schools to reopen. In my opinion this plan is driven by political pressure at federal and state government levels as well as by monetary incentives offered by Governor Hogan, rather than by sound health advice from medical experts.

If the health and safety of all (unintelligible, announcement playing) when it comes to the most vulnerable students in the system. A large number of students at the special schools have multiple serious medical diagnoses and are extremely medically fragile.

Page 33

Page 32

These students are at a high risk for life
threatening consequences if they contract
COVID-19. It is not recommended by medical
experts that high risk individuals of any age be
cohorted in enclosed spaces for extended periods
of time with questionable building ventilation
and the inability of students to comply with
social distancing or the wearing of masks.

Most of our students cannot sit at a desk for more than short periods of time without moving around the classroom impulsively. Staff members cannot maintain social distancing when feeding and toileting students. If we cannot adhere to federal CDC guidelines then how can we reopen these schools? The four special schools should be the last to reopen, not the first.

According to the CDC, is schools can only implement one to two of the five key mitigation strategies correctly and (unintelligible, announcement playing) high risk of transmission in schools. The special schools

18

19

16

17

18

19

20

21

1

2

10

11

12

21

Page 34 can only implement two out of five of these key mitigation strategies, cleaning and contact tracing. We cannot implement the other three strategies, consistent and correct use of masks, social distancing, and hand hygiene and respiratory etiquette. This precludes the ability for BCPS to open the four special schools. Does BCPS want the liability risk associated with implementing a reentry plan that 10 cannot insure basic CDC guidelines are followed?

I implore you to return to the table and carefully consider the health and safety of our medically fragile students by rescinding this unsafe reopening plan before a tragedy occurs. Thank you for your time and consideration.

CHAIRMAN CAUSEY: Thank you. Our next public speaker for the evening is Kristen Nielsen. Good evening.

MS. NIELSEN: Good evening. My name is Kristen Nielsen, I'm an English teacher at Crossroads Center and the 2019-2020 teacher of

Page 35

13

14

17

18

the year for BCPS. I stand in solidarity with educators and families of the four targeted schools who are voicing overwhelming outrage over the hasty and ill informed reopening.

I planned to speak on the intersections of race and COVID and the needs of my scholars and colleagues. However, that changed with Dr. Williams' second announcement and new directive. This excerpt reflects many of my own experiences and emotions, though it was written by a self contained special educator at Maiden Choice.

13 Maiden Choice is not just a school, we're a family. We come together in solidarity because we love what we do and we know the value of the students that we teach. When the virus 17 first happened and the school closed I spoke to many coworkers about how they were coping with 19 the pandemic and how they were handling the 20 change. First and foremost was the concern for

our students and how we were going to teach our

students virtually. We banded together to learn

and deliver more than the county was requiring of

us. The students deserve this. Countless hours

of learning new computer programs, ways to engage

our students through a computer screen,

interactive methods to assess how much our

children were learning, we were learning right

along with them. We supported our parents and

involved them in each new opportunity we were

presenting. Was it perfect? No, but the one thing teachers do best is reflect on what's

12 working and what's not.

Over the summer most of the teachers spent their summer vacation learning new ways to interactively engage and assess the kids. We 16 worked to build great lessons, new ways to support parents and educate ourselves on new possibilities in education. Is the virtual learning the ideal way for our students to learn? No. Are they learning? Yes. Can we do a better job? Always.

Page 37

Page 36

With parent support and education and instructional protocols we can provide a strong instructional mechanism virtually. With instructional protocols we can provide -- excuse me. Adult family helpers can provide the hands-on instructional support just like our adult assistants do in school. This virtual learning situation has provided us a great opportunity to support families in their own homes. Many of our children's education centers 11 around life skills both in the home and the 12 community. This unique situation is opening the 13 door to allow us to help with that instruction directly in the home, not just for life skills 15 but also behavioral and emotional issues. Having parents working directly with their children 17 during lessons has afforded them an opportunity 18 to expand skills as well.

The beginning of the year started strong, our students are participating every day in learning. Please don't put them at risk.

19

20

Page 38 Page 40 CHAIRMAN CAUSEY: Thank you. Our next difficult. I lost four of my students this year to difficult medical issues which they have speaker for the evening is Ms. Christina 3 McLaughlin. Good evening. suffered. One child I visited the night before MR. BROUSAIDES: Madam Chair, you're he died and arrived at his home 30 minutes after 5 they had removed his body. My most recent muted. 6 student we lost at Christmas time. I was CHAIRMAN CAUSEY: Thank you. Our next 7 speaker for the evening is Ms. Christina privileged to be with her family the night of her McLaughlin. Staff, can you view if she is still death. I don't tell you this to invoke sympathy. 9 connected? I tell you this because it's a true fear of 10 MS. MCLAUGHLIN: Good evening. My name losing another child to illness, especially one that could be prevented by staying virtual for 11 is Christina McLaughlin, I'm a paraeducator at The Rosedale Center. I stand in solidarity with 12 just a little while longer. 13 13 the educators and families of the four targeted As you're aware, we have so many 14 schools in voicing outrage over the hasty and ill 14 educators who are suffering during this pandemic, informed reopening. As a 13-year employee of BCPS needs to show care and concern for these 16 educators and their families. I would like the 16 BCPS I miss going to work and supporting students 17 Board to consider the health and wellbeing of our 17 in a classroom because virtual teaching is 18 18 challenging, but I want to return when it's safe educators, students and their families from 19 for my students and myself. 19 Maiden Choice, Battle Monument, Ridge Ruxton and 20 20 As an individual who is high risk not White Oak. Thank you so much. 21 only am I concerned about myself, but I am 21 CHAIRMAN CAUSEY: Thank you. Our next Page 39 Page 41 speaker for the evening is Mr. Jonathan Holtzman. 1 extremely concerned with the health and safety of my mother who I live with. She has advanced 2 2 Good evening. 3 stage COPD. Like my fellow colleagues, I feel MR. HOLTZMAN: Good evening, Chair that I am being made to choose between life and Causey, Vice Chair Henn, Dr. Williams, members of the Board. My name is Jonathan Holtzman, I am a my employment. Right now I don't have a choice, social studies teacher at Woodlawn High School. I need to work. If my mother contracts this virus she won't survive, then I am left blaming I'm speaking in solidarity with the educators and 8 myself for her death. Is that fair to me? families of the four targeted schools who are 9 We have heard from many educators from voicing overwhelming outrage over a hasty and ill 10 Maiden Choice and Battle Monument who fear for informed reopening. As a third generation BCPS 11 11 the safety and health of their students and educator, Team BCPS is a family whom I regard 12 12 families. A self contained educator at Maiden with much love. And in any loving family, Choice stated: Many of my students have become 13 sometimes it's important that we have tough critically ill during my tenure. I followed some 14 conversations. of my students by teaching them at home and 15 Tonight I want to have a conversation hospital at the same time continuing my job at for a few minutes about some policy choices that 17 Maiden Choice. I spent several nights in Hopkins 17 are now before the Board and will soon be before 18 the Board and BCPS executive leadership. I hope PICU with families and have become friends with 19 19 most of my family of students I have taught over that these choices can be made in a way that 20 the years. 20 insures the safety and learning of students,

This past year has been particularly

17

19

20

months. I want to talk about some of the tools that are at hand for the Board as these tough decisions arise. One of the first tools I want to speak on is one that seems to be broken and that is the Centers for Disease Control and Prevention.

7 Yesterday, the New York Times reported in an article that the White House has been pressuring the Centers for Disease Control and Prevention to play down the risk of sending children to school. White House coronavirus task force leader Dr. Deborah Birx has directly intervened in pushing less relevant information 14 to the fore of CDC reports and the White House has requested snazzy easy to read documents that 16 indicate that there is low to no risk for school 17 aged children to reattend school. I bring this 18 up to emphasize the importance of gathering facts independently and not relying upon political trends at the federal or even the state level. 21 We don't need to be reminded of the fact that

Page 43

this is a dreadful situation having to work virtually. However, the alternative of deaths of students, deaths of teachers, deaths of staff members and their families is completely unacceptable, and this Board and BCPS leadership has the opportunity to prevent it from happening.

Additionally, I wanted to raise that this same issue of chicanery with statistics is occurring with some degree at the state level and 10 as we've seen in multiple Baltimore Sun reports, there is an intense discrepancy between the reporting of coronavirus cases by the states compared to Johns Hopkins University School of Public Health. I'm going to go with the School 15 of Public Health considering that their only job 16 is to promote just that, public health.

Another thing that I want to discuss today is the role that this Board can play in insuring that decisions made at the state level are made in the best interests of the safety of students and staff. It is imperative that the

board directly work with -- (audio cut off).

2 CHAIRMAN CAUSEY: Thank you. Our next speaker for the evening is Ms. Kelly Garrison. Good evening.

MS. GOVER: Ms. Garrison, you're on mute.

CHAIRMAN CAUSEY: Ms. Garrison, we are still not hearing you. If you could, check your device and make sure that you are unmuted. We are still not able to hear you. While Ms. Garrison attempts to reconnect, we will go to our next speaker, Ms. Lena Amick.

MS. AMICK: Hello, my name is Lena Amick, I am a proud social studies teacher at Owings Mills High School and I stand in solidarity with the educators and families of the four targeted schools in voicing outrage over hasty and ill informed reopening. One of the things that makes Owings Mills special to me in my four years of teaching is the diversity of our student body.

Page 45

Page 44

1 As an ESOL center, over a third of the students at OMHS are migrants, the majority of whom arrived over the past few years from Central America. A little over 40 percent of the students in our school community are Latino. According to data shared by the Baltimore Sun, Latinos face the highest rate of infection of any ethnic group in Maryland. Out of all ethnic groups in the U.S., Latinos are least likely to 10 carry health insurance.

The threat of this deadly virus shapes the day-to-day reality of my students and their families acutely. I've had multiple students tell me of family members who have faced serious illness. I know several students who were out for weeks with a virus that also affected their parents, grandparents, nieces, little siblings. Many of my students work in restaurants potentially exposing themselves to illness in order to support their families who have lost income in this recession.

11

17

18

19

Page 49

8

1 2

3

10

11

12

13

14

15

16

17

18

While online learning isn't ideal, it has allowed my students to learn at their own pace while juggling other responsibilities. A hastily times return to school buildings would not only disrupt learning, it would disproportionately put the lives of my Latino students and their families at risk. We're already fighting daily just to get by.

9 I also want to echo the words of RN 10 Marjorie Culotta, school nurse at Ridge Ruxton School, one of the targeted schools for a rushed 12 reopening. She asked if the health and safety of 13 all students is a top priority then why are you 14 being reckless when it comes to the most 15 vulnerable students in our system? What I hear 16 from my students six months into this pandemic is 17 weariness and fear of the unknown. A return to 18 school that's based on politics rather than proof would further isolate and harm communities made 20 vulnerable by systemic racism, economic and legal 21 vulnerability, health disparities and barriers to

accessing affordable and quality health care, and something that could amount to a death sentence.

I speak for all my fellow educators in BCPS when I say that I am deeply dedicated to my student safety and success. Just today I spent 45 minutes after class one on one supporting an ESOL student to make sense of our day's meeting. I was imagining how much harder it would be for her to overcome the challenges of learning an entirely new language in a different country along with all the pressures of being a teenager, while fearing for her safety and family's lives, or facing the trauma of losing a loved one.

Just like in non-pandemic times we need to do as a district what we as educators are trained to do, plan for our students' success using data. I believe that we can and must. Thank you.

CHAIRMAN CAUSEY: Thank you. And we now have Ms. Kelly Garrison on the line. Welcome.

21 Ms. Garrison, we cannot hear you yet.

MS. GARRISON: Hi.

CHAIRMAN CAUSEY: There you go.

MS. GARRISON: Yes, thank you. My name

is Kelly Garrison and I'm a first grade teacher at Villa Cresta Elementary School. I stand in solidarity with the educators and families of the

7 four targeted schools in voicing outrage over the

hasty and ill informed reopening. My fear of returning to school in person comes from a place

of concern for not only myself but for my family,

11 my students, my colleagues and the community.

<sup>12</sup> I've been teaching for nine years at Villa Cresta

Elementary School and I miss many aspects of the

face-to-face teaching and I look forward to a time when it is safe to return to the school in

person. Unfortunately, the time is not now.

I know that I don't stand alone with the fears of returning to school too soon and having concerns for my family if I am forced to return to schools before it is safe. I would like to share some other concerns from colleagues about

Page 47

Page 46

1

2

3

16

17

18

20

that fear as well. So a quick one about one of

the families of a parent from my school. She's

also an educator and she has been teaching for 21

years in BCPS. She loves the school and her

<sup>5</sup> position but she also has a child who's a

kindergartner in BCPS Schools and is high risk.
 She also has a mother who is a caregiver and the

teacher at home for virtual learning who is also

9 high risk, and a spouse who is also a teacher for

BCPS. Her concerns come from a place of

returning to school too soon and while her family

has taken this time to continue to make efforts

to keep their family safe, that she is horrified

it's going to negate all they have worked for in order to keep her high risk family members

healthy.

I'm also going to share a similar concern about how this effect of returning to school too soon can have potential effects on families. Someone from Maiden Choice also stated the COVID situation raises an extremely difficult

16

17

18

19

20

Page 53

Page 50

1

set of feelings about returning to work. Despite the struggles with the online format, I fear returning to school and at a minimum being

exposed to the virus. Such exposure would result in the need for me to quarantine for my wife and

family. Quarantine in my home would be very

difficult. My family are all in high risk

categories due to age, preexisting conditions

such as diabetes, hypertension and asthma, and I

am currently under physician care for

hypertension and experience bronchial

complications every winter. These current

13 situations are terrible in every way. I know at

14 most that we all wish that our particular

students at my school would gain more from

16 education in person, but I also know that the

17 return to school causes significant anxiety

18 because of contracting COVID.

19

21

2

3

18

So before returning to school, I would 20 like the Board to consider some of these concerns to make it safe, proper ventilation and updates

our most vulnerable. In March educators quickly sacrificed

uplifting our communities, not on the backs of

3 and got down to extending meaningful learning opportunities through virtual learning. When we were feted as heroes in June we knew that we had to relish the rare praise we were receiving, we predicted and we were right that it would be short lived. And yet we persisted in preparation for the fall. We each sacrificed hundreds of surplus hours in planning and preparation time to make this work. We did it in spite of the hardships because it was the morally justifiable 14 thing to do. Educators have done more to advance 15 education in this county into the 21st century in six months than has been done in six years. We 16 17 became masters of new tools and new ways of 18 thinking. If we were to ask our kids to do the 19 same, we had to demand it of ourselves. 20

Each of us has also made striking financial sacrifices to fill in the gaps. I live

Page 51

to the HVAC systems, have they been recommended to insure -- (audio cut off).

CHAIRMAN CAUSEY: Thank you. Our next speaker for the evening is Mr. Eugene Johnson.

MR. JOHNSON: Good evening. My name is Eugene Johnson, I'm a social studies educator and a proud member of Team BCPS in Ram Nation at Randallstown High School. I stand in solidarity with the educators and families of the four

10 targeted schools in voicing outrage over hasty 11 and ill informed reopening. Today in class while

12 discussing the challenges that we face during

virtual learning, I was reminded of something

that my grandmother told me while showing me her

15 ration card from the great depression. She told

me, as I relayed to the class, that our United

17 States asks each generation of citizens at least once to stick together and overcome crisis

19 through sacrifice. Managing the COVID crisis is

20 one of our generation's calls to action, and the

21 sacrifices we make must be with the aim of with my partner who is a fellow educator in a

one-bedroom apartment. To accommodate virtual

learning and have enough space we temporarily

moved back in with my father. The Internet

wasn't up to par, we invested and upgraded equipment and a higher speed plant. Students

told me that my microphone was muffled, I bought

a standing microphone so no learning goals would

be lost. The list goes on. My partner and I

have both spent well above the \$250 deduction cap

11 for educators just in the last month alone. How

12 many on this Board have ever felt compelled to 13

personally buy supplies for coworkers so that they could get their jobs done? There are no

monthly expense reports in our classrooms but

this is our civic duty.

This Board must continue to show respect 18 for the sacrifices of the students and the educators it serves and it must demand truly safe reopening procedures. As a budget crisis looms on the horizon for the county, it must not break

16

17

19

7

9

Page 54
the backs of educators and students to entertain
false choices about economic realities. Our
schools are already run dry of surplus funding.
Advancing creative budget negotiations can be
your sacrifice, and I thank you in advance for

CHAIRMAN CAUSEY: Thank you. Our next speaker is Mr. Ben Begleiter. Good evening and welcome.

rising to our shared challenges.

10 MR. BEGLEITER: Good evening. My name 11 is Ben Begleiter. I am a parent who has a child 12 who attends George Washington Carver Center and 13 my family lives in Towson. Fundamental to BCPS 14 is the interconnectiveness of the district. 15 Through magnet and other special schools students from all over the district come together to 16 17 learn. Teachers and staff as well come from a 18 variety of places in the county and beyond. During normal times this is a benefit that 20 enriches our students and our classrooms. At the 21 present time it is a liability. It means that

been agreed upon and the upgrades underway should we begin to discuss a date for reopening. I want to acknowledge that there is a plan on the BCPS website but from my reading of it, it is wholly inadequate for the question of reopening.

In my limited time I want to focus on just one area. The current consensus seems to be that COVID-19 is largely airborne. This means that the focus of our efforts should be to 10 mitigate those risks, which is largely not in the reopening plan. We need an accounting of the HVAC systems in every building. Do those HVAC systems meet current recommendations? How will 14 students and teachers eat and drink if they 15 remove masks? To do so, will the HVAC systems 16 then blow the virus from one room to the next, 17 potentially contaminating every classroom? Is 18 the district buying appropriately sized HEPA filters for every room? What are the protocols is a student refuses to wear a mask? What is the protocol for students going to the bathroom when Page 57

Page 55

5

11

12

13

14

15

16

17

18

19

20

21

5

COVID-19 won't be contained in a single part of the county but if there are missteps there is widespread exposure that could lead to cases all over the county and beyond.

I signed up to speak today because of the superintendent's letter of September 17th announcing a tentative reopening schedule. I recognize that Superintendent Williams has largely retracted that letter but I still wish to address it because I think it speaks to a real 11 failure of leadership by putting the cart before the horse. The district should focus first on producing a clear concise reopening plan that lays out in detail the mitigation strategies and 15 building upgrades that the district is undertaking, as well as a timeline for the 17 implementation. That plan should then be circulated to stakeholders, parents, students, 19 teachers and staff for input, because each of the 20 stakeholders brings a different perspective that

will make the plan better. Only after a plan has

some research suggests that flushing the toilet causes contaminated fecal matter to enter the air? How is the district going to require increased hand washing? I could go on and on but I have limited time.

To be blunt, we can't afford to get this wrong. We cannot afford to let political pressure dictate the district's strategy for reopening because if we do, children, teachers, staff, parents, grandparents and members of the broader community will die. Thank you.

CHAIRMAN CAUSEY: Our final speaker for the evening is Shae Savoy. Good evening and welcome.

MS. SAVOY: Can you hear me?
CHAIRMAN CAUSEY: Yes, we can.
MS. SAVOY: Oh, thank you. Good
evening, Chairwoman Cause, Mr. Muhumuza and
members of the Board. My name is Shae Savoy and
I teach tenth grade English at Woodlawn High

School, home of the Warriors, and I stand in

Page 58 Page 60 solidarity with the educators and families of the creeping reach. The common sense reversal of the four targeted schools in voicing outrage over a superintendent's insulting and dangerous reentry hasty and ill informed reopening. I am speaking timeline recently proposed is just the beginning. tonight as an educator who is a member of the I stand here tonight as a Woodlawn Warrior and I stand here to demand justice for the targeted Woodlawn community, a community disproportionately impacted by this pandemic. schools of White Oak, Ridge Ruxton, Battle 7 I'll get right down to it. When the Monument and Maiden Choice. The people of these schools are not expendable. I demand real coronavirus reached Baltimore County it burrowed its unsightly head deep into our ZIP code, 21207, justice, the promise that our lights, our 10 health -- (audio cut off). and it has not let up. Tonight six months later when I looked up the county map that shows the 11 CHAIRMAN CAUSEY: Thank you, Ms. Savoy, 12 concentration of COVID cases I found that 12 her time is finished. 13 13 Woodlawn is still maxed out in the middle of the And that concludes our public comment 14 deepest red. But that's just a two-dimensional 14 segment. We appreciate the views of all 15 map, numbers, lines, shades ranging from beige to stakeholders, and I appreciate our staff 16 16 arranging and working through the technical brown to blood red. Peel back the paper with a 17 clean bloodless line and I see an ocean of young 17 issues so that we can connect with our 18 18 faces, their hearts, their poems, their essays, stakeholders. 19 their pencils, their parents, grandparents, Our next item on the agenda is Item G, 20 aunties. I smell dry erase markers and packed 20 new business, action taken in closed session, and 21 hallways of adolescents with their clouds of there was no action taken. Page 59 Page 61 1 So we're moving on to item H, new 1 cologne and sweat. And then I fear the email notification whistling, whistling the messages business, buildings and contracts awards and for that nonstop flooded my inbox over the course of that I call on buildings -- oops, we didn't have the spring, messages from my students or from buildings and contracts. I call on Dr. Scriven parents or from school counselors notifying me and Mr. Sarris to present the contracts. that we lost another family member, another MR. SARRIS: Good afternoon, Madam Chair and members of the Board. We have two items that caregiver, another beloved. Woodlawn has been rocked with grief and loss and if we are forced are sort of more urgent, so we asked that they be to go back before it's safe, Woodlawn stands to added to this agenda, which is not typical. The 10 lose even more. Woodlawn High School with its first item is LKO-400-20, Human Resource and 11 11 approximately 1,600 students and 200 staff Financial Management System Enterprise Software. 12 12 members. The Woodlawn community, home to a high This is a contract modification to provide for 13 13 concentration of essential front line workers. the continued use of our Advantage management Woodlawn, disproportionately impacted by the software, software license fees and ongoing 15 legacies of systemic racism, lack of access to 15 support and maintenance. We are asking approval adequate resources, adequate health care, and a to expand the scope of work to support the 17 system that fights to score for our community 17 implementation of the 12-month pay option 18 instead of against it. directed by the Board on June 11th, and to 19 19 We are Woodlawn strong but we are not increase contract spending authority by \$209,000, 20 invincible. We are unimaginably vulnerable to 20 bringing the revised contract spending authority 21 21 this deadly disease with its insidious silently to 10,545,000 over the next four years and two

months, with one awarded vendor approved by the Board in August 2019.

CHAIRMAN CAUSEY: Board members, are there questions or comments for Mr. Sarris related to the Human Resource and Financial Management System Enterprise Software? VICE CHAIR HENN: Madam Chair?

CHAIRMAN CAUSEY: Yes, Ms. Henn. VICE CHAIR HENN: Thank you. Good evening, Mr. Sarris.

MR. SARRIS: Good evening.

VICE CHAIR HENN: I just have one question. You had mentioned that both of these recommendations were coming because they were more urgent, rather than to the building and contracts committee.

MR. SARRIS: Correct. The board was very specific in its directives that we move with all deliberation to implement this 12-month pay project, and there are a number of milestones that we have to reach in very short order. We've

VICE CHAIR HENN: Okay. And I understand, and thank you for the changes to the template by the way, they are very helpful seeing the information outlined on the contract exhibit form, so thank you for making those changes.

I'm still unclear as to if we had previously approved authority of 10.3 million and what is being requested is a modification for a total of 10.5, the current lifetime expenditures were only 1.5, how does the need for approval of 209,000?

MR. SARRIS: Yeah. The spending authority was pretty carefully constructed when we put it together last, December of 2019 over the next five years, to take into account our regular annual license fees, the inflation cost adjustment that's built into the contract, and even with some allowance for consulting costs, but it was very possible that at some point over the remaining term of the contract this particular expenditure could push us over that

Page 63

4

already met since last spring with employees and the employee groups, and we need to have at least the first major steps in place by July, and this scope of work extends over about a 22-month period, and in order to meet that July 1 of 2022 deadline to have the program fully tested and in place, we need to begin immediately, and that's why we're bringing this forward at this time.

VICE CHAIR HENN: Sure, and as I understand it, approval is asked to increase the contract spending authority. My question is, there seems to be plenty of authority to cover the additional 209,000 being requested given that the lifetime expenditures so far, I believe were 15 1.5 million. So I'm curious as to the need, I guess, for urgency given that there was already 10.3 million previously approved by the Board.

18 MR. SARRIS: We just wanted to make very 19 sure that the Board understood the cost of the 20 program and that they were, would fully support 21 it based on the costs.

limit because it's an estimate, and so we wanted to make sure at the outset and as soon as we knew that there was this possibility, that we bring it to the Board's attention.

5 VICE CHAIR HENN: Sure, and I certainly don't want to delay this project, which is a priority for the Board. However, I don't think we're going to be exceeding the spending authority in two weeks which is when the building and contracts committee meets, so my concern is 11 that this wasn't run through the committee, not 12 the fact that I have any concerns with approving 13 the additional spending authority, that's my only concern, is the need to bring this to the full Board. Is there a procedural issue with making that adjustment that we should be aware of in 17 terms of adjusting the authority to match the

MR. SARRIS: Well, just that the Board must approve changes that exceed \$25,000, so that's why we brought it, because we cannot be

18

19

20

21

scope of the project?

Page 65

Page 66 Page 68 entirely sure that it won't result in this exact Is that just a mistake, is it supposed to be for same approval sometime later on. these years? I'm curious. 3 VICE CHAIR HENN: Okay, thank you. MR. SARRIS: No. This is what's called 4 That's all I have. a piggyback contract or a cooperative agreement, 5 CHAIRMAN CAUSEY: Ms. Jose? and we parallel the terms of that contract when 6 MS. JOSE: I'm actually okay, I think we bring it to the Board. So the contract that 7 Ms. Henn asked some of my questions, thank you. we're using has three years left on it, but we've 8 CHAIRMAN CAUSEY: Other board members? only requested spending authority for the next Okay. Mr. Sarris, if you want to move on to the 9 year. 10 10 next contract? MR. KUEHN: Okay. 11 MR. SARRIS: I saw Mr. Kuehn's hand. 11 MR. SARRIS: So we will have to come 12 CHAIRMAN CAUSEY: Oh, Mr. Kuehn? 12 back to the Board. And it's possible, you know, 13 MR. KUEHN: Thank you. My only 13 when we hopefully return to a typical operating 14 question, and I guess, you know, I agree that 14 environment that we won't need these enhanced there's \$10.3 million left in this contract, or 15 features, and so we may not need to spend this 16 in total, so I don't see, you know, the necessity 16 money further beyond the next year. 17 17 to bring it to us tonight, but that's fine. MR. KUEHN: Okay. Well, thank you for 18 My question that I have is, are you 18 the clarification, because at the top of the form expecting the 209,000 extra dollars to be spent it also says approval is requested for three-year 20 within the next year, is that why you brought it contract, so it sounds like we're signing a 21 forward at this time? three-year contract, but you said that this is Page 67 Page 69 1 MR. SARRIS: No. As I said, it is our specifically \$291,000 for this year only. 2 2 estimate over the next 22 months, and it entails MR. SARRIS: Correct. 3 about 1,100 hours, and it's an estimate at this MR. KUEHN: And we only expect this to 4 be paid and covering one year. point. 5 5 MR. KUEHN: All right, thanks. MR. SARRIS: I am very hopeful that's 6 CHAIRMAN CAUSEY: Other board members the case. 7 before we move on to the next contract? Okay. MR. KUEHN: All right, thank you very 8 8 Thank you, Mr. Sarris, you can continue. much. 9 9 MR. SARRIS: Thank you. Let's see here, MR. SARRIS: You're welcome. 10 10 the next item is CWA-105-21, Google Enterprise CHAIRMAN CAUSEY: Ms. Jose? Licenses. This is a new cooperative contract for 11 11 MS. JOSE: Thank you. Mr. Sarris, you 12 the Department of Information Technology. 12 said this was under your piggyback under the 13 Approval is requested for a three-year contract 13 source contract and these services are with one recommended bidder and contract spending specifically to provide additional technical 15 authority of \$291,000. 15 services because of COVID-19; is that correct? 16 16 CHAIRMAN CAUSEY: Mr. Kuehn? MR. SARRIS: Correct, yes, so --17 17 MR. KUEHN: Thank you. Mr. Sarris, MS. JOSE: Go ahead, sorry. So the 18 18 under the description, and perhaps it's an old original contract, that didn't include this 19 19 description, but it says the contract spending service and this was something that was added on? 20 20 authority is intended for a single year license, MR. SARRIS: Well, what happened was 21 yet this goes through 2023 for a three-year term. that as it mentions here, we're using our typical

- Compass: Our Pathway to Excellence was approved.
- <sup>2</sup> This strategic plan is the foundation of the work
- 3 done in schools and in support of our schools.
- 4 Our presentation this evening is going to focus
- 5 on how we support the opening of schools
- 6 specifically in the areas of learning,
- accountability and results, and operational
- 8 excellence. Next slide please.

Through collaboration across multiple
divisions, Baltimore County Public Schools
authored a new teaching and learning framework,
the BCPS teaching and learning framework outlines

- 13 the expectations for effective first instruction
- and rigorous learning for every child in every
- <sup>15</sup> classroom every day. It is grounded in BCPS
- Policy 0100, equity, and it includes components
- 17 from research and best practices, including
- 18 Charlotte Danielson's Framework for Teaching,
- <sup>19</sup> Mike Schmooker's Focus, Elevating the Essentials
- 20 to Radically Improve Student Learning, and the
- 21 Center for Applied Special Technologies'

Page 79

Principles of Universal Design For Learning.

2 In BCPS all students must have daily access to learning that is accessible, rigorous, relevant and responsive, and that prepares them for their future. This teaching and learning framework clearly articulates the core beliefs and expectations of teaching and learning in BCPS. It develops a common language to facilitate instructional conversations among our educators, students, parents and caregivers to 11 drive continuous improvement. It provides resources to support high quality first instruction and it insures a consistent approach to monitoring teaching and learning. Prior to 15 the opening of schools, this document was presented to our school leaders and it became the 17 seminal work that drives both virtual and

At this time I would like to turn things over to my colleague Dr. Rachel Jones. Next slide please.

face-to-face teaching and learning in BCPS.

DR. JONES: Thank you, Ms. Byers.

Additionally as part of the opening of schools

and aligned to focus area one, we are

implementing new curricula. New curricula in

<sup>5</sup> elementary language arts, ELA, and mathematics,

6 in order to increase student achievement.

7 Students and teachers have access to high quality

8 instructional materials aligned with the rigor of

<sup>9</sup> college and career standards. Updates have been

made for all curricular areas. These updates

11 include revision to scope and sequences to adjust

for unfinished learning, embedded diagnostic

13 tests to support acceleration from unfinished

<sup>14</sup> learning to current grade level standards, and

<sup>15</sup> professional learning on the new teaching and

learning framework.

Specifically new curricula for elementary involves full implementation of Bridges grades K to two, partial implementation of Bridge grades three to five, focused on number corners, and a rollout of Open Court grades two

the school day every day during the first week of

- 2 school. As a direct link to schools, the
- <sup>3</sup> Division of School Support and Achievement
- 4 visited in person or virtually every school in
- <sup>5</sup> the system over the course of the first week.
- 6 This allowed our division to check in with each
- 7 principal or school leadership team to ascertain
- their needs, as well as learn of their successes
- 9 during the first week. Additionally, DSAA shared
- 10 needs of schools across divisions so that chiefs
- could work to respond to and support schools. So
- 12 at this time Dr. Scriven will provide a
- technology update as follow-up information to our
- presentation on virtual learning during the
- 15 September 15th Board of Education meeting. Next

slide please.

DR. SCRIVEN: So good afternoon, board

members, I hope you can hear me okay even though my camera is not working.

CHAIRMAN CAUSEY: Yes, we can hear you, Dr. Scriven, thank you.

Page 87

13

14

16

17

18

20

DR. SCRIVEN: Okay, thank you, Madam Chair. So just to give a high level update from the last board meeting that we had on 9/15, in the last two weeks we've actually distributed an additional 5,000 devices, and that is a combination of new enrollees and also students who had to swap out devices that were not currently working.

In a spirit of transparency, we are rapidly running out of devices, we are now under a thousand, roughly 857 devices. Those devices will continue to go out, we are not going to withhold any devices from students that are in immediate need.

We are also faced with the challenge of, the devices that we still have to repair are our most challenging devices to fix which we saved for the back end. We're poised, however, to be receiving a bulk shipment of devices in the near future, which will most definitely bring relief.

When we look at technology support, we

Page 88

need to look at that through a couple of lenses.

One, due to the shortage, there is a challenge in

tears of swapping out devices in a timely fashion because we just don't have them. And those that

<sup>5</sup> need to be repaired, I just want to bring to your

6 attention that we had approximately 27,000

<sup>7</sup> devices that we had to distribute on the

8 elementary, middle and high school levels that

9 would have been devices -- (audio cut out) --

thank our schools for the triage which they are

doing, and we do thank our families for their

patience, and our stakeholders.

We have definitely been delivering better support as it relates to our call help center. Today for example, we had 254 calls, there was zero weight time in the queue, and there was an average of seven minutes per call in terms of rendering support. If you look at the snapshot of the 25th of this month, we had 470 calls and the average wait time was a minute, so if we show you from one week to the next, we are

Page 89

receiving less calls and we're definitely being
more responsive in terms of the queue and folks
not having to be on time for an extended period
of time. We're roughly closing out 1,100 tickets
per day, and like I said, we're receiving roughly
500, today was only 254 calls, so this is
affording us the opportunity to really chip away
at those tickets that were in the back queue,
we're able to now address them as we are not
receiving as many calls as what we're able to
actually address in terms of checking tickets
off, so we're very excited about that as well.

So that is really high level. When you talk about tech support, it's really in the areas of connection to network, password reset, Google Meet applications, issues with laptop, which is either a broken or nonworking device, which is the majority of the tickets that we're dealing with, or lost or broken chargers. And then of course a smaller percentage of those individuals as they're being enrolled or as the devices are,

13

17

19

20

5

10

11

12

13

14

15

16 17

18

1

2

11

17

a broken screen, et cetera, need to be swapped

When we actually receive the first bulk shipment, we will be moving to a model where we will simply give the laptops directly to the school and students will be able to report to their school in terms of swapping out devices, which will be a lot more time responsive than the current model that we're being forced to operate under based on constraints beyond our control.

So that brings closure and I believe I was the last slide, so at this time I will turn it back over to the community superintendents or Dr. Williams.

DR. ROBERTS: Thank you, Dr. Scriven. Prior to taking questions, we would like to probably update with Dr. Boswell-McComas and her team, to provide a brief systemic update regarding SAT and athletics. Dr. McComas? DR. MCCOMAS: Yes, so good evening,

20 21 everyone. Thank you for the opportunity to Page 90

application process because conditions have been

so varied across the nation related to SAT. So

that's really very short and sweet, I know, but

that is in truth where we are, and I will

continue to bring you updates in working with

Dr. Williams in multiple ways, so thank you for 7

that.

8

14

15

16

17

18

And then in athletics, I know we had a tremendously exciting announcement by the governor, it felt like a long time ago now, but it really was very recent, and in the governor's announcement, you know, the school systems still have the opportunity to determine what is the model that is best for them because we know health conditions continue to be variable across the district. And I'd like to point out that Baltimore County continues to be a higher rate of COVID spread compared to some of the many other districts perhaps on the Eastern Shore or Western Maryland and Southern Maryland, so we have to always take into account our safety context.

Page 91

discuss briefly with you SAT and athletics.

I'll touch quickly on SAT. We do understand that it's important for us to continue to problem solve and try to find opportunities for this year's seniors to pursue an SAT opportunity, as well as this year's juniors to pursue a PSAT opportunity. At this time I wanted to update you that we do have a committee working on that, looking at what our options are still 10 within this fall semester, if you will, and working through what would be the procedures needed to provide different opportunities for those seniors. We have also been exploring how other districts are problem solving this as well, 15 so that's really the update, to assure you that 16 we are still currently exploring those opportunities.

18 I would like to also share that with 19 the, we do recognize that many colleges, 20 thankfully, are working in a more flexible model 21 this year to support seniors and their

Page 93

Page 92

To that end we do have, a return to play committee is assembled and has been digging into what is the feasibility around us adjusting our model, is it feasible, is it safe? And to that end we have been conferring with the health department and we are appreciative, the health department has provided some of the research on models from other states, principally New York and New Jersey, and in that research we're really 10 exploring the risk factor really by sport, 11 because we recognize that some sport are 12 inherently more safe than others when it comes to 13 the spread of a virus. So for example, wrestling of course is a high contact sport compared to, 15 let's say cross country, and so the models that we're really, the research we're looking into is 17 really helping us look at how to examine what are the low risk possibilities to then be able to 19 determine what is safe and practical. 20

In addition to understanding the research and how to proceed forward in the best

17

18

20

21

10

11

12

17

20

21

Page 94

15

17

18

19

20

21

manner, we are also considering all of the inequities that have been and can be exacerbated by a sudden change, keeping in mind the scope of our program. We have thousands of students that play athletics each season. The fall season typically has 4,000 students give or take 500 in either direction depending on the year and the season, so we know with having our previous plan announced of really starting up competitive and 10 in-person activities in the second semester that there are thousands of families that have not yet 12 had their child have their physical yet, which we 13 know just to get into a primary care physician's 14 office is not just a show up at the doorstep and you get it, it takes time and a process for families to get those physicals in place. 16

And additionally, we are analyzing other safety and support systems. So for example, our athletic trainers and our coaches, our athletic trainers, many of the companies that we contract with did furlough athletic trainers for the fall

semester knowing that they would return in the spring, and so there is a process of seeking feasibility around having the safety, athletic trainers available, in addition to coaches that had set up their schedule in a way that they could support virtual in the fall but were planning on in person in the spring. So I share these are some of the many complicated logistics that the back to, return to play committee, excuse me, is working through and exploring in

The other thing we want to keep in mind is also the readiness of our fields and of course the mitigation strategies related to PPE and all 15 the protocols that need to go into place. We certainly recognize and I want to thank, there is many members of the community that have emailed my team and I asking for athletics to begin, 19 asking for athletics to be postponed, raising issues of safety, raising issues of equity, and I just would like to thank everyone for your

to, or I shouldn't say begin, we can continue to reimagine how do we provide low risk opportunities for our students as soon as possible within safe bounds and in light of the

passion and your commitment so that we can begin

governor's announcement that just came the other week. So I know that was a long and complicated response, but that in all transparency is where

we are this process. So thank you. 10

DR. ROBERTS: Great, so thank you, Dr. Boswell-McComas. So Board, at this time we would like to thank you for your time and attention to this presentation, and the team is available to address any questions.

CHAIRMAN CAUSEY: Thank you, Dr. Roberts, and this evening we have a lot of reports and good information that's being presented, so tonight I'm going to go around the dais for board members to make comments and ask questions, with an understanding that some questions may need to be answered fully at a Page 97

Page 95

later date either through a press release or a weekly update or in some other communication path. So with that, we're going to start with Dr. Hager.

DR. HAGER: Hi, everyone, thank you for all of those presentations. Dr. McComas, thank ou especially for your detailed explanation about sports. I reviewed both plans that were released in a lot of detail and I was just wondering if there's a possibility for a compromise plan where student athletes are allowed to practice in person during the fall semester, where then competitive play would start in the spring semester as planned.

DR. MCCOMAS: Yes, so thank you. I think that is something to be considered by the return to play committee, and I agree with you in that, you know, seeking opportunities given changing conditions is certainly something to be considered, and so Dr. Hager, thank you always for that. We too are eager for our students and

Page: 25 (94 - 97)

20

we too recognize how beneficial the opportunity to be together is, and so that is certainly an aspect that the committee has been discussing and will continue to explore. I would be

presumptuous if I tried to make a decision on behalf of the entire committee, but thank you.

DR. HAGER: Is it accurate that if it wouldn't be breaking any MPSSAA, is that how you say that, by doing that, is that a possibility?

DR. MCCOMAS: I do not want to misspeak, Dr. Hager, so I will defer to the committee and that is something that I would rather allow the committee to provide me more details, so I just would not want to speak out of turn on what would be an MPSSAA rule.

DR. HAGER: Thank you. I mean October 7th is right around the corner and that's when this fall season would start, so quite soon, so I appreciate that.

I have one other question from one of the earlier presentations and it was stated that I'm showing a bad network so if you can't hear me, please let me know -- is able to reach out to the school and to the principal and work to get that hot spot replaced. Again, if there's a need for a hot spot then that is a communication between the parent and the school based on the established parameters for issuance of hot spots to get that to them. I'm not sure if you heard me because of my quality.

DR. HAGER: Yes.

DR. ROBERTS: Okay. I'm sorry, Doctor, did you have a second part to that question, the academic support centers? Right, so the academic 14 support centers, we are working in conjunction 15 with Baltimore County Government and certain 16 stakeholders so at this point the timeline for that is beginning to move forward with academic 18 support centers, so that could be an area for additional supports for students who take advantage and aren't able to access the academic support centers, that would be certainly an

Page 99

BCPS, we must have learning that is accessible, 1 that was one of the statements that was made, and I've heard a lot about concerns about the hot spots that were provided to the students and that it's not working very well, and so I don't know if anyone has any comments about the hot spots. And maybe in conjunction with that, the concept of academic support centers I don't believe were discussed in the presentation, but it feels like a possible solution, so I don't know if anyone could comment a little bit on whether that plan is moving forward and could talk a little more 13 about that.

DR. ROBERTS: So Dr. Hager, I can 15 certainly discuss the hot spots. I was just working actually with a principal on the east side relating to hot spots. So the community member who has been issued a hot spot is having difficulty and in this case it was a hot spot that just wasn't working properly. Then they reached out to the principal and -- I'm sorry,

opportunity for kids to receive additional supports from the stakeholders who are manning those academic support centers so that would be, to your point, an additional support opportunity.

DR. HAGER: Thank you. And I have one last question about the SATs and that was, the word that was used, Dr. McComas, was that they're problem solving, a lot of problem solving. Are you referring to COVID safety or are their other issues that are happening with administering SATs right now outside of kind of insuring safety given the COVID?

DR. MCCOMAS: Right. So when I referred to problem solving, I was really talking through all the logistics around exploring what's involved with like a Saturday national test administration, the logistics involved and insuring that there is sanitation safety. We do know that there has been fellow districts that have been walking down this path and looking to understand, you know, learn from their example if

5

20

21

9

10

11

12

15

17

19

21

Page 102

you will, so that was really all the details involved is what I was referring to, there wasn't a specific hiccup, if you will.

DR. HAGER: Thank you, and that's it. CHAIRMAN CAUSEY: Mr. Kuehn? MR. KUEHN: Thank you, Ms. Causey. A quick question about the athletics and the committee that you mentioned. Do you, or has

DR. MCCOMAS: At this point we have not established a deadline because we are working closely in partnership with our health department and so we have not made a hard deadline on that, but we do recognize time is of the essence.

anyone set a deadline for decisions to be made?

MR. KUEHN: Right, because we're a week away from October 7th, so it definitely is of the essence, and my fear is if we don't make a motion in this meeting to force the hand of us moving forward on October 7th to immediately start practice, then we're going to have this discussion on our next meeting in October and

Page 103

14

15

16

17

18

19

20

4

5

12

13

17

19

20

21

possibly the meeting after that, so that's why I asked the question, and I would suggest that the committee set a deadline to have some responses back, because I know that there's questions all over the place and lots of concerns, and there's lots of student athletes who, their final season is moving along quickly for their fall season, and their inability to get out there and exercise and play sports is quickly missing.

Moving on -- I appreciate that.

DR. MCCOMAS: Yes, sir.

MR. KUEHN: I have some questions about book distribution and lack of book distribution in secondary, middle school and high school. I understand that some schools handed out textbooks and novels and some schools did not, and my own personal experience having a middle schooler and a high schooler that received no books until I requested them as a parent, was concerning to me. And my question to you and your team is, why was there not consistency across the system, why do

we not hand books out that are important references for students in this time of the pandemic?

DR. MCCOMAS: Yes, so thank you Mr. Kuehn, for that question. And so in fact the consistency is provided in our digital version of our textbook. Today what is quite common as part of industry packaging is that you have access to digital versions of textbooks in their entirety as well as the ability to buy a set of textbooks, the traditional hard bound textbooks like you and I had as students. So what is very commonplace is that we purchase the digital version for all students so they have access using their devices 24/7, and then we purchase typically class sets for reference, and if the teacher needs to use a textbook to distribute to students for differentiation.

MR. KUEHN: Well, thank you for that, and I am aware that electronic versions are available. I would suggest, and I would again

Page 105

Page 104

ask why some schools handed out textbooks and others did not. Was it just left up to the principal or the administration of each school to make those decisions?

DR. MCCOMAS: Yeah, I think that -- oh, go ahead, Dr. Roberts.

DR. ROBERTS: I was going to say, so Mr. Kuehn, with respect to the school-based --(inaudible, static) -- management, so a curriculum is written and digitized in terms of the resources and the access to school being where our curricula lives, it did provide an opportunity, to your question in terms of some schools giving out different material than others, schools did have instructional material distribution, some working in concert with our staff for equipment and instruction. Teachers knowing and being the experts in their content and knowing what they're teaching, for example one teacher in a school may teach a novel that, from a list of novels provided in the curriculum,

21

Page 106

a teacher in one school may teach it and another teacher may not, they may choose another novel from there.

And again, those novels being able to be accessed through the devices which we know all students have, and also sometimes there are cases where it could be just a class set of resources so schools had to make decisions in terms of what to give out based on equity and making sure all students on a particular grade level or particular course were able to access that material, but also knowing and going back to 13 Dr. Boswell-McComas' statement that the majority 14 of materials are available digitized, so that's the direction that most of our schools went, but 16 there were occasions as you mentioned where 17 certain hard bound materials could be given based 18 on the content, based on the group, based on 19 availability of the material. 20

Mary, I'm sorry, I cut you off.
DR. MCCOMAS: No, that's okay, I was

Page 107

12

13

14

15

16

17

18

19

10

11

12

13

15

16

17

18

19

20

21

just going to say there's always discretion given different communities and different community needs. I am glad, Mr. Kuehn, that you were able to ask and then get the support that you preferred, the hard version versus the digital. I will say that, you know, all families, that they should reach out if they have a need or a preference to that. And I will also, just for the good of the community, like to also add that some of, or I shouldn't say some, many of our 11 digital resources come with additional features so they have translation features, they have read aloud features, and functions that also can support different learning needs and 15 differentiation as well. So I hope that I was able to answer your question in its entirety, and 17 support anybody else out in the community who 18 might be wondering or need support.

MR. KUEHN: Well, thank you. We continue to have discussions about books. I've

brought this up during budget discussions and

questions, and I fully understand that e-books are easy to distribute and they have a lower cost point, but again, and as a parent that was trying to help my stats, my AP stats student last nigh, I did try to use a book on line and I'll tell you, it's extremely frustrating. And those are important references that should definitely be made available to students, and if you could definitely get that message out to administrators across the entire system that when requested, books need to be provided, I would appreciate that.

DR. MCCOMAS: Thank you, Mr. Kuehn. I will never turn down buying books.

MR. KUEHN: Well, good, because you and I will definitely continue to talk about that.

DR. MCCOMAS: Yes, sir, thank you.

MR. KUEHN: So regarding one of the questions, I'm sorry I'm jumping topics here, but when we talk about elementary school and participation and kids being able to attend

Page 109

Page: 28 (106 - 109)

Facsimile (410) 821-4889

Page 108

school, if -- I have a situational question that
I hope someone can answer for me. If a child
only shows up for specials for a day, or multiple
days, what is being reported to the Board about
their attendance, are they counted as attending
for the day?

DR. WILLIAMS: Mr. Kuehn, this is
Dr. Williams. I think we will have to follow up
on that question. That was raised previously and
with the guidance from the State Department of
Education we've been following that, but I think
we're going to have to follow up to those
specific situations happening, like you said
students showing up for specials and then how
that's being recorded, that will be a followup.
MR. KUEHN: Thank you, Dr. Williams.

MR. KUEHN: Thank you, Dr. Williams.
CHAIRMAN CAUSEY: And now Ms. Pasteur?
MS. PASTEUR: Yes, thank you. Good
evening, thank you for the presentations, and I
just have one tide question among several of you.
First of all, Dr. Scriven, thank you for

19

20

16

17

18

20

21

Page 110

addressing some of the questions about technology, they still as you pointed out, do plague us in some ways. It was good and I will be able to go back and deliver the word that folks are still working on making sure that any problems are corrected. As late as Sunday, however, I did hear from a parent who's had no success, so her child has been without the technology since school opened and has not received any support. I did ask her for some very specific details with names, so I can share that with you, but the problem is that, and I use 13 this case, but there are probably households that 14 might well be similar. 15

There are six children of different ages in the household, which means there's no space or opportunity, if you will, to be able to use someone else's, and as Mr. Kuehn talks about, textbooks, you can see where now that becomes a problem, so they're bridging it because now we have no technology to use to do the work on

Page 111

13

14

15

16

17

18

10

13

15

16

17

18

19

20

different levels, so it's just a number of things that we might not always process. So I wanted to share that because I am absolutely certain that there are other families, whether there are a number of children or even two, that might still find themselves in that situation. So I just want to hear, what first line should any of us being be saying, contact the school, should we be sending that information to you? It becomes overwhelming for the parent who's trying to be 11 teacher for several, or even teacher for one, handling technology, needing textbooks or feeling 13 they need the resource, what is the best way, what's the message we should be giving in terms 15 of how to rectify some of these problems? 16

DR. SCRIVEN: So there's a process where they can submit a ticket, which does put them in a holding pattern, so let's be clear. If that is not successful and you know being a former principal just like myself, if I'm contacted by a family then I have an avenue to get it done. So

I would strongly encourage them to contact the

school. The school will work with the executive

director, the community superintendent, who definitely will get in touch with our side of the

5 shop to make sure that we address, especially an

6 extenuating circumstance like that when you have

<sup>7</sup> six children in one family. So, and then you

know there's always, if you contact me directly,

I'm going to address it, so that's not a problem, and that's to any member who may be experiencing

those barriers.

MS. PASTEUR: All right and I thank you

for that. Dr. McComas, I'll just address it to you, this next question. Thank you, Dr. Scriven.

DR. SCRIVEN: Yes, ma'am.

MS. PASTEUR: And Dr. McComas, you can share it with whomever. I'll bridge from the piece I just shared with Dr. Scriven, but there may be other circumstances, so we know that this child is going to be behind, we see that just by the circumstances so we may see as we're trying

Page 113

to get the technology together or whatever is happening, as we are quickly now approaching that date when our children will be going back, and I'm not talking about those special schools, but we're getting to that point and we don't want our children, and certainly we are approaching a grade marking period.

So what would you suggest, how do we advocate for our young people who for one reason or another, mainly not for them, have, because of something that they've done, find themselves moving further and further back, what can we do in this interim period so that we can be assured that when they are back face to face that they're going to feel good about that experience?

DR. MCCOMAS: As always, Ms. Pasteur, you ask profound and compelling questions, so I would truly say that, you know, we are layering in multiple tiers of support, right? So first and foremost, I would share with you that we have done extensive work on the curriculum using and

17

19

20

Page 117

Page 114

developing and embedding diagnostic tasks for our team to be able to very quickly identify where is that unfinished learning, if you will, what are

those critical pathways to onramp a student to

this year's learning standards in the most

efficient way. In addition to that sort of being

a primary layer of support, we are fortunate, we

have been able to bring on, if you recall back to

our August meetings, we were able to bring on

tutoring resources to layer in another support that we can add as an extra layer to support

12 students.

13

14

16

17

18

20

21

12

20

21

It's going to be really critical and then for the spring semester, that we continue to provide all possible layer of support, and quite genuinely, I would suggest that we need to continue to provide extensive supports even throughout next summer for students, because as you point out, each student's case is going to vary in the sense of what their experience has been, to what extent has their family been

so I am certain that this parent has made it clear that there are issues, but still there will be that gap. So I'm just hopeful that as we're moving forward, we're also having those discussions with our teachers and at school-based administrators, asking for some names and areas

struggling, they will also know those children

some time. Now this is a very assertive mother

who like this last child have not been on for

10 where some weaknesses have been seen, so that when we see them face to face, we are a little

12 better prepared. Thank you.

DR. MCCOMAS: Thank you. 14 CHAIRMAN CAUSEY: Mr. Offerman?

15 MR. OFFERMAN: Yes. I have a concern 16 about when we come back to in-person instruction,

17 is there plans to do specific training for social

18 emotional issues when students come back who may

19 be concerned or afraid of the possibility of, you

20 know, of having health issues, is there any

specific training that we're doing with staff,

Page 115

13

impacted by COVID, to what extent is their own

individual neurology maybe accelerating or

struggling, and so Ms. Pasteur, it is complicated

question that you pose, and genuinely the best

response I can give you is that we know that we

have built out and will continue to analyze how

to provide multiple tiers of systems of support

for our students and that really needs to be, I

know people get tired of me saying this, but we

10 need to look at each child to figure out what

11 exactly is the layer of support that they need.

MS. PASTEUR: Dr. McComas, thank you for that answer, and you know, I like to stay in my what space, but may I suggest that since we are 15 doing, I'm going to call it virtually live, okay, because the children now do have teachers, that 17 that's our starting point so we don't have to wait until the children come back, that certainly 19 those teachers will know already who the children are, they're getting ready to grade them, so they

will know who some of the children are who are

either the classroom teachers and/or guidance and/or other school-based people to try to prepare for this? Thank you.

4 DR. MCCOMAS: So yes, Mr. Offerman, we have at the beginning of the year provided specific professional learning related to understanding the social emotional needs. Based on our COVID context, we continue to customize and build out professional learning to support social emotional needs throughout the semester and that will continue throughout the year.

MR. OFFERMAN: Thank you.

CHAIRMAN CAUSEY: Thank you, and board members, I would just alert us to, that we are running quite behind and that if board members can make their questions and comments, and then the Dr. Williams can have staff follow up with that additionally, not just to the board members, but also to find a public way to answer these questions for our stakeholders. So with that, Mr. Muhumuza?

11

18

21

MR. MUHUMUZA: Hi, good afternoon, everyone. So I'm going to cut some of my questions down to just ask the important ones. So in terms of the sports seasons, the MPSSAA, I believe it was last week, I'm still, I don't understand, when they say sports can reopen, are they talking about the season, and would that mean if we don't reopen, we would not be able to participate in any like state competitions or any other competition that is run by MPSSAA, I think I learned that right, so would that affect our 12 sports competitions?

DR. MCCOMAS: So thank you, 14 Mr. Muhumuza, for that. I think it would be best if I have the committee put into writing what are 16 those implications. The announcement in short allowed school systems to make adjustments to their plan and to begin competitive seasons in the fall if they so chose to, and I think that's probably the most brief response I can give you at this point, and I'll work with Dr. Williams of

Page 119

course to try to provide a more detailed response for you, given the time. Thank you.

MR. MUHUMUZA: And I do also hope that you guys discuss, I believe Ms. Hager, Dr. Hager mentioned about allowing sports to condition in person, I think that would be a great step forward if the in-person season doesn't happen.

My other question has to deal with the SATs. Does the county have the fiscal capabilities to provide free SATs to all students?

DR. MCCOMAS: Historically we have provided the SAT day where the cost is covered for our students. That is part of the analysis, 15 if you will, that our team is working through, because the conditions are so different this year but I will just tell you, historically we have been able to do that, we've been very fortunate to offer a school day SAT free to our students, so thank you.

MR. MUHUMUZA: Okay. And in terms of

Page 120

like the kinds of tests, I guess, does College Board refund the money that students spent signing up for a test that were it cancelled or were they not able to take it?

DR. MCCOMAS: Yes, if students had signed up for a site and that site was cancelled, the College Board would work through their standard refund process, I don't personally know all the details of the College Board fine print, but that would undoubtedly be part of their practice.

MR. MUHUMUZA: Okay. And my last question is for, I believe it was Mr. Sarris, about the devices. Mr. Sarris, I think you might have mentioned this but I think I missed it. The new devices you said were delivered, were they rented or like were they bought? I think you might have mentioned this, I must have forgot.

DR. SCRIVEN: Okay, Josh, I don't think that was Mr. Sarris, that was probably me, Dr. Scriven that was speaking to that.

Page 121

MR. MUHUMUZA: Oh, Dr. Scriven, sorry. DR. SCRIVEN: That's okay. Can you restate your question around the devices? No new devices have been delivered yet, but the bulk

delivery that we are expecting are going to be devices which we have actually purchased and they are not leased devices.

MR. MUHUMUZA: That was my question, because I believe that the devices that we have now, that we have had for like the last couple of years, that they are leased, right?

DR. SCRIVEN: Yes, that is correct. MR. MUHUMUZA: Okay, thank you.

CHAIRMAN CAUSEY: Ms. Henn? VICE CHAIR HENN: Thank you. Good

afternoon, or evening, sorry, good evening, everyone, thank you for that presentation. I have one question, but it's one that I believe is

19 on a lot of stakeholders' minds, and that is, 20 this period of virtual learning feels indefinite

to most stakeholders, it's marked by uncertainty,

8

9

17

18

20

21

15

17

Page 122

individuals are uncomfortable, it's marked by a lack of information, discomfort and fear. My

questions are how and specifically when will we

move from this place of uncertainty to one of

information, confidence and certainty, and what would you say to stakeholders to reassure them

that the school system's focus is on a safe

return to in-person instruction?

DR. WILLIAMS: So Ms. Henn, I'll try to respond. I think for the virtual learning, this is Dr. Williams, that the collaboration and work with the local school and the school leadership 13 to try to mitigate the concerns or questions, 14 that's the first step that our school staff and our leaders have been really working hard to make virtual learning a reality. In terms of the 16 uncertainty and fear as we go through this year, we will continue to work with our health department. We don't know later on in this year or this semester what the conditions may be. We

fear is brought through the absence of information, and individuals are looking for reassurance that the school system's focus is on the return to in-person instruction, especially for the families of our most vulnerable learners for whom virtual learning is not working. They want to see the light at the end of the tunnel, they want to see that our focus is on returning to school, they want to see that steps are being made to make sure our schools are safe. Our 12 teachers want to be back with their kids, they want to see what steps we're taking, and there's a void in the information that's being provided. So my question, you know, about what would you say to them to reassure them that that is our focus, can you elaborate on your response to that

because as I mentioned, that uncertainty, that

DR. WILLIAMS: Well, again, it is the work that we're doing with our design team and the desire to make sure we are providing updates

Page 123

17

19

20

steps, and so I think what we can say is our

<sup>2</sup> COVID-19 work force, our collaboration with the

will continue to communicate what we know or next

Department of Health, they've been great partners

to help guide us. The metrics that were

presented from the state, so you know, folks want

to know that we are collaborating, we're

communicating and that we're looking at the

safety measures in whatever we do to make sure we

are preventing or lessening any situation, so I

think right now that's a big question -- (audio

cut off) -- go along as we know more 11

information. It's kind of like what happened in

the spring, the more information we received we

responded to, so thank you for that question.

VICE CHAIR HENN: Thank you,

<sup>16</sup> Dr. Williams, and thank you for mentioning the

work, because we know that a lot of outstanding

work is happening, we know how hard individuals

19 are working behind the scenes. What would

20 provide a lot of reassurance is some insight into

21 that work and some visibility into that work Page 125

as to what we know and how we're trying to move

forward. Again, that's been kind of the work

beyond what you've already commented?

that we learned back in the spring and that is

the goal, that we constantly provide some kind of

update as we're moving through this timeline of

first semester, what this may look like, and so

it is our commitment to constantly work with our

design team, our stakeholder groups and the

COVID-19 task force to provide updates when

appropriate.

VICE CHAIR HENN: And do you have a target goal for when the Board might expect to see a more detailed timeline or return plan, not that that would be in stone, but a target draft timeline?

DR. WILLIAMS: We were modifying and looking at the feedback, we're getting the surveys, so we're surveying our students, having focus groups with staff as we mentioned earlier, as it was mentioned earlier with the small population of students we want to look at. And

Page 126 Page 128 so it's fluid right now, but I would say we School. If I had not won the election, I had hoped to still be working as an athletic should have a modified tentative plan, again I must echo it is tentative, it's likely to change director. Therefore, I'm very much aware of the based on more data that we receive and more dozens of variables affecting the live start of information and then guidance from our health fall athletics. I give 100 percent of my support department. I don't want to over promise the to the committee analyzing these very varied Board, but we constantly will provide updates. topics. I would like to thank all of the members 8 VICE CHAIR HENN: Of course, and what is of the committee, all 24 athletic directors, the tentative date for that plan expected, when Mr. Sye, Ms. Mitzel, Mr. Kressman, Ms. Marston in the Office of Athletic, and all of our did you say that would be expected. 11 DR. WILLIAMS: We are looking at approximately 1,800 year round coaches. Thank 12 12 you. gathering, so we're gathering, we're doing the 13 13 survey for our families, so that's October 2nd CHAIRMAN CAUSEY: Thank you, 14 through the 9th, and then we're working with 14 Mr. McMillion. Ms. Mack? 15 MS. MACK: Yes, thank you, Ms. Causey. staff to address questions as much as we can, and 16 16 so we were looking at a November timeframe, but I just wanted to add a little bit to what 17 17 again, that is still up in the air as we continue Ms. Henn said and then I have a question about 18 18 to look at the data that we're receiving. SATs. In the thousands of emails that we've 19 VICE CHAIR HENN: Thank you. And the received and the speakers that we heard tonight, 20 Board meets on the 13th, so I will be requesting I hear frustration and fear that I think could be 21 an update on it at that meeting, but thank you ameliorated somehow if we did provide more Page 127 Page 129 for that information. That's all I have, Madam 1 specificity. I think people want to know, have 2 Chair. we inventoried our schools, do we know what 3 condition our HVAC is in? Do we have filters CHAIRMAN CAUSEY: Ms. Jose? I will go 4 last, so Ms. Jose? that will filter out as much of the air particles 5 MS. JOSE: No, thank you. as they can? Which one of our schools have 6 CHAIRMAN CAUSEY: So no questions, windows that open versus windows that don't open, Ms. Jose? because we could open windows to at least get 8 MS. JOSE: Yes. Just thank you for the fresh air in there. When will we talk about how much PPE we have and how teachers will use it, information, Dr. McComas. No questions at this 10 time, thank you. and whether we will hand it out for students, and 11 11 CHAIRMAN CAUSEY: Okay. Mr. McMillion? that kind of thing. 12 12 MR. MCMILLION: Can you hear me? And then like specific questions. I 13 CHAIRMAN CAUSEY: Yes, sir, we can. 13 have teachers say to me all the time, if I'm MR. MCMILLION: Okay, great. I know I willing to return to school and 20 of my 27 15 get, I've got one comment to make, I know I get 15 students are willing to return to school, how can excited and I speak fast and I'm loud, but I'm I distance, safely distance those 20 kids in my 17 going to try to slow down so people can hear what 17 very small classroom? So I guess I'm echoing I say. As a lot of you know, I'm a retired what Ms. Henn said. I think the more information 19 19 physical education teacher and athletic director. that we can provide, the greater our ability to I'm 22 months removed from working as the 20 allay the concerns that people have, because we 21 athletic director for 25 years at Chesapeake High will be going back to school at some point and we

20

hopefully will have the virus under control, but we need to be able to say to people that we will keep you and we will keep our students safe, and I think there's some missing pieces there. And I don't need an answer, I just wanted to make that comment.

I do have a concern about the SATs. It's been a number of years since I managed that process with my own children, but what, are we not impacting students' ability to apply for colleges if we do not have SATs soon? I know 12 Dr. McComas, you said there's a committee that's looking at this, but I know other school systems 14 are offering SATs, and I think we're disadvantaging our students if we don't have a plan that comes up with SAT days soon for our students so that we give them the data they need to get into the colleges to which they're

DR. MCCOMAS: So, I'll just very quickly say, Ms. Mack, that I do hear your concern. That 2 MS. MACK: And will you be providing an update in the next board meeting?

DR. MCCOMAS: I will be working with Dr. Williams to provide updates and so whether that is in a board meeting or a weekly update or in whatever format, we, I always work through Dr. Williams for, because we know that there's many things happening all the time.

MS. MACK: I just have one more point and then I'm finished. Are we disadvantaging our students? I know you said many colleges are being flexible and everybody needs to be flexible in this time of COVID, but when other school systems are offering SATs and their students are applying to the same schools our students are applying to, and our students have not taken the SATs, are we disadvantaging them?

DR. MCCOMAS: Ms. Mack, your question is really posed from the college level, so if I were a college admissions director would I

Page 133

Page: 34 (130 - 133)

Facsimile (410) 821-4889

Page 131

is why we have a committee that is exploring what is the possibilities and how do we provide opportunity for our seniors especially. I will say that there is tremendous flexibility occurring this year at the college level around admissions and not necessarily requiring SAT as they have done traditionally. That of course varies college by college, but we are seeing tremendous flexibility in the college application this year related to SAT. Nevertheless, however, 11 we are seeking to figure out to how to provide opportunities for our seniors should they find themselves applying to a college that has less flexibility this year, so we too do understand 15 the urgency and importance of it and that's part of why we're working to figure that out, to 17 support them, but thank you, Ms. Mack. 18 MS. MACK: Do we have a date by which 19 we'll have an answer as to what we're going to do

DR. MCCOMAS: I do not have a date for

disadvantage a child who does not have an SAT because they lived in a COVID-saturated environment compared to a child who did not and had the SAT, I cannot answer how a college admissions person would compare those two different scenarios. I can say that we are working to figure out an opportunity for our seniors so that they would have, to be able to put that on the table if they were in a college 10 that would not exercise any flexibility.

MS. MACK: All right, thank you very much. DR. MCCOMAS: My pleasure, thank you.

CHAIRMAN CAUSEY: So I'm just going to jump in here because this has been a consistent issue amongst all the board members just to clarify some issues. There are districts right next door to us that are implementing SATs within their buildings for their seniors on October 14th. College Board has committed to getting tests scored within two weeks. They have

with our seniors this year?

20

Page 134 Page 136 committed to doing the score with the writing -you that, because we now with the COVID pandemic excuse me -- okay, with the writing shortly after and of course no one could have foreseen that, that. So the answer is it is being done, it can but nevertheless, we are reliant upon devices and be done in Maryland. It is not up to the Board remote learning. So I am curious as to if the of Education and the Baltimore County Public team has some information they could share with Schools to rely on the compassion of college us as to how that will impact our students when admission agents, it is our duty to provide for we return to the schoolhouse, will that device our students according to our Policy 0100, reduction ratio immediately go into effect? equity, to give our students what they need to be Because as we talk about equity and what was so successful. And if what they need to be eloquently said as far as the SAT and things like successful to compete at a high level for that, and making sure that our children are taken colleges or because maybe they've had medical care of in that aspect, I want to make sure that 13 our youngest children and our earliest learners illnesses that have not given them the grade 14 14 point average or the opportunity to move forward are also taken care of. So I guess that would be 15 with rigor and their SAT score is going to make a question for Dr. Scriven. Thank you. 16 16 the difference, yes. We are not doing the best DR. SCRIVEN: Yes, ma'am, so thank you 17 17 by our children if we do not provide this for the question. We are poised that once we 18 opportunity. I am confident that Dr. McComas and 18 receive our outstanding devices, we will be able 19 that team can provide this opportunity for our to provide K through 12 on a one-to-one ratio, so children. 20 20 that's the short and sweet of it. 21 21 MS. SCOTT: I'm sorry. So although a So I would just like to say that we look Page 135 Page 137 decision for this Board was to reduce that for K forward to hearing more from Dr. McComas and Dr. Williams about how we are going to provide to three to five to one, upon returning back for our children what they need. So we're going you're saying that students will still have the 4 one to one ratio? to move on. Ms. Scott? 5 DR. SCRIVEN: Unless the Board deems to MS. SCOTT: Yes, thank you. My question 6 keep a five to one. is again, one, I think that the athletics has 7 been thoroughly vetted and spoken about by MS. SCOTT: Okay. All right. Thank 8 Dr. Hager, Joshua Muhumuza, and also by Rod you. 9 McMillion, so thank you for that. DR. SCRIVEN: Yes, ma'am. 10 10 My question is in regards to the device CHAIRMAN CAUSEY: So going back to 11 ratio. I know that this current Board, one of decisions made by the Board related to the 12 12 the decisions that this Board made was to reduce operating budget and device ratios, the Board did 13 the student-device ratio for children in grades support the superintendent's recommendation for kindergarten to third to five to one. And what the device ratio at the time, which was before 15 I'm wondering is because Dr. Scriven spoke about 15 the pandemic, so certainly the Board will consider Dr. Williams when we are in the recovery the devices and ordering devices, but what I 17 would like to know is how that will factor in 17 mode what is the best path forward for the school once our students return back to schools as has system and for the students given the resources 19 19 been talked about, returning back to the that we currently have, so thank you. 20 schoolhouse. Will that device reduction ratio go And Ms. Rowe? 21 21 into effect and if so, what is the timeline for MS. ROWE: Yes, hi. I have a few

Page 138 Page 140 questions. with the Department of Health for Baltimore 2 CHAIRMAN CAUSEY: Ms. Rowe, it's hard to County. In our task force meetings we address 3 concerns for safety as they come up, and that hear you. MS. ROWE: I'm sorry. So one of the group meets every week, and part of our work is 5 questions I have is some students have purchased planning, looking at details. We are now looking their own devices and if we're short of devices at planning visits not only to the four schools are we considering asking students who have but other offices and schools to do mitigation devices at home to return school system devices checks to give feedback on practices, what's if they're not using them at all? being done well and what can be done to improve 10 10 DR. SCRIVEN: Ms. Rowe, can you restate mitigation practices. 11 that question one more time please? 11 MS. ROWE: Okay, so the health 12 MS. ROWE: Some of the children have 12 department is involved in this entire process? 13 13 purchased their own devices and since we're short DR. ZARCHIN: We have worked with the 14 on devices, have we considered asking students 14 Department of Health for Baltimore County every 15 15 who have their own devices to return the school step of the way since we left in March. 16 16 system devices if they're not using them at all? MS. ROWE: Okay, thank you. 17 17 DR. SCRIVEN: That is something that we DR. ZARCHIN: You're welcome. 18 18 have not considered at this point, but would CHAIRMAN CAUSEY: Thank you, 19 definitely be worth investigating if that indeed Dr. Zarchin. And as I said, I was saving my 20 20 is the case. comments until the end and what I'm going to do 21 MS. ROWE: Okay. And Ms. McComas, will is just down a list of information that I think Page 139 Page 141 you clarify, are students reading novels and based on the input that the Board has received in textbooks on screen in addition to all the screen thousands of emails, the public comment that we heard tonight, and also additional questions from time for classes when they could have physical 4 books? board members, one, I would like to see answered 5 DR. MCCOMAS: Hi, Ms. Rowe, thank you in a public fashion the concerns and comments for that question. It's a combination, so we do addressed this evening by our chair of the have novels available digitally but they also Special Education Citizens Advisory Council have hard copies, and so that can really come concerns. We have also received a number of 9 down to a learner preference. emails from parents around special education 10 MS. ROWE: Okay. And this is my last concerns, so I would like the see those answers. 11 question. What recommendations or guidance has And I would like to see maybe a frequently asked 12 the Baltimore County Department of Health made 12 question section, I know that we had that, 13 before schools can safely begin to reopen, and Dr. Williams, before, where parents can go and does the health department agree with reopening see answers to real questions. I would also like 15 the four special education schools, and with what 15 to see it being addressed to the Gifted and 16 safety measures? 16 Talented Citizens Advisory Council. 17 17 DR. MCCOMAS: I think that's a broader I did want to say we are doing better 18 18 question than just for me. We do confer with the and I am so pleased, Dr. Scriven, with the 19 19 health department all the time. improved help desk calls, the work tickets, that

DR. SCRIVEN: Dr. Zarchin?

DR. ZARCHIN: Yes. So we meet regularly

20

21

20

is the key for equitable access for our students

is to have the access to technology, so thank you

Page 142 Page 144 for those tremendous results. PTA presidents, to really round that out in terms 2 DR. SCRIVEN: Yes, ma'am. of garnering all of the experience, passion and perspectives that we have, because we have CHAIRMAN CAUSEY: Sports are obviously a big concern but also what has been mentioned, or received a tremendous amount of input, we want to 5 what was not mentioned but I know that board respect that, we want to value it, we want to use members and parents and teachers who are involved it, and we want to let people know how we are in these activities are concerned about is those using it. So thank you for that. extracurriculars for our students. Not all 8 And we are now going to move on to the students are involved in sports, some students next item on the agenda which is the report on are involved in robotics, coding, student the opening of schools, and -- excuse me -- the government, all of these other opportunities, report on the 2019-2020 student performance these clubs that they have, to have those report. And for that we have Dr. McComas and Dr. Wheatley-Phillip. 13 connections, something where they can find joy, 13 14 14 feel normal, so I would like to see also in your DR. WHEATLEY-PHILLIP: Thank you, good 15 return to play committee that there is also a evening, we're just waiting for the Power Point 16 16 corollary in terms of returning to to load. 17 17 extracurriculars. CHAIRMAN CAUSEY: Good evening, thank 18 18 And I was very encouraged to hear from you. our CTE representative about the small cohorts 19 DR. WHEATLEY-PHILLIP: So good evening, 20 getting back into the CTE programs. Because we 20 Chairwoman Causey, Vice Chair Henn, 21 do, we have specialized equipment for those Superintendent Williams and members of the Board. Page 143 Page 145 1 students to learn the skills they need to Tonight we present the annual student performance 2 2 advance. report. Next slide please. 3 3 Tonight's presentation was developed to Additionally, I wanted to thank, along with Dr. Scriven, the schoolhouse leaders and serve two key purposes, to provide you with an families for making these differences. update of performance trends and gaps, and through this analysis to explicitly connect the And lastly we have, thank you, Dr. Williams, for the updates that you are data with systemic initiatives, priorities and providing to the Board. You had shown us the action steps that were developed to raise the design team and the COVID response team bar, close gaps and prepare our students for the membership, and I would suggest that you add a future. While much data will be shared, this is 11 a fluid process because in this COVID era and 11 few more folks to those. I saw only one 12 principal at the high school level and while during the first month of school, many decisions are still evolving and will be made in response that's phenomenal, I think it's also very important to have a middle school principal, an to conditions that unfold. For this report we 15 15 utilized the data that were available given the elementary school principal, and I also think

17

19

20

21

it's important to have someone on that design

else that is specifically focused on that

team, I did not see Mr. Michael Sye or someone

athletic portion and someone that is focused on

those extracurriculars. I would also recommend

having a parent, a couple parents, sport booster,

17

18

19

20

21

many assessments that were cancelled in response

to the impact of COVID-19 and the closing of

schools. There may be questions that linger and

written executive summary that is aligned with

this presentation and we will follow up as

so we have developed and provided for the Board a

directed by Dr. Williams. Next slide please.

The Compass: Our Pathway to Excellence is divided into five focus areas, the goals, key initiatives and strategies provide for our students a foundation for equity, access, opportunity and achievement. The targets and measures provide benchmarks for progress monitoring and feedback for continuous improvements. Next slide please.

There are many types of assessments.

Formative assessments provide short cycle feedback and ongoing support during the learning process. Summative assessments provide systemic analysis of learning after longer intervals.

Next slide please.

In comparing assessments, there are norm-referenced assessments which tell us how students perform who are at the same age or grade level. There are also criterion-referenced assessments which compare achievement to a standard or pre-established benchmark. Both

Page 147

provide data and contribute to a body of evidence used in making high level decisions. Next slide please.

4 As you know, the state of Maryland replaced the PARCC assessments in the past two years. MSDE created an umbrella of assessments under the MCAP name. While the tests vary by content area they all fall under the MCAP name. There's an entire suite of MCAP assessments. The 10 KRA assessments are given to all incoming 11 kindergarten students -- (unintelligible, 12 background noise) -- provide us with a measure of 13 kindergarten readiness. There are also alternates assessments which are state 15 assessments in ELA, math and science that are 16 administered to students with cognitive 17 disabilities who are unable to participate in the 18 MCAP assessments even with accommodations. For 19 our English learners the Access for ELLs

assessments which are given to all ESOL students

in K to 12, and measure English language

proficiency in listening, speaking, reading, writing, oral comprehension and literacy. The MISA integrated assessments are given grades five and eight, and they help us measure student achievement in science.

The following four assessments are high school testing requirements for graduation. The English language, ELA assessments are given in grades three through eight and in grade ten. The math assessments are given in grades three through eight and at the end of Algebra I. The high school government assessment is given at the end of U.S. Government. The high school MISA is a state science assessment which is given at the end of the life science course; this is a high school testing requirement for graduation and has replaced HSA biology.

In addition to state MCAP assessments,
BCPS requires students in grades K through eight
to take the Measures of Academic Progress or MAP
reading and math assessments. These assessments

Page 149

provide us with valuable information on how -- (inaudible, static) -- year with the MAP assessments we get immediate results and the assessments allow us to see how our BCPS students are doing in comparison to a national group of students. Next slide please.

As you know, the testing landscape for the 1920 school year unfolded very differently than anticipated. We administered the MAP assessments which provided standardized growth and achievement data for students in kindergarten through grade eight. These assessments show that students in grade K through five have had relatively consistent achievement at or above the 61st percentile over the last three years in both reading and math. The winter MAP reading and math data for all elementary students when compared by student group indicate that the greatest gaps in achievement are evident among five main student groups, students who are

English learners, students receiving special

20

3

4

10

11

12

Page 150

education services, students who are Hispanic,

- students who receive free or reduced meal
- services and students who are black or African
- American. While our math data show the same gaps
- across the same student groups as with our
- reading data, in the area of math fewer students
- are performing at or above the 61st percentile
- compared to reading. The total number of test
- takers in reading was 51,141, while the number in

10 math was 51,655. Next slide please.

11 When we examined the MAP achievement 12 data for students in grades six through eight, 13 students have demonstrated relatively consistent 14 performance with a slight decrease in the percentage of students at or above the 61st 16 percentile over the last three years. MAP winter 17 reading and math data for all middle school

18 students when compared by student groups indicate

the greatest gaps in achievement are evident with

20 the same five student groups. For all students

21 who completed the MAP math assessment, typically

Page 151

one-third less demonstrated achievement at or above the 61st percentile compared to their performance in reading. Next slide please.

The information on this slide provides the number of years students are enrolled to receive English language learner services at the elementary level. The acronym ACCESS stands for assessing Comprehension and Communication in English State to State for English language learners. The ACCESS assessment is administered annually to determine student level of language attainment in a number of domains, which include listening, speaking, reading and writing.

English learners, including those who have waived

ESOL programming supports are assessed annually

until they meet the proficiency level of 4.5.

17 There are six language proficiency levels,

entering, emerging, developing, expanding,

19 bridging and reaching. An examination of the

20 total number of test takers shows that there has

been an annual increase in the number of students 21

Page 152

assessed by ACCESS annually. There has been an

increase of over 1,000 students between the 17-18

and 18-19 school years taking the ACCESS

assessments. This positive trend mirrors the

overall enrollment increase for English learners.

Not only are more students taking the assessment,

but the data indicate across the elementary grade

levels that students typically demonstrate higher

levels of English language proficiency in the

10 intermediate grades. Next slide please.

11 The information on this slide includes 12 the number of years students are enrolled to 13 receive services at the middle school level. 14 Across grade levels there has been an increase in 15 the percentage of English learners earning a 16 composite score of four or higher. In the 19-20 school year fewer English learners in grade six 18 through eight earned a composite score level of four or higher compared with the previous two years. As students meet the proficiency level of

Page 153

have exited and no longer required to take this

ACCESS assessment. An examination of the total

4.5 or higher on ACCESS, they are considered to

number of test takers shows there has been an

annual increase in the number of students

assessed by ACCESS annually. There has been an

increase of over 400 students between the 17-18

and 18-19 school years taking ACCESS. This

positive trend mirrors the overall enrollment

increase for English learners. Next slide

please.

10

11

13

17

18

19

20

The information on this slide tells the number of students enrolled to receive services at the secondary level, specifically grades nine through 12. Across grade levels English learners demonstrated higher levels of English language proficiency in grades 11 and 12. It is important to note that the grade 11 and 12 English learner groups have fewer students in each cohort compared to the cohort sizes in grades nine and ten. These data are reflective of the dropout

rates that are higher for English learners

**Proceedings** Page 154 Page 156 compared to all other student groups. An students for college and careers upon graduation from high school. Students can meet CCR for both examination of the total number of test takers shows there has been an annual increase in the ELA and math by meeting criteria set forth in the number of students assessed by ACCESS annually, MSDE CCR tool kit. For our students who exited specifically over 400 students between the 17-18 grade 12, a higher percentage of BCPS exiting 12th graders earned a CCR ELA designation than in and 18-19 school years taking the ACCESS assessment. Next slide please. math. More than 70 percent of our Asian and 8 white students earned the CCR ELA designation in In consideration of our commitment to college and career readiness, which is outlined the 18-19 school year. The percentage of in the Compass, BCPS's four-year adjusted cohort Hispanic Latino students earning the CCR ELA graduation rate has exceeded Maryland in the designation has increased 4.9 percentage points 12 12 16-17, 17-18 and 18-19 school years. The between 16-17 and the 18-19 school years. Our 13 four-year adjusted cohort graduation rate African American black students have seen a 6.9 14 provides a measure of the percentage of students 14 percentage point increase during the same period. that successfully completed high school in four Students receiving free and reduced price meals 16 16 years with a regular high school diploma. The have shown a steady increase of 8.2 percentage 17 term adjusted cohort means students who entered 17 points since the 16-17 school year. It is 18 18 grade nine plus any students who transfer into important to note that the 1920 data are not yet the cohort in grade nine and 12, minus any available. Additionally, due to the COVID-19 20 students who are removed from the cohort because related school closures, certain assessments were 21 they transferred out, moved out of the country or not administer, including SAT day for 11th Page 155 1 were deceased. There are three student groups graders and the MCAP ELA 10 in the spring of 2 2020. Next slide please. whose four-year adjusted cohort graduation rates 3 For our students who exited grade 12, have exceeded 88 percent since 16-17. They are

Page 157

Asian, African American and/or black and our white students. While there is still much needed improvement, graduation rates for English learners and students receiving special education services have been steadily increasing since 16-17. However, for our Hispanic or Latino 10 students and students eligible for free or 11 reduced meal prices, I'm sorry, free and reduced price meals or FARM students, we see a decline in 13 graduation rates over the past three years. The four-year adjusted cohort graduation rate for the 15 1920 school year will not be available until after the February State Board meeting. Next 17 slide please. 18 CCR is a measure of college and career readiness mandated by the College and Career 19

Readiness and College Completion Act of 2013.

This act requires Maryland to prepare all

math continues to be an area of focus as there have been declines in the percentage of existing 12th graders who earn CCR math designation across all student groups and overall between the 16-17 and 18-19 school years. While the data show a decline from 7,372 to 7,128 students over a three-year span, the student groups who increased in exiting counts are Hispanic and English learners. In the next slide Dr. Boswell-McComas will describe how we are working to raise the bar, close gaps and prepare our students for college or careers. Next slide please. Dr. McComas. DR. MCCOMAS: Yes, thank you. If I could get the next slide, thank you. We are striving to raise the bar despite the global

pandemic and as parents and board members you

remain committed to insuring that we have a

20

8

their careers.

Page 158

strategic pathway to excellence. You would like to know and have confidence in how we will proceed to address the immediate and long-term system improvements. I will share with you how we are raising expectations while at the same time closing gaps and preparing our students for their future success in college and ultimately in

9 Last year we revised the Baltimore County Public Schools teaching and learning framework as Ms. Byers referenced earlier to that 12 this evening, and this sets forth our learning 13 accountability and resolve, and specifically what 14 do we believe about teaching and learning in BCPS 15 and based on those beliefs, what are our 16 expectations for daily instruction and ultimately 17 what qualitative and quantitative evidence will 18 we check and monitor to measure progress towards meeting those expectations? We know and have 20 strengthened our focus on standards-based high 21 quality initial instruction through a combination

that the work will at times be challenging and we believe that we will overcome those challenges. We are focused on identifying gaps and implementing targeted programs and responsive interventions to supplement high quality first instruction. Specifically, we never stopped offering instructional supports through the multitiered system of academic support offered in our summer programs as described in our last board meeting. And furthermore, we've leveraged research from the New Teacher Project to guide 14 our work in developing diagnostic tasks embedded 15 in each key core content and grade level to 16 support teachers in identifying that critical pathway to standards performance in order to 18 accelerate learning rather than to be caught up in a default deficit model. This serves as our realtime data in the form of student work product that drives individual and small group Page 161

structures and systems that promote access and

opportunity for all of our students. We know

Page 159

2

12

13

14

15

17

19

20

21

of actions such as investing in SR rated and high quality evidence-based instructional materials that support foundational literacy such as Open Court, and disciplinary literacy such as our reading apprenticeship, and that support foundational mathematics such as our Bridges materials. We additionally have invested in professional learning to support calibration to standards across all grade levels and content, 10 and we have expanded dual enrollment opportunities with colleges and universities. 12 Ultimately our service improvement teams will continue to guide our progress through research and innovation, insuring that progress is not merely sustained but truly accelerated. Next slide please.

As we begin a new school year and reengage with our students and families we are mindful of the impact of COVID-19 upon all facets of our lives. We renew our commitment to closing our gaps through our work to design equitable

instructional strategies and supports.

Systemically our schools are supported with the same approach through the instructional core team that coordinates resources to address specific school strengths and needs, also earlier discussed this evening by Dr. Roberts. Lastly, we will continue implementing our math audit recommendations through the piloting of robust resources to support mathematics modeling such as Desmos, and we will continue vetting Algebra I resources. Additionally we are working with MSDE to audit our ELA curriculum and currently anticipate that report in late April or early May. Next slide please.

Thank you. We are focused on Compass: Our Pathway to Excellence as our strategic plan for accomplishing our goals and our priorities. We are committed to providing all students with access and opportunities to achieve at high levels while choosing a variety of pathways to demonstrate college and career readiness. As you

11

15

16

17

18

19

20

can see on this screen we engage in preparing the

- students for the future in a multitude of ways,
- ranging from annual long-term planning that
- begins in middle school to cultivating
- organizational and study skills in AVID, to dual
- enrollment dual degree professional credentialing
- programs reflected in CTE, magnet, military and
- linguistics programs. Additionally we will
- continue to explore opportunities and we are
- dedicated to our work as we embark on a new day
- of success for all of our students and staff in
- Baltimore County Public Schools. Next slide
- 13 please.

14 Well, how will we accomplish our goal? 15 The strategic plan is The Compass: Our Pathway

- to Excellence, and we will do this through 16
- 17 deliberate and timely action that will accelerate
- 18 our ability to achieve our goals, and so
- therefore we must interrupt and replace systemic
- 20 and structural inequities. We must focus on
- 21 highly effective collaboration, communication and

Page 163

implementation of our Compass. We must

- prioritize our continuous improvement through the
- system improvement team and core instructional
- team. We must recruit, hire and support teachers
- through leadership and professional development
- initiatives. And ultimately we must develop and
- enhance our family engagement programs and
- 8 community partnerships. Next slide please.

9 DR. WHEATLEY-PHILLIP: Thank you,

10 Dr. Boswell-McComas. At the onset of this report

- I emphasized the role and importance of the 11
- 12 Compass, our school system's strategic plan,
  - which has established targets and goals to raise
- the bar, close gaps and prepare our students for
- 15 the future. As Dr. Boswell-McComas shared, under
- Dr. Williams' leadership one of the ways in which
- 17 we will accomplish this is through the work of
- 18 the system improvement team he has formulated.
- 19 There are 12 interdisciplinary focus groups
- 20 comprised of central office as well as
- 21 school-based stakeholders. These leaders have

Page 162

been charged with the task of engaging in data

- analysis, thoughtful discussion and an
- examination of current beliefs and practices. In
- addition to action planning their work is viewed
- through the lens of equity and recommendations
- will be based on current and effective

research-based practices. These groups are

convening and will provide ongoing updates.

9 Central office teams have also developed 10 office progress plans that are aligned with

Compass and in schools are building leaders with

12 the support of the DSSA team, the Division of

13 School Support and Achievement, have developed

14 school progress plans that are specific to the

unique instructional and school climate needs of

16 each school. As you know, the state testing

17 landscape remains fluid as there are many

18 uncertainties. Across divisions teams have been

collaborating and working to insure that first

and foremost the social and emotional wellbeing

of students remains our priority. At the

Page 165

Page 164

December 8, 2020 board meeting an update on focus

- area one, learning accountability and results
- will be given. We will inform the Board of the
- most recent state and system assessments. In
- addition, in relation to focus area one of our
- strategic plan, we will provide an update on how
- we are monitoring progress towards the Compass's
- targets. Next slide please.

Tonight our executive director,

10 performance management and assessment, Mr. Kevin

11 Connelly, and Ms. Stacy Shack, director of

12 assessment have joined us. We will provide any

13 followup as directed by Dr. Williams. At this

time we welcome any feedback and comments from

board members.

CHAIRMAN CAUSEY: Dr. Wheatley-Phillip

17 and Dr. McComas, I just want to thank you for

18 that wonderful presentation. While we are

19 addressing the urgent and shifting needs of our

20 students and staff currently, we do have a

tremendous amount of people focused on the

21

8

15

Page 169

21

Page 166

20

21

Page 167

future. Yes, we're in this situation now, but we will get out of it and when we are there, we know that we can make tremendous progress by implementing the Compass and so we're grateful for that focus on the future.

At this time I will ask board members if they can make, I'm going to request if they can just make a 30-second comment and any questions that they have can be answered quickly or in the future, because we do have additional reports, especially the report on the multiyear improvement plan, we have our consultant with us for that. So board members, if you have a 14 comment you can make it, we're not going to go around the dais, if you can just raise your hand 16 here, I can see you, you can make a comment, ask 17 your questions and then we can process forward. 18 Thank you. Ms. Mack? 19 MS. MACK: Thank you very much, 20 Dr. Wheatley-Phillip and Dr. McComas. For the

last year I have been asking for a more clear

more specifically, one is growth and one is proficiency. Thank you.

DR. WHEATLEY-PHILLIP: Thank you, Ms. Mack. I'll have to take a look at the dashboard specifically to see that, but that is noted and we will take a look at it. Thank you.

MS. MACK: Thank you very much and thank you for your work, and also thank you for raising the percentile level, and I'll see this to Dr. Williams -- (inaudible, static) -- you know, we all want our kids to be proficient and we want them to grow and that is a step in the right direction, so thank you.

14 CHAIRMAN CAUSEY: Mr. Kuehn? MR. KUEHN: Thank you for sharing all 16 this information. I just have one question and I was hoping you could clarify. When you were talking about graduation data, you mentioned that data for 19-20 wouldn't be available until February. Can you please like clarify or explain that answer?

differentiation between MAP and MCAP and I appreciate the data that you provided tonight. But I still have a concern on how we share our data publicly. Looking at the dashboard for MCAP ELA grade three which shows that 37.3 percent of our third graders are proficient in reading, but directly underneath of that percentage says MAP reading winter grade two, 49.8 and -- well, I'll leave it at that, 49.8. I know from teachers 10 that MAP is very important as it gives them realtime tools with which to provide 11 12 differentiated instruction, but I am concerned that if I am a parent looking at our dashboard and I see third grade MCAP is 37.3 and immediately below that where the topic is academic achievement for some of the students 17 meeting or exceeding standards I see 49.8, the question I'm going to have as a parent is how did 19 we drop from 49.8 to 37.3 when in fact they're

two entirely different measurements. So I would

like to request that we show that differentiation

DR. WHEATLEY-PHILLIP: Absolutely, and so we have Ms. Stacy Shack who is on the call with us. I'm just going to ask Ms. Shack if you could respond to that?

MS. SHACK: Absolutely. Thank you all for having us here tonight. In general, MSDE releases most of their important assessment data at a state board meeting. In the past that release of data has always come at either their January or their or February state board meeting, because MSDE has to wait for all of the testing data to come through, we also have to provide them with a high school data collection file that they use to determine the cohort graduation rate and that is due to them within the next week, so it takes them time to process the data. So once that data is shared at the February state board meeting we'll be able to share the 19-20 graduation rate with you.

MR. KUEHN: All right, thank you. CHAIRMAN CAUSEY: Dr. Hager?

14

15

16

17

18

21

Page 170

DR. HAGER: Thank you. I just have a quick comment and a quick question. I just wanted to thank you for the presentations, particularly thank you for showing the declines and showing the gaps in achievement within the county and not hiding behind that, and putting it out there so everyone can see kind of what the reality is, and I just want to say that I am optimistic about this plan and the fact that we're thinking about equity and thinking about how to close these gaps, and I also want to applaud you for that and thank you for the presentation.

And one thing that I have thought about for a while with respect to closing achievement gaps has to do with summer learning loss, and I know that we did implement programs last summer given the pandemic and everything that was happening, but what other strategies are in the Compass, and potentially this is a question for another day, including the possibility of

adjusting the calendar to reduce the length of the summer, or other approaches to specifically address summer learning losses, which we know are a big component of the achievement gaps that we often see amongst school aged children.

DR. WHEATLEY-PHILLIP: So thank you so much for that question. I think that is a broader question and it truly is inclusive of all the things that we are working across BCPS to do 10 to support all of the students. And as Dr. McComas shared earlier, learning doesn't just 11 end at the end of the school year, we truly are looking at ways within which we can continue that learning over the summer. So we thank you so much for that comment because definitely thinking about ways in which we can continue to provide 17 experiences for our students, we'll definitely 18 continue to explore those.

CHAIRMAN CAUSEY: And thank you, and that is finishing up our board member comments and questions, and yes, we do appreciate

Dr. Williams sharing the as is, because it is by knowing the truth that we can do better by our

kids, so thank you again for that. Our next item on the agenda is Item K, report of the multiyear improvement plan for all schools, and for that we will call on Dr. Scriven

and Mr. Dixit to come forward.

DR. SCRIVEN: Thank you, Madam Chair. Mr. Dixit, at this time could you please do introductions and share the framework?

MR. DIXIT: Thank you, Dr. Scriven and good evening, Chair Ms. Causey, Vice Chair Ms. Henn, and Dr. Williams and members of the Board.

15 As we have shared with you in the past, 16 BCPS in collaboration with Baltimore County has been working with an independent consultant, 18 Cannon Design, in the development of a multiyear capital improvement plan for all schools. We call it MYIPAS and since the inception of the plan it has been a key objective of Dr. Williams

Page 171

8

10

11

12

14

17

Page 173

Page 172

and the county executive and the teams for the process to be totally transparent, collaborative, equitable and inclusive. Consistent with that we made two different presentations to you to give you an update, on the March 10th meeting and the August 11th board meeting. We had several interactive sessions with different focus groups and created a website. And also to be totally transparent, we'd like to share the same presentation that we are sharing with you tonight has been shared with the MYIPAS executive

12 oversight committee consisting of board chair and 13 vice chair, and to the county council at their regularly scheduled meeting today.

15 So tonight we have Senior Vice President of K-12 Strategy from Cannon Design, Mr. Paul 17 Mills, who will share with you the Phase One recommendations that Cannon Design is making. So 19 with that, Paul, the screen is yours.

MR. MILLS: Thank you, Pete. Board Chair Causey, Vice Chair Henn, Mr. Muhumuza,

19

19

20

Dr. Williams and members of the Board, it really is a pleasure to have the opportunity to present to you. I've been working with stakeholders in your organization that you lead and it's really a proud moment for me to stand before you and show some incremental recommendations at the midpoint 7 of this process.

8 A little about me. I'm going to get through quickly here. I am passionate about public education, I have been working in K-12 institutions for 25 years doing projects just 12 like this in terms of facilitating strategic 13 planning, doing facilities master plans, 14 conducting and leading facility assessment studies just like you've hired Cannon Design to 16 do, and I'm passionate about the institution of 17 public education and having equitable solutions and outcomes for all students. The name of the 18 project, multiyear improvement plan for all 20 schools, really speaks to the intentionality of 21 this project in that it is indeed for all schools

Page 175

and all students leading the charge with equity for all.

I'm joined with Dr. Lever, who is not unfamiliar to Baltimore County. He worked with the state IAC for 13 years, was a facilities director at a few different Maryland school systems and has been a consultant with school systems. He's, I'm proud to call him a partner on this team and his imminent understanding of 10 the funding structures of how school facilities get funded and built has been instrumental to the success of this process and adds a degree of credibility to our work that is unmatched.

Just a bit about our company so you understand where I'm coming from and the background of the people that are supporting you. 17 I lead a national team of K-12 designers and planners from around the country and we're highly ranked nationally and we have a lot of relevant projects that we bring to bear. But we're not just national, I'm coming into you from New

Page 176

Hampshire where I live, but we have a longstanding proud office of 35 folks in the greater Baltimore area that have been supporting this project, and we've worked with several school systems around the state on many relevant projects to yours. Those like those described here, that are relevant in terms of the scale, scope and proximity to your school system, this project was right up our alley.

So here is the agenda for tonight, and my pledge is to get at this late hour through it 12 rather quickly. We'll give you a quick reset and overview of what you have been presented before 14 on the intent of the MYIPAS, then I'll jump right into the findings, and that begins with the 16 notion of data driven benchmarking, comparing the relative needs of all of your high school campuses, then we'll speak to the dollars and cents, the findings of the assessment in terms of actionable project scopes that can be done, and followed up with specific recommendations for

Page 177

your ongoing capital improvement program funding requests.

So the purpose of the MYIPAS. Really the work product is to support the definition and prioritization of your capital improvement program, so that's all the design and construction that happens to build out onto and renovate your existing facilities, but really through the lens of allocating resources and investments equitably, true to the name of multiyear improvement plan for all schools.

Secondarily to that is the notion that because of the funding structures in the state of Maryland, there is participation from your county government, but also from the state, and we want to find opportunities everywhere we can to leverage those incentives so that we can bring more and more benefits to all of your educators and students.

There's, you're going to hear the three pillar of analysis that are done, and we know

16

17

18

20

21

12

15

17

19

20

21

Page 178

that some of these have been done incrementally at specific points in the past, but this is the first time that comprehensively all of these studies are being updated and confirmed all at the same time and used to inform decision making in an concerted effort, and these three pillars we'll get into in more depth in a little bit.

Really importantly as Pete was mentioning, this is done not in a smoke filled room but rather transparently with active participation of stakeholders, and we're proud despite the challenges that coronavirus has 13 thrown our way, we've been successful in 14 maintaining progress on schedule through this process with a respectable degree of outreach and participation of stakeholders, which we aim to continue through the balance of this process.

So what's our role? We're doing the facility assessment work, we're facilitating the planning, coming up with recommendations. At the end of the day what this is about is being

Page 179

12

13

14

16

17

18

impartial, unbiased and professional recommendations that come from a third party. This is my work, this is what I do, and I can assert to you professionally that no one within your system, no staff member, community member, board member, no one has influenced or fed outcomes to me, the recommendations are Cannon Design's objectively and professionally presented to you that are completely unbiased from a 10 professional perspective of doing this sort of 11 work nationwide.

So here's where we are in the process. We're kind of at the midpoint here and by design, this contract was set up with two phases, knowing that at the midpoint of this process it would be coinciding with your annual funding request that you're in the middle of right now, focusing on high schools as your next phase of critical investments that need to be made. So at this step we're providing these incremental

recommendations for this funding cycle but we're

doing it within the framework of a long-range structure and strategy for investments that would transcend this current year on into the future.

So what does this mean? At the end of the day we're still going to be around for a good part of a year working with the schools. We actually have teams of architects and engineers doing assessments right now in the balance of your facilities, middle schools, elementary schools, noneducation facilities, et cetera, and the dust isn't settled, no decisions are final, but these are our initial recommendations.

So we've had certain schedule considerations. I mentioned one earlier, coronavirus, we got notice to proceed on this project right when the pandemic started and certainly we had to adjust our work plan on how we would approach this sort of work, and we've working very collaboratively with county government and with Baltimore County Public Schools staff came up with an alternate mode to

Page 181

Page 180

transfer into virtual workshops and to conduct a community survey that we're proud to report is over 22,000 responses. And in my career having worked with 30 of your peer districts around the country as well as in entire states where I've done planning, I've never gotten this level of community response to a survey like you've achieved, and that's really hats off to Alisa and to Dory and to those who have contributed 10 mightily to bringing out the voices of your stakeholders into this process.

I'm really proud of the fact we had 2,500 students in the aim and future generations throughout this process to up that stat as well.

So benchmarking, the first aspect of this is coming up with a consistent way of using measures, we call it kind of the common yardstick to measure facilities and it's really through the lens of equity at the end of the day. So I mentioned the three pillars and here's what they are in turn. The very first one is an assessment

11

12

13

15

17

18

19

of your facilities in terms of educational adequacy and equity. Well, what does that mean?

It really speaks to how your buildings are

designed, how they're equipped, how well suited

<sup>5</sup> the built environment is to the educational

6 program that it houses. The second of these is

the facility condition which as the name would

imply, it is just really the physical health of

9 the buildings, all the systems that compose it,

and we have teams of architects and engineers

that do nothing but this sort of work that

12 observed all of your facilities, looking at what

we like to call from fence line to fence line,

14 from the foundation up to the rooftop looking, a

thorough check in terms of the physical health of

your buildings. Third, and you might be familiar

with the Sage study of a couple of years ago that

18 looked at high schools' capacity. We did an

update of that process and looked at current

<sup>20</sup> enrollment projections, made modifications based

21 on the district's strategies for adjusting some

Page 183

19

20

programs such as bringing and building your English or speakers of other languages, which is programs at the home high schools, and we've reupped those.

So we have these three pillars that build up a measure and an instrument with kind of, for all the educators, I know many of you have dedicated your careers to teaching and leading school systems, you know, having a scoring rubric of sorts is, you're no stranger to 11 that, and that's certainly an aspect of the way 12 we do it. What this does is at the end of the 13 day, it creates an instrument that is an equitable common yardstick to measure the 15 relative needs that are out there. And what that means is it's really equity on the terms that 17 Baltimore County expresses, that the greater the needs the higher the priority so that the access 19 to resources surfaces on the shorter end of the planning horizon, whereas those with less needs 21 towards the back.

Page 184

1 So let's walk through each of these three assessments in turn, starting with the educational adequacy and equity. This is a framework and rubric that we've developed that are different from others that work in this sort of service but it's not to say that it was a cookie cutter approach that we have imposed on Baltimore County, what I've used in New Orleans or what I've used in Los Angeles, what I've used in Oakland, Hawaii and elsewhere, no. This is something that was actually worked through a 12 diverse broad-based stakeholder group that had the opportunity to help inform what is equity, 14 how would we apply it into measurements for the facilities in a way that can be actionable, 16 consistent and could set up a data driven 17 approach that would improve the chances of equity 18 with your resource allocation.

So the way this was structured, and you'll see a lot of detail on the detailed support reports that will be made available to

Page 185

you, it's broken down into six broad categories

and beneath those 29 subcategories, we're calling

them key performance indicators, and even beneath

those there are discrete objective observations

and measurements, surveys conducted that

consistently and accurately roll up into these

categories that we're working with your focus

group that focused on equity and educational

<sup>9</sup> adequacy awaiting a system that was built on

and the state of t

consensus. And I'm happy to report that this

committee gave a lot of great feedback on the

12 structure of this, and it wasn't just about where

13 we weight and put a certain percentage on one

14 category than another, but also structural

15 adjustments that we made to this to really make

this as relevant an instrument to Baltimore

County Public Schools as it can be.

I'll quickly go through the sorts of things that this measures. Educational program down here in blue, that's kind of the no brainer obvious, we're looking for the sort of facilities

16

17

18

19

20

17

18

21

Page 186

and equipment that would support the different specialized types of instruction that would happen. These are things like special ed, your pre-K programs when we get to the elementary schools. Career tech, science, visual performing arts. We also look at the very obvious necessities like safety and security, with looking at ways the facility contributes towards 9 that.

Operational utility sounds kind of plain 11 vanilla and not very interesting, but at the end 12 of the day to set up a sustainable system that 13 can deliver equitably a level of quality 14 education, that there has to be certain standards for how efficiently a facility can operate, and 16 the sorts of measures this looks at is the size of the campus, looks at the actual scale of the enrollment and capacity that it's at, the accessibility of the building as well as some of the things like utility costs, operational costs associated with it, so that at the end of the day

Page 187

you have more dollars funneled into the classrooms and not spent on overhead fixed costs. Other things, technology and furniture, how well equipped are the facilities.

And then things that we're really proud of that we feel are unique to our approach to this is looking at the wellness and what we're calling relationships and collaboration, and this is really about the social emotional physical 10 supports for facilities. Does the building and 11 its grounds, is it set up to promote healthy 12 living, both mentally, socially emotionally as well as physically, so all the fitness and PE sort of aspects, nutrition are covered in that 15 space. Relationships and collaboration, as architectural designers in the K-12 space around 17 the country, knowing a lot about modern instruction and the way your peers are designing 19 school around the country, we've reversed that 20 structure into how we would measure your existing 21 facilities. And the source of, this is really

the big growth area for, and opportunities for your existing facilities and actionable changes,

would be in the space of creating the sorts of

environments that foster collaborative learning,

team teaching, project-based learning,

individualized approaches to education that has

been growing tremendously within your system and

around the country.

9

10

12

14

16

17

18

So we have this instrument to measure educational adequacy and equity of your facilities, and using that weighted consistent scoring rubric, we applied that to all 24 of your high schools, resulting in this forest range order. And looking at the scores in and of themselves it doesn't necessarily mean much other than we know that the ones towards the top have more needs than those towards the bottom, but then when you peel back and look at all the subscores beneath all those you can see the relative strengths and weaknesses of each campus and each high school lends a different set of

Page 189

Page 188

need. So you'll see the relative spread of, you know, the color coding here to visually convey the areas of need versus the areas of strength, and towards the top you would, as intuit, you would see a little more of the red dots towards the bottom, the green dots along the way, and see how the scores are built up. On the left-hand side is kind of a thumbnail of the detailed report which shows all the math, how this thing is weighted, how all of the measurements were applied to come up with these scores so that the 12 transparency that you demand is there, so that 13 you can understand how these measurements came 14 across.

Facility condition, this one is a little more structured and engineered because it's an industry standard approach called Uniformat, the breakdown of all the physical infrastructure of your buildings and how it breaks down into all the various types of systems and components that the buildings are made up of. And what this does

15

17

18

19

20

13

14

16

17

18

21

18

19

20

at the end of the day, it creates a benchmarking instrument similar to the scores we just had for adequacy, it's a metric called the facility condition index, which in many regards you can consider in your mind a proportion of how broken the building is, would be a collection of all the repair costs divided into the cost of repairing all those systems at the same time, so it really gives you a proportion of how broken in terms of the dollars you would spend that the facilities physically exist in.

It's not just a snapshot of today, our folks are highly trained in this space and do nothing but assessments, and they actually forecast out to a planning horizon, with a consistent seven-year planning horizon for this entire project. So they're looking at the life cycles of your existing systems working hand in glove with all the people that are charged with maintaining and operating your systems for this assessment.

Page 191

So the weighting of this isn't kind of a consensus-based approach like we did with your focus group in adequacy and equity, but rather it is cost driven, so a dollar of expense for a roof versus a dollar of expense for a boiler, that would determine the sort of relative weighting of the various systems. So similar to the other one, this is backed and validated by a focus group of peers and subject matter experts from within the system as well as external stakeholders.

12 So similar to educational adequacy and equity there is a forest ranking of the FCI. It's really an inverse function of that, where 15 normally FCI the lower the number the better the condition but we just reversed it on a 100-point 17 scale and came up with this breakdown. So you can see that the needs vary from those from the 19 other things. Like we said before, different 20 schools have different relative needs. One thing 21 I'd point out, there are no red dots on the

Page 192 aggregate scores here, and there are some in

discrete systems on different schools, but what this data tells me, and it made me smile when I first saw it, and there's another metric we'll look at in a moment, but it's just an indicator that you're doing a fantastic job of funding and maintaining your buildings, the upkeep here is superb.

Just like in the educational adequacy we have detailed reports that show with all the photographs and notes taken in the field and all the sorts of cost metrics and everything applied to the facility assessment. To your heart's content, any stakeholder can go in and see transparently how all these numbers were derived.

That brings us to our third pillar of capacity utilization and this is something you're likely familiar with if you've been on the Board since the Sage study, but to refresh you memories, capacity utilization is really a measure of how full a building is and it's, the

math really breaks down the number of students by the number of seats, right? So a hundred percent utilized means you're comfortably full and you're operating where the building is ideally designed. If you fall beneath that you're under utilized and it's not as efficient. And you're above that, you get into crowded situations which is more of the camp that we're experiencing here in Baltimore County. I would attribute a lot of that to the successful educational program that you're delivering.

So the state rated capacity is a very structured formulaic approach that the entire state abides by, and there's a process for updating it as you're aware over time, but working closely with staff on the enrollment projections on a seven-year planning horizon, we being in that business, and I've worked with demographers all over the country, I'm very familiar with methodology and I can attest as a professional that your staff is doing fantastic

Page 193

Page 194

work and that their methodologies are industry standard, they are approaching it the way we would, and you can comfortably rely upon the data that they are projecting out.

5 I mentioned earlier the ESOL programs. We did make adjustments in the projected enrollments from, moving a proportion of students from the school where they were operating in ESOL regional programs back to their home schools for default planning based on not wanting to look in the rearview mirror for planning, knowing that 12 Dr. Williams and his team are rolling out a new 13 program to bring back ESOL programs not just from 14 regional centers, but back home to more of the home schools at the high school level and I 16 believe the middle school level as well. All of 17 that to say we're being as conscientious and 18 intentional as we can to make sure that the targets that we're shooting for for major capital 20 investments are as accurate as possible.

So the picture tells a thousand words

here. As you can intuit, the color coding of the

Page 196 the northeast and your southerly part of central.

It is something to be dealt with in the very short order.

One thing that was consistently brought up in the focus group advising and guiding the work that we've done is that while we have different categories and one of them has the name equity in it, that capacity is an equity issue. When you reach a point of some schools that are approaching 145 percent utilized at Dundalk, 136 at Sparrows Point, 138 at Towson within a seven-year timeframe, that gives pause.

So this dashboard, you see a link here, you can QR it with your device if you care to, but this is here for your convenience, we'll be loading more information on there as well as it becomes available to you, but the way to read this is it's just more granular breakdown of the sort of data that was on the map. The top half of the page we've got the aggregate sums of the regions, that would be adding up all the

Page 195

13

14

16

17

18

dots and the regions represent the utilization here in brackets, so the red is for your, what we would term kind of a sever over utilization scenario on the seven-year planning horizon. Orange, you are full and getting crowded. With white in the background is you're operating and projected to be less than the built capacity of the facility, which is great news. And blue would be even 85 percent of that, which you don't 11 have any capacity issues other than perhaps 12 efficiency of operation at just a handful of 13 schools.

Now the biggest areas of need at the 15 high school level of this entire process I can assert for you is capacity utilization. With this degree of red dots on the page and being bordered by areas where there is not surplus capacity to be had is a call to action. It is reaching a point of being very acute, particularly down in the southeast but also into Page 197

Page: 50 (194 - 197)

Facsimile (410) 821-4889

enrollments of the schools within a region, divide it into adding up all of the state rated capacity those schools and dividing it, or each discrete school. You can see there's, last year was the baseline that we used and projected out seven years out to 2026. So that's the relative percentage of the capacity.

On the right-hand side is the subtraction which basically winds up being the magnitude of either surplus or shortage of capacity. So as the color coding would connote and what jumps off the page where you have the darker more bright orangeish borderline red colors here, but in southeast, short over a thousand, short over 1,100 students within seven years, about half that in the northeast, and central, half that again, quite a bit of shortage of capacity needs in those particular regions.

So we did a benchmarking consistent with the framework that we built for adequacy and for condition. The way the math works here is rather

17

19

20

21

11

12

13

17

18

19

20

12

13

17

18

20

21

11

12

13

17

21

Page 198

simple. If you're a hundred percent utilized or less then you have a perfect hundred point scale, and for every percentage point over a hundred percent you're dinged one point off of the score. So doing the math here, Dundalk and Sparrows Point is the most acute projected utilization. The 145 percent, you would subtract that extra 45 percent from your hundred point basis, that gives you your 55 and you could kind of see what the projected enrollment or the capacity utilization

Okay. So tying this all together, and we mentioned the survey for which you will see 14 some results very soon in report format which we've already taken value from that and informed 16 some of our early recommendations into the process. Fundamental to that was the relative weights and values placed by your 22,000 stakeholders that I'm proud to say, represent every single one of your schools, in nine different languages, including all the students

would be for any of these particular schools.

Page 199

15

16

17

18

19

20

that we mentioned, and that pretty close to even one-third one-third split, but there was a preference by your community to lean a little bit heavier weight on educational adequacy and equity, a little bit less on facility condition, and basically on one-third par with capacity utilization. This is kind of what we predicted, to be relative split, because all of these things are critically important, but we did not want to just invent something, but to make sure something was validated by the voice of your community.

So what all this does is, using those weights and applying it to the scoring system 15 that we mentioned to you before, on the far right in orange we have a ranking and the aggregate score associated with all of your 24 high schools in their order. So how is this going to be used? 19 Well, a number of ways. First of all, having this sort of data helps us really divine what the sorts of outcomes and remedies to deficient

Page 200

conditions can be proposed. Also it helps define your renovation project scopes by gap analysis. An example of that, having within that adequacy and equity rubric, having specific scores for your career tech programs, for STEM, labs and those sorts of things, by looking at what the standards show that you ought to have in the facility versus what is actually existing, we know that we need, we can hand off to our cost estimators and in turn budget for you what would be a responsible way to plan for either additions or renovations to retrofit in some additional 13 facilities to support those programs. 14

Like I said before, the greater the needs the higher the priority, that goes in terms of not just the ranking and sequencing of when the projects might happen, but also in terms of what sorts of scopes would wind up in what sorts of projects.

So the assessment findings, fine and good. We have some scores, we know relative

Page 201

measure of need that exists out there, a sequence of when projects could be objectively done through a lens of equity, but how is that actionable, how do I budget for it and plan for it? Well, that's part of our scope as well. So at this midpoint check-in where we're giving you kind of early findings of where we are with your high schools, that will be followed up with the balance of your portfolio. We're here to report a big gray number that starts with the letter B, 11 but the high school needs total north of \$1.2 billion within that seven-year capital timeframe, 13 the relative even split between the three pillars 14 of the study.

Now a couple points about this, we're not done yet. These needs are for your high schools only, it's a seven-year forecast of your needs as they evolve. It includes, this is the high end for some remedies that we've looked at in our recommendations. Potential relief schools, and the word potential is very important

15

17

18

19

20

9

10

17

18

19

20

21

Page 202

5

12

14

15

16

17

18

1 2

12

13

17

19

20

there, we're not prescribing the final answer on all your high schools today, but the potential of some relief schools to some of the capacity that we showed on the map earlier, the costs are included in this number. There are some other remedies like additions or a hybrid of both where some of those numbers might come down a little 8 bit.

It does not include the cost of land procurement, which is something at this early stage not knowing necessarily where things are going to be that we'll discover over the course of the balance of the project, it's just too 14 early to call that at this point. Hopefully there will be some cost neutral options out three 16 with interagency swaps or those sorts of sharing potentials to make the capital cost not as high, schools wholesaled for the sake of replacing them.

So let's compare that to, you know we have a lot of meat out there, it's measured, we

Page 203

have a sense of categorical breakdown of it. How does that compare to what your means are, your budgets? Typically the county and state together put up 140 million a year, about a hundred million of that comes from your county government and the balance of that is going through the funding process, to get the matching monies that we can from the state of about 40 million. Now we're being very intentionally visual here, we're trying to convey the needs on the pie chart with 11 these gray circles that are up here. So you 12 annual CIP budget for all schools is 140 million. Now the high schools represent about a third of your square feet in your portfolio and we're not 15 done yet so we'll soon know where we are with middle schools, elementary and others. But using 17 a third as kind of a benchmark, if the relative needs extrapolate out proportionally to your high 19 schools, that would be the size and would 20 represent kind of a 1/27 of your overall high 21 school needs, so it would take 27 years of your

current level of funding assuming that the construction costs and your budgets kind of go up at the same proportional clip over time, it would take that long, 27 years.

Now we do know that there's potential good news out there. With House Bill 1, the Built to Learn Act that is going through the legislative cycle and processes, has been discussed and has had its own history, but that potentially could amount to another 110 million a year, which would require your county government and you as taxpayers to dig a little deeper in your own pockets as well as your proportion of the state spending to put towards it.

But I'm here to tell you, that kind of additional spending can be transformational for your campuses. That takes, in order to take all that 1.2 billion of need and amortize it over 27 years, that suddenly gets from a daunting number that feels like never to 15 years, you can get your head around. That can be something very

Page 205

Page: 52 (202 - 205)

Facsimile (410) 821-4889

exciting.

Now a point here. We're talking about economy, we're talking about your budget and your means versus your needs that are out there. Any time you take the discretion of making a major investment on a single campus, something like a \$100 million plus replacement for the sake of replacing a facility, delays all other projects of the peer schools to that one campus by about two to three years for each one of those. So it speaks to the need to prioritize, right? We know that we have a lot of need and limited resources.

So we built on all of those \$1.2 billion and all the various needs and costs that have been cost estimated out there, we've applied it through a consistent methodology of categorization or prioritization, and you can kind of call them priorities one through five. The stuff at the top, priority one, these are the things, health, life safety, code compliance, stuff where people could get hurt, the building

3

18

2

11

12

13

15

17

18

19

20

code being in really poor shape if something wasn't done. And I put into that your acute capacity shortage bracket as well.

Going down the way we get into stuff that's just as critical but it's just a matter of degrees at this point, all priorities one through five are important. When we start reading from the bottom up, looking at things like refreshing furniture with more modern equipment, that really can improve the learning environment and facilitate project-based learning, the sorts of 12 behaviors that happen in your classrooms today. That's a priority five, that's down towards the bottom.

Priority four, these are things, we're talking about with the arts and athletics, these are things that contribute to social emotional wellbeing, et cetera, these are very important items, they're down in priority four. So digging into your priorities is a very difficult thing to do.

Page 207

1 The bar chart here shows these costs 2 spread out over sort of the priorities and it's coded by the three pillars, and this made me smile again. Remember I mentioned earlier no red dots on the page for facility condition? Well, you have a minuscule, \$9 million sounds like a lot but it's really not for capital planning for a school system of 170 schools. What this tells me, it says that you are doing a fantastic job of 10 maintaining your existing facilities, you're budgeting for them, making those investments, and 11 12 the professionals that are charged with maintaining them are doing a superb job and they should be applauded for the great work that 15 they're doing.

On the capacity side, like I said, this is the DNA of my high school recommendations to you, is we've got to take care of this big looming capacity crunch that's out there. I had to split it in half into, actually into thirds here, one, two and three, to find out ways we can

stage it over time, and we'll just start to get into recommendations and how we might accomplish that.

So first and foremost, keep doing what you're doing well. You do the systemic repair programs that you have been funding and cyclically doing. Use the tools that we've delivered to you with the facility condition assessment for predictive modeling of when repairs need happen, how budgeting can happen, and this can be staged in perpetuity over time.

Every single facility plan I've ever done comes in the middle of, or there are projects in mid course that are already underway when the project started. You have a number of elementary school project, middle school projects and you do have one major high school project at Lansdowne that you've already invested capital money into the design and it's mid course of the design efforts on that project right now, and our recommendation is finish what you started, carry

Page 209

Page: 53 (206 - 209)

Facsimile (410) 821-4889

on with Lansdowne, let's gets that one done.

After -- you call that group one. Group two, like I said, we really need to, it's reaching a boiling point on capacity, please consider the recommendation to quickly launch some kind of no brainer facility additions that can be done in the very short term that would be relevant. In just about every planning scenario we could come up with so that we can do some relief while we possibly look at some other alternatives where we need to engage stakeholders more and looked at due diligence for land procurement options out there, so these four schools that under our recommendation would be launched for additions in the near term would be 16 Dundalk, Towson, Loch Raven and Patapsco.

So staggered off by about a year's timeframe we're calling group three, these would be those priority two, other capacity issues out there, but that lag of time, you can't spend it all in year one, so the capital funding will be

14

15

16

17

18

20

21

1

Page 210

2

13

15

16

18

there the right amount of time, but be very deliberate about that time to do the sort of stakeholder engagement and land due diligence to consider alternatives that might have new campuses in them, or you could continue to grow and have a second round of additions on facilities, or some sort of hybrid thereof. Here are the schools that are affected that we're recommending, that if you look from left to right you kind of have mutually exclusive scenarios that could be done. You have kind of a lower 12 cost one and a higher cost one, both of these, 13 one focuses on the northeast, one focuses on the

And let me point out some of the nuances of them. The B, these represent a new facility, a new school, so 1-B would be a new high school to be named in the future that would relieve your area high schools that are crowded and projected to continue to grow, or that you would have additions at Perry Hall, Kenwood and Overlea that

southeast down in Sparrows Point.

1 middle school has a new home as well.

In order to do these things, we didn't feel during coronavirus with limited access to stakeholders and community, a rush decision to do these. Hence, we've created this framework and structure with a lag time so that over the balance of the MYIPAS or into the future if it extends beyond that, that these things can be done in a way that's responsible to your communities and listens to their voice so they can weigh in on the sorts of programs and what the goals need to be for these particular schools. 14

So what about the rest of the schools? We talked about a handful of them that have the capacity issues but the rest of them, the good news is we're not ignoring them by any stretch at all but we consider them the next year priority after we take care of that backlog of capacity issues that needs to be dealt with. And what we're recommending is that you develop a

Page 211

would offset those.

2 It's similar in the southeast with Sparrows Point but it does have a unique facet that needs to be brought to bear. We know that there's a unique situation at Sparrows Point where one campus houses both the middle school and high school programs, which presents in addition to some educational opportunities in terms of vertical alignment of curriculum, it 10 also presents a lot of operational challenges 11 with social emotional issues, behavioral issues, 12 et cetera, on a crowded site where you have 13 12-year-olds running around with 18-year-olds on the same campus. And we looked at this as an opportunity because it's projected to be over 130 percent utilized in the planning horizon, perhaps 17 we find a new home for the middle school on a 18 separate campus, allowing the high school to 19 commandeer those spaces with a major renovation 20 to make those spaces suitable for a very exciting 21 new high school program there, and meanwhile the

Page 213 renovation cycle strategy that's form fitted to

your expected budgets and a reasonable timeframe

to get the work executed, something in the

15-year sort of range and not the 27-year range

that we were looking at earlier. So with that

kind of strategy in mind we looked at three

potential sorts of cases that could build out of

it. Case one, House Bill 1 passes. It could be

transformational not just for Baltimore County

Schools but the entire state, and we mentioned

11 that earlier as a potentiality. By doing this

12

all five tiers of priorities, which gets into

13 some really exciting stuff. I know that it

sounds, particularly if there's an expectation of

15 a brand spanking new facility after tearing the

old one down might sound like a concession, but

I'm here to tell you this sort of investment and

what we programmed in here would be large

19 renovation projects with a scope that would leave

20 people very excited about the new environment

that education would be happening in, and would

10

11

Page 214

1

8

12

13

14

16

17

18

19

20

10

11

12

13

15

16

17

18

19

20

21

not be a very tremendous concession to have. This would be kind of the magic case with House Bill 1 within a reasonable timeframe, you address all five tiers of priority. Okay.

5 House Bill 1, we're now going into recession, this may be a tall order or maybe there's a smaller magnitude of it, it might be somewhere in between. But in the case where there's no House Bill 1 and you're living within your current means of 140 million a year, then what we would recommend is really kind of case 12 two and case three, case two being kind of a 13 reduced scope, you ratchet back the priorities of 14 spending invested in each of your facilities equitably so that you deliver let's say 16 priorities one and two, maybe some of three, get 17 into the two-and-a-half sort of priorities, 18 adding at each campus along a consistent timeframe where every campus does benefit from 20 capital improvements over a reasonable timeframe.

Or the other case which we're not

Page 215

recommending would be that no House Bill 1 scenario, but digging in and doing one school at a time every few years, and dealing with all priorities one through five. What this does is it forces out schools that will not receive major renovation projects until decades away. When you start looking at the tail end of this cycle you're at 2050, it really brings home kind of the impact of what the strings of your budgets would limit you to if you were wanting to do all the improvements one at a time at each campus.

Which brings us to a close here, what is
an incremental snapshot for this year's
recommendations on your CIP request are these.
First of all, fund and implement your systemic
repairs just as you always do in a very good
fashion. Let's get on with what you started in
your group one project and then get group two
addition projects coupled with some renovations
on those group two schools in this year's cycle
so that those can get underway.

Page 216

Two, to initiate the stakeholder outreach and land due diligence that I mentioned earlier consistent and concurrent with this process for the balance of MYIPAS in a way that can inform which path you want to take in terms of relieving the balance of the capacity issues down in the southeast and northeast.

And three, advocate for the House Bill 1, let's get that bill enacted so we can have those transformational case one scenarios, digging down priorities one through five for all schools within a reasonable timeframe.

So that concludes the presentation component of this. I know I like to talk and was rather longwinded, I hope I wasn't on you this whole time, and I hope that we have some great questions and dialogue.

CHAIRMAN CAUSEY: So thank you, Mr. Mills. That was a wonderful presentation and I do encourage everyone to go back in and look at the data that is going to be available through

Page 217

Page: 55 (214 - 217)

Facsimile (410) 821-4889

their dashboard. And I appreciate Mr. Dixit including Ms. Henn and I in the executive oversight committee. However, it was truly the county that did the heavy lift developing the RFP, managing the bid, the selection process, and Mr. Blades, we need to thank him and Ms. Stacy Rogers for all the coordination that happened with, along with our BCPS staff.

Board members, we will go around the dais and if you want to make a comment and ask questions, we will have another session on this at the next meeting, so if you can ask questions, if there's a short answer that's great, but if not, those answers can be provided at a later date. So we will start then on the other side of the room with Ms. Rowe.

MS. ROWE: Yes. So one of the things I'm concerned about is that the state IAC is about to award a contract to create a facilities index score such as what you've created for the county for the entire state, and that that

13

14

16

17

18

20

21

1

2

11

12

13

17

17

18

7

8

11

12

13

17

18

19

20

21

facilities index score that they create may change the recommendations that you're recommending. And I have concerns that if we pursue renovation projects and then their funding formulas change, we could put ourselves in a position to where a renovation may not have been the right course of action, and I'm concerned that until we know and until that contract has been fully executed which they're estimating will take a year before they have solid results, I'm concerned that their work might make this work 12 obsolete.

And I'm also concerned about the fact that the way our county laws are set up, developers can use any plan the school system creates to justify development in areas already overcrowded. So once we create this plan, then the overcrowding solution is overcrowded the day it opens because there is no restriction on development in Baltimore County based on school capacity, so I'm wondering if you have a way to

Page 219

mitigate those things.

MR. MILLS: Thank you, Board Member Rowe, great question as always. The IAC's assessment, we know that's not under contract yet, it's actually under protest and it's been under protest for a few years. The methodologies could differ slightly but I'm sure that their professionals will provide similar sorts of findings that our professionals have provided, but the good news is that Baltimore County's is half done and will be shortly completely done, and decisions can be made and moved forward.

I would comment also about that. The early recommendations we're saying specifically 15 for high schools are that we're focusing on capacity in the near-term years, so then on the renovations is that they would follow suit shortly thereafter. So it would create a bit of 19 time, so if there were different findings that were found out there, those could be reconciled and perhaps adjustments could be made to the

things we're doing. But we stand behind our data, it's consistently recorded and measured, and we have a great track record with your peers around the country doing this sort of work.

Relative to the cap on development and those sorts of things, it's really a governance issue relative to statute, and we do know that some of your neighboring counties do have harder caps on development, and that would be a policy sort of choice that could be in discussion in your county government.

MS. ROWE: So do you know if the state IAC work that they're doing, if they are weighting the three pillars in similar fashion to the way we're weighting them or are they weighting them differently?

MR. MILLS: I'm not certain what they're doing. My familiarity with it stops at I know they're doing an assessment and a study, and it does look at aspects of education in addition to conditions similar to this. Whether it's

Page 221

Page: 56 (218 - 221)

Facsimile (410) 821-4889

similar, dissimilar to this, I can't imagine it's a facsimile because I do know we are not subject to winning that project, but we're not also subject to protesting either, but that there are some disputes going on among other vendors that are out there.

MS. ROWE: Okay, thank you very much. MR. MILLS: Absolutely, great question. CHAIRMAN CAUSEY: And that is an item that could be followed up with in terms of board members receiving a link to the IAC reports that

relate to the plans that they have even though they are currently disrupted. And Ms. Scott?

MS. SCOTT: That was my question I was going to ask. The report, I guess that you mentioned, is that in our BoardDocs? I didn't see it anywhere, or is that something that will be sent later to the Board?

MR. MILLS: To my understanding that will be provided to you through normal channels.

MS. SCOTT: Okay, thank you.

19

clarification.

midpoint now, and by design because of your

funding cycles, we're presenting the high school

Page: 57 (222 - 225)

Facsimile (410) 821-4889

Page 222 CHAIRMAN CAUSEY: Thank you, Ms. Scott, that is a good question and yes, the anticipation is to have this linked to BoardDocs after the meeting, and then also the website I understand is going to be made public, I believe it's tomorrow; is that correct, Mr. Mills? 7 MR. MILLS: That's what I heard from staff but I would defer to Pete and Ed about some 9 of the logistics on it. 10 CHAIRMAN CAUSEY: Mr. Dixit, can you 11 confirm when the presentation is going to be 12 publicly available? 13 MR. DIXIT: My understanding is that the 14 presentation is going to be publicly available 15 right after the board meeting sometime. 16 CHAIRMAN CAUSEY: Okay, great. Thank 17 you.

Page 223 did want to thank you for that very thorough presentation, I found it very interesting and

MS. SCOTT: Thank you for that

CHAIRMAN CAUSEY: Ms. Mack?

MS. MACK: I have no questions, but I

informative, so thank you.

CHAIRMAN CAUSEY: Mr. McMillion? MR. MCMILLION: Yes, can you hear me? CHAIRMAN CAUSEY: Yes, we can hear you. MR. MCMILLION: Okay. Mr. Mills, my

name is Rod McMillion and I represent Councilmanic District 7, which is the southeast

10 area. We have in the southeast area three of the 11 top five high schools, Dundalk, Sparrows Point

and Patapsco with the most needs. Are you aware

there is a 28-acre site, former junior high

school site, at the corner of Wise Avenue and

15 Merit Boulevard? How can you and I initiate a

feasibility study to determine the impact a new

17 high school on this site would have on the

overcrowding at Dundalk, Sparrows Point and

19 Patapsco? Is this something Cannon can analyze? 20 MR. MILLS: Can, absolutely, and would

be happy to learn more about the specific site

findings at this midpoint, but we'll be around for several more months.

MS. JOSE: Okay, and there will be more questions. So thank you, good job, and good night.

CHAIRMAN CAUSEY: Ms. Henn? VICE CHAIR HENN: Thank you, Madam Chair. Good evening, Mr. Mills. I just wanted to thank you again and reiterate what a wonderful job you did on your presentation. I enjoyed it the second time around even more than the first this morning, and I appreciate you delivering it to the Board at this late hour. So I have no questions at this time, but I thank you for joining us this evening and look forward to our work session, so thank you.

MR. MILLS: It's an honor, thank you. CHAIRMAN CAUSEY: Mr. Muhumuza? MR. MUHUMUZA: I have no comments. CHAIRMAN CAUSEY: Mr. Offerman? MR. OFFERMAN: I have no questions at

Page 226 Page 228

> elected officials from the east side of Baltimore County who always come out, come out in droves to

advocate for their schools. Yes, I wish from the

bottom of my heart that we could have those

numbers coming out for the schools on the west

side that are in sore need, and need on all of

those levels about which Mr. Mills spoke this

evening. So we don't teach our children based on

which parents come to PTA or which people come

10 out to advocate for the schools, we take care of

all of our children. So I will be the one who's

12 going to do that with my last ounce of breath

13 whether I'm on the School Board or not. So 14 School Board, Dr. Williams, Dr. Scriven, I am

15 happy to see Bedford moving forward, Summit Park

16 moving forward, but my heart is still broken.

And thank you, Ms. Causey, for inviting me to go to Campfield and talking about Milbrook and Scott's Branch, because what we are doing is ingraining in the being of our children a notion of being less than, so when you go to schools

Page 227

17

18

this time, thank you.

CHAIRMAN CAUSEY: Ms. Pasteur?

MS. PASTEUR: Thank you. Mr. Mills, bravo, a wonderful job that was done here as has already been said, very thorough, and you dug deeply to prioritize on different levels and I appreciate that. I however, and the however is not to you, Mr. Mills, it's to the Board, to the superintendent, to Dr. Scriven, I cannot let this moment go by without saying that in the conversation about equity, if you take a look at that sheet it's almost like there's not a west side of Baltimore County. And I know you will get to the middle schools, elementary schools we will look at, and again Mr. Mills, know I said this when the equity group met, and thank you, Mr. Dixit, for having me on that, I enjoyed being on that immensely. But again I say, I felt like this was no west side of Baltimore County.

I will never, I will be the last

bastion, I applaud all of those parents and

facilities that are not up to par in all of the many ways that Mr. Mills so beautifully pointed out tonight, and then they go to their middle schools that are in need in terms of facilities, then they go to the high schools that were on that list down on that list somewhere, and then when we they can see and their parents can see and the community can see those numbers about schools and then you add all of that up and what

does that make the children believe they are, or who they are. And we can tell them that they are

12 just as good and that they matter just like

13 everyone else matters, but it is hard to do that.

I'm going to preach this until the bitter end, so

I'm saying to the system, pay attention, let's pay attention to everything that Mr. Mills'

17 report said, because we must apply that, not just

18 to the physical, the piece that's about need as

19 well is also about what we do to a child's

20 psyche, what we say to them in terms of who they 21

are and how important they are.

Page 229

Page 233

Page 230

So you know what, Mr. Mills, thank you again. Thank you again and again and again, because you laid it out so well, so well, that you have given us benchmarks that we need to use, and I feel this so passionately and I will not give up on this, and I don't care how many studies there are and I don't care how many schools are up at the top and we're still at the bottom. There's an east side and a west side, a southeast, a southwest, et cetera, et cetera, and 11 I want all of our children to be recognized. 12 Thank you.

CHAIRMAN CAUSEY: Thank you, Ms. Pasteur. Mr. Kuehn? MR. KUEHN: As normal it's tough to follow Cheryl, but I'll try. Thank you, Mr. Mills for your presentation. There's a tremendous amount of data and information here.

report and everything behind what you just presented, so I look forward to diving into that.

Unfortunately the Board hasn't seen the entire

One of the things that I wanted to ask about had to do with the idea behind building additions instead of replacing schools, I don't know if you can quickly perhaps give us an answer

about that, because I didn't really see any new high schools out there except possibly one in the southeast, so I was curious as to how that was 8 arrived at.

MR. MILLS: Sure. So the notion, the question to make sure I'm tracking with you, did we consider replacement of existing facilities on same sites as a remedy for some of your capacity issues? We did look at that as a potentiality and there were three points that really made that 15 challenging. One, and the strongest thing, it's very expensive to do that sort of new construction work and considering limited budgets, hard to justify considering the timelines that investing in a major expense like

tearing down capacity that you sorely need and

replacing it perhaps incrementally larger was

hard to justify those costs considering all the needs of all the schools in the system.

Second of all, the metrics, the FCI when you look at the economics of it, it's not financially justified by the data to take down your buildings and replace them. There's still life left in them and through strategic investments these things can last for another generation in a way that you can be proud of that would actually be inspirational and create an environment that is very suitable for education in the future without having to tear down and 13 start over.

MR. KUEHN: Well, I look forward to looking at the detail. Thank you again for your time.

MR. MILLS: Thank you, sir. CHAIRMAN CAUSEY: Dr. Hager? DR. HAGER: Yes, hi. Thank you again for the presentation, it was so informative, I'm going to be sifting through my notes and the

Page 231 report after the meeting.

14

15

16

17

13

17

19

20

21

2 I had been concerned for a long time also similar to Ms. Pasteur about the equity issue with the school buildings, and I really liked your rubric that includes the three pillars. But I did notice that Lansdowne High School was by far number one in education adequacy and equity and by far number one in facilities and condition, but in capacity utilization was like number five, somewhere down the list to end up at number five on your 12 priority list. Granted it's an on going project so it's going to move forward as number one, but if it weren't for that, then a school that

conditions are just so dire that the rubric is thrown out the window and you say this building

rubric. So is there a tipping point where the

clearly is in desperate in need of a new building

wouldn't have gotten a new building based on the

has got to be redone?

MR. MILLS: Well, part of it is not

Page 234

relitigating past decisions that are kind of past

- the point of no return in the case of Lansdowne.
- But kind of a rule of thumb, when you look at
- financially looking at your stewardship of your
- physical assets, it's kind of once you get north
- of spending half of the money it would take to
- replace something, particularly when you get
- towards two-thirds, it's kind of a common
- industry that you'll see out there. When you're
- at 65 percent and above, you're probably at a
- point now where you're driving a 19, you know,
- 12 '84 Volvo and while you've enjoyed it over the
- 13 years it might be time for a new car. But when
- 14 we have 22 FCIs, not 65 FCIs, and then even when
- you put on top of that some of the educational
- 16 and adequacy repairs and costs and things, we
- 17 didn't find any campuses that really met that
- 18 threshold to where it was financially a no
- brainer that yeah, we ought to just start over.
- 20 Now -- (audio cut off) --

21

11

12

13

14

15

DR. HAGER: -- the survey and the

Page 235

stakeholder interview groups, and I thought that you said that that played into the scheduling considerations, was that accurate, did I hear that correctly, is there community input that goes into this rubric in some way, or is that really secondary?

MR. MILLS: Well, it's in the rubric in terms of the weighting, and it was also informed and guided by the focus groups that we worked with through multiple sessions to design the rubric, and that was applied to come up with the sequencing and timing of projects.

DR. HAGER: Thank you. That's it.

MR. MILLS: Thank you.

CHAIRMAN CAUSEY: Thank you. So, Mr.

16 Mills, I forgot to thank Dr. Lever, and what a

17 great resource for us to have. I was, I had the

- benefit of meeting him in the fall of 2015 when I 19 started my Board service and going to the IAC to
- 20 understand more about the school construction
- 21 process, and he really does just have a wealth of

knowledge and a passion for sharing it.

I -- (audio cut off).

MR. MILLS: I don't know if it's my computer or everyone's. It appears that Board Chair Causey is frozen.

MS. GOVER: I believe she is. Madam Chair?

MR. KUEHN: Mr. Mills, I was just going to ask you what the next step was for interfacing and interacting with the Board for you and your team.

MR. MILLS: I would defer to my handlers within the county government and school system.

MR. DIXIT: I will try to answer that question. The purpose of today's presentation is part of communicating the findings to everybody, and we did the same thing with the county council, so our conversation will continue until we have time to make the final recommendation approved by the county council and by the School Board.

Page 237

1 MR. MILLS: Yeah. Other activities that are on the near-term horizon are completing the middle school elementary school assessments,

validating that data, collecting, gathering the

educational adequacy and equity information, and validating, sitting in workshops looking at the

capacity utilization. We're in discussion of the structures for how, you know, we did a very

successful process to get us to our point on

schedule for this first phase, but we wanted to

11 look at the balance of the project with a little

more relaxed schedule to make sure that we

13 structured it with the appropriate committee structure and outreach overlay. So we're working

15 closely with staff on how the balance of this

work will work. For the most part it would be

17 consistent with what we've done here, with 18 perhaps increasing frequency and touches with

stakeholders, and certainly with student voice.

CHAIRMAN CAUSEY: Good evening. Can you

hear me?

12

21

come from.

MR. MILLS: Welcome back.

CHAIRMAN CAUSEY: Thank you. So I'm going to blame it on the weather that my Internet is down. So just for the next time that we're together, one of the things that is important that many of our stakeholders have referenced over time when we have addressed our capital construction is the enrollment projections. So juts as recently as today, I received information 10 that had side by side comparisons of the student counts data, and so what would be helpful to understand is the data that Cannon Design used, 13 and also to do an evaluation of the accuracy of 14 the projection enrollments, and not as a function of the overall accuracy but we're talking about 16 the 24 high schools. So if I go inside to get my 17 report, let me see if I can do this, we're 18 talking about swings of hundreds being shifted 19 out of some schools and moving to other schools.

So for instance Catonsville High School, the difference in the 2028 projection listed in

1 2019 versus June of 2020 is an enrollment that's

Page 239

down by 59 students; Chesapeake High School went up by 15 students; Dulaney High School went up by 66; Dundalk High School went up by 314 students; Franklin High School went down by 201 students. So what really needs to be presented is the accuracy of enrollments and what are the factors that have changed the projections in some cases very drastically. New Town High School is projected to be lower by 160 students in a projection from February of 2019 versus what was available in June of 2020.

And also to another board member's point about development and developers, those numbers 15 need to be really looked at in terms of the county's planning process and there is a task 17 force, and we appreciate the county executive and the school system working with the county council on addressing that, the issues of developers building in areas that are overcrowded related to capacity being available adjacent. But that's

problematic if we're asking families that have belonged to school communities for years but then have to be redistricted out. So there's a lot of community concerns and I think that it's going to be helpful for you to be able to evaluate those projections and where the confidence level can

So Ms. Henn, if I could just ask you, did everyone else wrap up for Mr. Mills?

VICE CHAIR HENN: Madam Chair, I'm not sure, so we should probably ask if there are any outstanding issues, comments or questions that board members may have.

CHAIRMAN CAUSEY: Yes, and I did want to hear from Dr. Williams and any thoughts he would like to share.

DR. WILLIAMS: So once again, I will just associate myself with comments made by board members, Mr. Mills. I appreciate your presentation and all the data, and the links will be provided and again, I just appreciate your

Page 241

Page: 61 (238 - 241)

Facsimile (410) 821-4889

patience tonight as we were running a little bit over on our agenda, so again, thank you so much. And to our county partners, we appreciate the collaboration and partnership. This has been a topic when I first came and so I appreciate our county partners, county executive and county council, and of course the Board as we are exploring these next steps of capital improvement, so thank you.

CHAIRMAN CAUSEY: Thank you Dr. Williams. And thank you, Mr. Mills. So we are now going to move on to the next item on the agenda, which is the report on the proposed school calendar. And so for that, Dr. Williams, what staff do we have here for that item? MR. WILLIAMS: That is Mr. Duque. CHAIRMAN CAUSEY: Okay. Good evening, Mr. Duque. MR. DUQUE: Good evening, Madam Chair,

Vice Chair Henn, can you hear me? CHAIRMAN CAUSEY: Yes.

3

15

16

17

18

20

21

1

11

13

15

17

Page 242

MR. DUQUE: Okay, thank you. I'm having problems with my Internet.

Good evening, Madam Chair, Vice Chair Henn, Dr. Williams and members of the Board. The 5 calendar committee met on August 24th and August 31st to -- (inaudible, static) -- for the 21-22 school year. As a result the committee's recommendation was to provide the Board with a pre-end calendar -- (inaudible, static) -emergency closure days added at the end of the school year. Also, both calendars have a full spring break from the end of classes on April 8th 13 through Easter Monday, April 18th, with classes 14 resuming on Tuesday, April 19th.

The key differences between the calendars are the start dates of the academic year for staff and students as well as the end dates for the school year. If you have any questions, I will be happy to entertain them at this time.

CHAIRMAN CAUSEY: Thank you. I see

Page 243

14

15

16

18

6

7

15

16

17

18

19

20

Dr. Hager?

2 DR. HAGER: Yes, thank you, I don't know if others have questions too. I did, several of us were contacted by a constituent who noted that the date of Eid, the Muslim holiday of Eid is actually recognized on May 2nd and we have it recognized on May 3rd, and I looked in to confirm this and that is actually true, so I'm not sure how this process works for making adjustments to the calendar, is it just, do board members make I recommendations and the calendar committee 12 considers it?

MR. DUQUE: With regards to the holidays, it's a little bit difficult with the Muslim holidays. We can make a change upon confirmation that indeed it is May 2nd versus May 3rd.

18 DR. HAGER: Okay. And secondly, the 19 concern that should there be more than five snow 20 days, that kind of, I believe the calendar 21 document that you shared says that we would then extract holidays and spring breaks and kind of, it goes on in a list. But is there room to not remove holidays as kind of the first swipe, particularly religious holidays? Just again, considering that a religious holiday is different than a day of spring break, it has different

meaning for many of the students in the county.

MR. DUQUE: The Muslim holidays have been designated on the calendar as potential development days, as well as the Jewish holidays that occur earlier on the board. However, in past, deliberations has decided and indicated that if we were to need to convert days to make up for school closures, that we would not convert those professional development days into student days.

DR. HAGER: Okay, thank you. And then I just, as a fairly new board member, I feel very strongly about a pre Labor Day start in general just to let others know, and I'm happy to discuss that at another time, but that is something that

Page 245

as a working parent and someone who believes in, has great concerns for the achievement gaps that happen in the summer, I just wanted to make sure that it was mentioned that I am very much for a 5 pre Labor Day start, so that's it. Thank you.

> MR. DUOUE: Thank you. CHAIRMAN CAUSEY: Mr. Muhumuza? MR. MUHUMUZA: Yeah. I have a question.

There was a teacher who emailed me earlier today, 10 he asked a very great question. I sort of knew 11 the answer but I wanted to follow up. He, 12 basically what his question was, if we basically 13 remain virtual during the wintertime, would there be snow days technically since it's virtual?

MR. DUQUE: No. This was discussed with the unions, and unless there is a state declared emergency and if there is some sort of severe storm that would impact connectivity and the ability to conduct remote learning, we would continue to operate, and that was written into the MOU between the teachers union and the Board.

Pro	ceedings		Baltimore County Board of Education Meeting
-	Page 246	1	Page 248
1	MR. MUHUMUZA: Okay, that's what I	1	Mr. McMillion was inquiring about. We do take
2	thought was mentioned, so that was my only	2	the guidance from the state so I think we can
3	question, thank you.	3	follow up, but at this point that would be an
4	MR. DUQUE: Thank you.	4	action item.
5	CHAIRMAN CAUSEY: Ms. Jose?	5	CHAIRMAN CAUSEY: Thank you, Rod, for
6	MS. JOSE: Thank you. Mr. Duque, when	6	that suggestion, and thank you, Dr. Williams, for
7	does this come back to the Board for voting?	7	the followup. Other (audio cut out) so the
8	MR. DUQUE: The second reader is on	8	next item on the agenda, we have board members,
9	October 13th and then the vote is scheduled for	9	Item M, report on equity, Item N, Board committee
10	November 10th.	10	updates. I would entertain moving forward, but I
11	MS. JOSE: Okay, thank you.	11	would also entertain if we wanted to postpone
12	CHAIRMAN CAUSEY: Other board members?	12	those two items to the next board meeting given
13	MR. MCMILLION: Ms. Causey, I have a	13	the lateness of the hour.
14	question, Rod McMillion.	14	MS. PASTEUR: This is Ms. Pasteur. Let
15	CHAIRMAN CAUSEY: Mr. McMillion?	15	me move to entertain your whatever, to entertain
16	MR. MCMILLION: Mr. Duque, considering	16	your comment.
17	that we've been in virtual learning since	17	VICE CHAIR HENN: I'll second
18	March 16th or whatever, have you, has your	18	Ms. Pasteur's motion.
19	committee discussed on emergency days off in the	19	CHAIRMAN CAUSEY: So there's a motion
20	future where we go virtual, rather than plan in	20	and a second to move Items M and N to the next
21	five emergency days, those days go virtual as	21	board meeting. Is there any further discussion?
	Page 247		Page 249
1	long as there's connectivity? Thank you.	1	Ms. Jose?
2	MR. DUQUE: We have had preliminary	2	MS. JOSE: Yes. I would point out that
3	discussions around that, there are other	3	this was placed really late so if Ms. Pasteur
4	considerations that need to be taken into	4	r
5	account. Being in a virtual setting on a	5	further up in the agenda for next, for the next
6	continual basis is much different than all of a	6	board meeting and not down at the bottom, you
7	sudden being in a virtual setting for making up	7	know, at the end, because this is an important
8	instruction, or continuing instruction. So I	8	issue when we're discussing equity and I want it
9	think before we can even entertain that concept,	9	to be done in the beginning and not at the end,
10	we need to have further discussions and further	10	so would you accept an amendment to push it up
11	inquiry and consultation also with the state.	11	front and not at the bottom of the agenda?
12	MR. MCMILLION: So is that something	12	MS. PASTEUR: I absolutely would. If
13	that you're going to initiate, consultation with	13	there are no staff members involved tonight I'm
	,		
14	the state?	14	fine with that, because I think it's important
14 15		14 15	and it should not be garbled at this late hour,
	the state?		-
15	the state?  MR. DUQUE: We can. I wasn't	15	and it should not be garbled at this late hour,
15 16	the state?  MR. DUQUE: We can. I wasn't contemplating on doing that.	15 16	and it should not be garbled at this late hour, so I'm willing.
15 16 17	the state?  MR. DUQUE: We can. I wasn't contemplating on doing that.  CHAIRMAN CAUSEY: Dr. Williams, did you	15 16 17	and it should not be garbled at this late hour, so I'm willing.  CHAIRMAN CAUSEY: Thank you, Ms. Jose,
15 16 17 18	the state?  MR. DUQUE: We can. I wasn't contemplating on doing that.  CHAIRMAN CAUSEY: Dr. Williams, did you want to speak to that?	15 16 17 18	and it should not be garbled at this late hour, so I'm willing.  CHAIRMAN CAUSEY: Thank you, Ms. Jose, for that suggestion, and thank you, Ms. Pasteur,

PIO	ceedings		Baitimore County Board of Education Meeting
1	Page 250	1	Page 252
2	procedural question about agenda setting, whether	2	CHAIRMAN CAUSEY: Okay. So board
3	or not that's something we can stipulate as part	3	members, with that we will vote on the amendment.
4	of this motion, if Mr. Brousaides is still with us at this hour.	4	So rollcall vote please on the amendment to,
5		5	report on equity to be the first new business
	CHAIRMAN CAUSEY: So Mr. Brousaides can		item.
6	confirm for me, but agenda setting is an open	7	MS. GOVER: Dr. Hager?
7	meetings act, so since we are in open session, we		DR. HAGER: Yes.
8	should be able to process this motion.	8	MS. GOVER: Mr. Kuehn?
9	Mr. Brousaides, is that correct?	9	MR. KUEHN: Yes.
10	MR. BROUSAIDES: Yes, Ms. Causey.	10	MS. GOVER: Ms. Pasteur?
11	CHAIRMAN CAUSEY: And without seeing the	11	MS. PASTEUR: Yes.
12	agenda for the next meeting, we are unable to	12	MS. GOVER: Mr. Offerman?
13	specify specifically which item it will be, so	13	MR. OFFERMAN: Yes.
14	Ms. Jose, would it be acceptable to you to	14	MS. GOVER: Mr. Muhumuza?
15	specify it as the first item of new business for	15	MR. MUHUMUZA: Yes.
16	the next?	16	MS. GOVER: Ms. Henn?
17	MS. JOSE: Yes, that sounds good.	17	VICE CHAIR HENN: Yes.
18	CHAIRMAN CAUSEY: Okay, I would accept	18	MS. GOVER: Ms. Causey?
19	that.	19	CHAIRMAN CAUSEY: Yes.
20	MS. JOSE: Thank you.	20	MS. GOVER: Ms. Jose?
21	CHAIRMAN CAUSEY: Would you like to	21	MS. JOSE: Yes.
1	Page 251 restate your motion?	1	Page 253 MS. GOVER: Mr. McMillion?
2	MS. JOSE: That the equity, is it the	2	MR. MCMILLION: Yes.
3	report, be presented right after new business at	3	MS. GOVER: Ms. Mack?
4	the next board meeting.	4	MS. MACK: Yes.
5	MS. PASTEUR: Well, wait a minute. Is	5	MS. GOVER: Ms. Scott?
6	it after new business or is it the first item on	6	MS. SCOTT: Yes.
7	new business?	7	MS. GOVER: Ms. Rowe?
8	MS. JOSE: Is it, Ms. Henn, did you say	8	MS. ROWE: Yes.
9	after new business or the first item? And I	9	MS. GOVER: Thank you.
10	could care one way or another, as long as it's up	10	CHAIRMAN CAUSEY: Thank you. Now we're
11	front.	11	voting on the motion as amended, that we will
12	VICE CHAIR HENN: I said it's the first	12	move Items M and N to the next board meeting,
13	item of new business, so it's first or up front.	13	with Item M being the first item of new business.
14	MS. JOSE: So I move that the agenda be	14	May I have a rollcall vote please?
15	placed first item of new business.	15	MS. GOVER: Dr. Hager?
16	CHAIRMAN CAUSEY: So Ms. Jose, thank you	16	DR. HAGER: Yes.
17	for that. We have a motion and a second. So	17	MS. GOVER: Mr. Kuehn?
18	your motion is to amend the motion to specify	18	MR. KUEHN: Yes.
19	that the report on equity will be the first item	19	MS. GOVER: Ms. Pasteur?
20	of new business?	20	MS. PASTEUR: Yes.
21	MS. JOSE: Correct, thank you.	21	MS. GOVER: Mr. Offerman?
	· · · · · · · · · · · · · · · · · · ·	1	

Pro	ceedings		Baltimore County Board of Education Meeting
-	Page 254		Page 256
1	MR. OFFERMAN: Yes.	1	DR. WILLIAMS: Let me explore that,
2	MS. GOVER: Mr. Muhumuza?	2	Ms. Scott.
3	MR. MUHUMUZA: Yes.	3	MS. SCOTT: Thank you.
4	MS. GOVER: Ms. Henn?	4	CHAIRMAN CAUSEY: Okay, thank you. So
5	VICE CHAIR HENN: Yes.	5	if there's no further business, the last item on
6	MS. GOVER: Ms. Causey?	6	the agenda is announcements, and our next board
7	CHAIRMAN CAUSEY: Yes.	7	meeting is Tuesday, October 13th, 2020 at
8	MS. GOVER: Ms. Jose?	8	6:30 p.m., and there will be public comment on
9	MS. JOSE: Yes.	9	the 2021-2022 school calendar. Please look for
10	MS. GOVER: Mr. McMillion?	10	the press release and also the news items on the
11	MR. MCMILLION: Yes.	11	website for your opportunity to include your
12	MS. GOVER: Ms. Mack?	12	public comment.
13	MS. MACK: Yes.	13	And with that, I just want to tell
14	MS. GOVER: Ms. Scott?	14	everyone thank you, and also take care and stay
15	MS. SCOTT: Yes.	15	safe. The meeting is now adjourned.
16	MS. GOVER: Ms. Rowe?	16	(Meeting adjourned.)
17	MS. ROWE: Yes.	17	
18	MS. GOVER: Thank you.	18	
19	CHAIRMAN CAUSEY: The motion carries.	19	
20	The last item on the agenda	20	
21	MS. SCOTT: Ms. Causey, excuse me. May	21	
	Page 255		Page 257
1	I ask a question please?	1	STATE OF MARYLAND.
2	CHAIRMAN CAUSEY: Certainly.	2	BALTIMORE COUNTY: SS
3	MS. SCOTT: This is Ms. Scott. I didn't	3	
4	see and I may have missed it, but the actual	4	I, Paul A. Gasparotti, a Notary Public in and
5	report itself attached to the agenda item, was	5	for the State of Maryland, Baltimore County, do
6	that missing or will that be attached for the	6	hereby certify that the foregoing is a true and
7	next meeting? I didn't see the actual report	7	accurate transcription of the recording to the
8	there, I know we're receiving a presentation, but	8	best of my ability.
9	I wanted to know if the report was going to be in	9	I further certify that I am not of counsel to
10	BoardDocs.	10	any of the parties nor in any way interested in
11	CHAIRMAN CAUSEY: Dr. Williams, would	11	the outcome of these proceedings.
12	you like to respond to that?	12	As witness, my hand and notarial seal this 2nd
13	DR. WILLIAMS: So the plan was to follow	13	day of October, 2020.
14	up from the previous board meeting with a	14	
15	presentation so there was not a report attached	15	
16	to BoardDocs, and after the presentation we were	16	Paul A. Gasparotti
17	going to attach it, so we can have the	17	
18	presentation available for the next meeting prior	18	
19	to October 13th.	19	
20	MS. SCOTT: Can we have the report	20	
21	attached as well, or also included in BoardDocs?	21
