Superintendent’s Note

Dear school community,

Thank you for being part of the 2019 Stakeholder Survey. We are so proud that the systemwide participation from students, parents, staff, and community members in the past year reached 79,935 responses.

We are providing every school with its report on student responses. The results focus on academic aspirations, belonging, and student support because our research shows that students who have more positive perceptions on these domains have better achievement, growth, and behavior.

We know that we can work to improve these perceptions in an effort to improve outcomes for every student. Take a look at how students responded at your school and reflect on the challenges and opportunities that exist.

I look forward to working with you to raise the academic bar, close gaps, and prepare our students for the future.

Darryl L. Williams, Ed.D.
Superintendent

Reporting Student Responses

This report contains student responses to questions on the 2019 Stakeholder Survey for your school. Most survey questions are organized under the following three areas:

- Academic Aspirations measures students’ perceptions of teacher expectations, their interest and engagement in class, and belief that their BCPS education will allow them to succeed in the future.
- Belonging measures the extent to which students feel physically and emotionally safe at school. Items in this domain address the overall school environment and peer-to-peer relationships.
- Student Support measures the communication and social support that students receive in school and includes the relationships students have with their teachers and other adults in the school.

Additional questions not grouped within the areas above are also reported. These include questions regarding bullying, challenging schoolwork, school pride, and school effectiveness.
Domain Index Scores

Index scores are a summary of multiple survey items within each domain ranging from 0 (a completely negative perception) to 100 (a completely positive perception). Items within each domain are listed at the end. Below is a description of what this represents for each domain.

<table>
<thead>
<tr>
<th>Domain</th>
