K. Wilson

Hi - I see new meeting dates to discuss the new scenarios to address high school capacity have been set. When will the new scenarios be available online that will be presented at the meetings? Also the latest public email log link listed on the bcps website does not work. Thank you.

Dear Board Members and Sage Policy Group. I am writing in regards to the September 18th presentation of the proposals that are being presented. There are many concerns with the timing of this. One is that it is a Back to School Night for many schools and parents cannot attend this meeting. The second is that it is the start of Yom Kippur and you are eliminating many Jewish families from providing feedback at this meeting. I am asking that you take into consideration the religion and commitment of your stakeholders and parents and reschedule your meeting. I feel that the date you have chosen has overlooked these situations- intentional or not- and needs to be edited. I will be driving from Catonsville to attend this meeting and I feel that accessibility to this date is not available for many communities in the county that are affected. Thank you for your consideration. Best, Laura Henry

I. Laskaris

I prefer option 3. Since the "issue" is overcrowding, it makes sense to build capacity to address the issue of overcrowding.
Very truly yours, I.Laskaris

When you are discussing a map (particularly when you are using the laser pointer ON the map), it would be helpful in the video replay to show the map rather than Mr. Basu's face—lovely as it is :)
